

COMPLETE TAX REFORM

PROPOSAL

Abolish all taxes to start with. No more taxes on anything. No more tax returns to be lodged by all Australians / Small Business / Companies and Major Corporations.

The Major Banks / Financial Institutions / Small Banks together handle \$900 Trillion Dollars in anyone financial year in transactions.

We Australians to be charged a 1% fee on all transactions and this fee to be paid to Treasury which would give the Treasury a \$9 Trillion in income. A lot more than what the Treasury currently gets in tax receipts.

I have spoken to small business owners / the Australian Public / Members of the Australian Federal Government / Concerned people on Struggle Street / farmers who all agree this simple fairer system is the way for the Federal Government to go about collecting its taxes.

Eliminates all the red tape / it are simple / fair and easy to administer.

There are a thousand benefits for this system to be implicated.

Australians have had enough – we all are struggling to make ends meet.

I listen to MP's speak – it's the same thing they talk about – Hospitals / Health / Roads / Railway / cost of electricity / cost of living – it just keeps getting more and more costly to live. Well it's all

about the debt the Government has. Every member of Government has the answer – but it always ends up we pay.

Nearly all Australian couples need to work. Married couples both work to meet there needs in cost of childcare / fuel / food on the table plus State Taxes and local government taxes – they are broke.

IT'S TIME TO CHANGE THE WAY WE PAY TAX

Take the farmers – they do not need money – they need water and fodder. Cost of fuel – far too expensive – this new system gives them a huge break to get on and run their farm – which should be the food bowl for all Australians.

Small business is sluggish – 30 cents in the dollar tax – the budget reduces it to 28.5 %.That no break for small business.

This system would eliminate the big business to have tax havens off shore.

Everybody has to at some stage withdraw or bank there funds here in Australian with the Banks – charge us 1% .

Its time now to make the change and I would like to debate this proposal with you as it is so simple / fair and easy to administer.

I look forward to having this proposal implemented for a fair go and for All Australians to get a break to have a better lifestyle and succeed in there endeavours, not only for us but our children and there children.

AT LAST FOR A FAIR GO
