

Dorset Community House

19th August 2020

To whom it may concern:

I write in support of the Dorset Council's funding application for the 'Healthy Dorset' project.

The mission of Dorset House is: To provide opportunities for community participation by providing support, referral and activities in a welcoming, inclusive and friendly environment. We have identified through our grass-roots work in the community a high-level of social isolation, disconnection and poor health outcomes. A holistic health and wellbeing project like 'Healthy Dorset' is just what our community needs to enable us to support each other to be healthy and connected post the COVID-19 pandemic.

We wish Council the best of luck with their application and will look forward to supporting them to bring this project to fruition.

Yours sincerely,

Jen Barron

Manager

Dorset Community House
