a) The summary table does not include any extra call on welfare payments such as the Crisis Payment and the Hardship Payment.

b) Estimates have been revised as claims are processed. It is possible this estimate may undergo further revision as additional information becomes available.

c) This estimate assumes payment for a single 13-week period and currently includes Qld only. An extension of the period, and inclusion of other States, will change the estimated cost of the measure.

d) Existing NPA payment that Qld has requested be paid early, but within existing financial year. Funding already in 2010-11 estimates.

e) The Attorney-General has requested additional assistance to cover funeral expenses, which may be covered under Category D of the NDRRA, and treated as a measure. Represents maximum estimated Commonwealth contribution on a 50/50 arrangement with the States.
