Based on \$175000m in construction work done in Qld in 2009-10, construction impact would be around \$175m for one month. Assumes non-res is concentrated outside the flood-affected regional areas (ie not affected) and 20% of residential building activity takes place in affected regions (based on Anthony's employment figures).

**Subject:** Sentence for EM checking

Hi,

Could you please check this sentence quickly?

In Queensland, the total value of construction work done during the 2009-10 financial year was \$17.5 billion. Of this, 42.2 per cent was non-residential building construction and 57.8 was residential building construction.

Table 43 of 8752.0 might speed things up a bit.

Thanks,

Alex
