Hi all,

Attached is a draft version of a resource paper.

Could you please have a look and provide comments. We intend to provide this to the Tsr to read for his flight at 1030 tomorrow morning, so first comments by the end of today would be most appreciated.

In particular there are a number of highlighted areas where it would be great to have extra info/info checked.

Apologies for the short timeframe – this is likely to iterate a bit anyway when we have the Tsr's comments.

Cheers,  
Hamish
