Good afternoon

I have done some more checking of the Bill and have made some minor revisions. A new version is attached.

In relation to the policy authority letter, I suggest that it be revised to more clearly identify all the changes to the exposure draft that could be regarded as being matters of policy significance. I don't think the draft letter makes it all the clear what the changes are, as opposed to what was in the exposure draft. I think the matters that should be mentioned as changes for which authority is now being sought are as follows (the following list is in the order the provisions appear in the Bill, not in the order of their importance):

Section 22
