Comments on proposed LADHA changes:

This is certainly an issue that needs proper consideration. If LAFHA is indeed taken away does this mean that other expenses that foreign nationals in Australia have to pay will also be changed. Examples would be health insurance and school fees. LAFHA incentivises skilled people to come and work in Australia. If LAFHA is taken away agree salary ranges that incorporated LAFHA will be skewed, people who use LAFHA to cover rent and other expenses may find themselves unable to meet their bill requirements.

This needs to be looked in a way that means if LAFHA is taken away, everything else MUST be equal for foreign nationals and also Australians.
