

It's time for the enquiry to start working for the good of Australia and stop following their own agenda

Recommending any form of bail-in legislation is treason against Australians

We need bank regulation to control the banks that are out of control and have been gambling with other people's money and this has to stop not support the Banks with Bail -In Legislation and other forms of Protection.

We need Glass -Steagall Bank Separation and write off all their Derivative Gambling (\$23+TRILLION). (We don't want the ring fencing alternative that allows banks to continue their corrupt operations by slipping through the cracks RING FENCING WAS CREATED BY BANKERS AS A SAFETY NET ALTERNATIVE (FOR THEM) AGAINST GLASS -STEAGALL.

We need A National Bank of Public Credit to fund large infrastructure projects to rebuild the economy.

The Commonwealth Bank has only operated as intended during the two world wars, the rest of the time the Liberal party and its stooges prevented the CBA from operating as it should until they sold it and turned it into another Corrupt Big Bank

Instead of writing a long submission I have Provided links to two Publications that will inform a committee that was selected because Hockey and his Banker backers consider these people corrupt enough to give the report the Corrupt report they want .

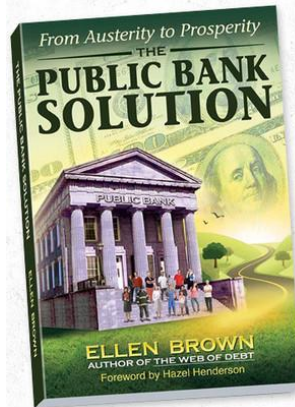

The hand selected members of the Committee have had plenty of connection to the Corrupt Banking System and its time for them to learn about honest banking System for all. Learn from Alexander Hamilton and Franklin Roosevelt.
