Thanks Mandy

My reading of column 4 in table 3.6 is that in the medium term, GST redistribution means that NSW gets 30.2 cents in every dollar of additional state revenue (that isn't quarantined), Vic 22.8 cents, Qld 18.5 cents, WA 8.1 cents and so on.

Just thinking about the actual financial outcomes if the states are allocated a new revenue stream that was not quarantined from the CGC process.

Is that right?

Cheers,
Hamish

Hamish

As discussed, the GST relativities are in BP3 page 112.

Table 3.6: GST relativities

	NSW	VIC	QLD	WA	SA	TAS	ACT	NT
2008-09 rebased	0.88779	0.91393	0.96118	0.85782	1.23151	1.66332	1.25457	5.25633
2009-10	0.93186	0.91875	0.91556	0.78485	1.24724	1.62040	1.27051	5.25073

Please call either me or Derek Bazen if you have any further questions,

Mandy

Hi Sue and Peter,

Do we have a readily accessible table on current resource royalty revenue by state?

(it would also be useful to have the % relativities used in HFE by the grants commission, if possible)

It would be great to get a copy this afternoon if it is around.

Cheers,
Hamish
