Subject: Advocacy to improve environmental policy
Date: Wednesday, 2 August 2017 3:35:50 PM

To whom it may concern

We think climate change is the greatest threat to the world and all countries should quickly stop using fossil fuels. We support a number of environmental groups so they can be strong advocates for good environmental outcomes.

Advocacy to improve environmental policy is about preventing damage from happening in the first place

Limiting the ability of environment groups to advocate for our environment would result in poorer environmental outcomes.

Yours sincerely

Catherine and Robert Money
