

Opposing Bail-In

As a very concerned resident of Australia, I am writing this note to show my disagreement & opposition to the idea of "Bail-In"

I consider myself to be a rational & reasonable thinking person & I cannot believe a system which only benefits the large banks & corporations to the sacrifice of the normal hard working honest population, is actually being considered. More so, especially as we can already see the effects of this policy in real time on the populations of the places on this planet to where it has already been fully or partially imposed.

I would sincerely hope that the person (s) reading these submissions take a step back, have a good look at their family, children, parents, friends, then take a look at the currents global situations playing out daily on the media, & realise that the present conditions that we live in are not working for the greater good of the human race, will not work with the suggested solutions being touted by the present politicians (bankers) , & need to be drastically changed if the people of Australia & the world in a whole are to move forward for the greater good of all.

It is on this note that I call for the implementation of the Glass – Steagall act.
