To Whom It May Concern

I want to make known my objection -- as an AU citizen -- with regard to Cashless legislation now, the future & that I exert my rights as said citizen of Australia to express my objection directly to the Black Economy Division via Australia Post.

The aforementioned proposal contravenes the right to movement beyond the imposed Digital Economy as leveraged by the current Prime Minister -- and Treasurer. My concerns are to the core of secure & safe transactions in a very real cyber-vulnerable world that requires oversight & to not impose against the will of citizens a limited curtailment of rights unless provisions are adequate in a Digital Space & currently not & not also in the future. Christine Down
