To Whom it may Concerne

Dear Sir or Madam

When the Pope speaks out about the world financial system its obvious that its very bad. I am very on happy about our banking system in Australia. The way it stands at the moment our banks are in the position to be able to what is called bail in to our savings deposits in the event that in wants or needs to.

World financial systems are getting far worse not better & I want the Australian banking system to introduce immediately the Glass. Steagall system for the common good of all bankers. Separating the savings section from the investment banks. We the people of Australia deserve this protection from the Vultor banks. I trust you will give this the attention it deserves as swiftly as you can.

Yours Sincerely

Danny Tew 21-8-14
