Hi Section 22

Can you check the second sentence in the new paragraph?

Thanks,
 Section 22

Section 22

As discussed, the brief is current for the most recent CPI outcome, so I don't propose changing any of the facts or figures that come from the ABS. With S22 agreement I think it can be a bit more direct in the section that is currently called CPI update. My suggestion is below (Change the section heading and replace the first dot point).

CPI outcomes – September and December quarters 2014

CPI outcomes since 30 June are consistent with Treasury estimates of the effect of the repeal of the tax. CPI expenditure classes where a direct effect was expected have seen falls or below normal growth in prices. Electricity prices fell 5.1 per cent in the September quarter and remained flat over the rest of the year.

Return to the same dash points and following text (ie the one that starts '- Electricity price growth in the September quarter was the weakest since...').

Hi Section 22

As discussed, attached is the QTB that was update by S22 for the December qtr CPI. Grateful if you could update as required.

Thanks,
