

HOW IS SMALL BUSINESS GIVING AUSTRALIA A BIG FUTURE?

Australia is a small business nation. Small businesses employ 5.5 million Australians and generate \$380 billion, which is great for our economy.

That's why the Australian Government has a range of initiatives designed to help small business grow including:

- Tax cuts
- Simpler GST reporting
- Faster depreciation deductions for assets up to \$20,000
- Investor tax breaks
- Help for start-ups
- Tools for easier tax compliance
- Less red tape
- Employee share schemes
- Support services for small business
- Free Trade Agreements
- Training and skills programmes
- A Small Business Ombudsman

These measures will help our economy grow, create new jobs, spur investment, open up global trade opportunities, and support higher wages. It's all about giving small business a big future.
