## 4 Part 4

## Part 4—Thresholds

### 49 Simplified outline of this Part

Certain actions are only significant actions or notifiable actions if the threshold test is met. This Part prescribes values for that test.

There is a single threshold value for action taken in relation to agribusinesses.

For entities (being corporations or unit trusts) and Australian businesses other than agribusinesses, the threshold value depends on who takes the action and whether the action is taken in relation to a sensitive business.

The threshold value for land depends on who takes the action, the kind of land in relation to which the action is taken and other circumstances. Some land has no threshold value.

Most of the threshold values prescribed under this Part are indexed each year (see Part 5A).

### 50 Certain actions taken in relation to agribusiness

The following table prescribes a value for section 51 of the Act (agribusinesses) to the extent that that section relates to item 1 of the table in that section.

Threshold value for certain actions taken in relation to agribusinesses		
Item	For action taken by ...	the value (in millions of dollars is ...

### Part 5A—Indexation

#### 58 Indexation of values prescribed by Parts 4 and 5

- (1) For subsection 139(2) of the Act, a value prescribed in a section of Part 4 (except in subsection 52(4) or item 2 of the table in subsection 52(5)) and Part 5 is to be indexed each calendar year. This section explains how to work out the value (the *indexed value*) for a calendar year.

Note: Subsection 52(4) prescribes the threshold value for agricultural land. Item 2 of the table in subsection 52(5) prescribes the threshold value for certain land being acquired by an enterprise or national of Thailand (other than a foreign government investor).

##### *Indexation*

- (2) The indexed value for the year is worked out in accordance with the formula:

$$\frac{\text{Existing value for the year} \times \text{GDP implicit price deflator value for the year}}{100}$$

##### *Rounding*

- (3) If an indexed value worked out under subsection (2) would not be a multiple of \$1 000 000, the indexed value is rounded to the nearest multiple of \$1 000 000 (rounding up if the indexed value ends in \$500 000).

##### *Indexation only to increase values*

- (4) However, if the value worked out under subsection (2) for a year (after any rounding under subsection (3)) is less than the existing value for the year, the indexed value for the year is that existing value.

##### *Changes by the Australian Bureau of Statistics*

- (5) Values are to be worked out under this section:
- (a) using only the index numbers published in terms of the most recently published index reference period for the GDP implicit price deflator value; and
  - (b) disregarding GDP implicit price deflator values that are published in substitution for previously published GDP implicit price deflator values (except where the substituted numbers are published to take account of changes in the index reference period).

##### *Definitions*

- (6) In this instrument:

*existing value* for a year means:

- (a) if a value specified in a section of this Part has not been previously increased under this section—the original value; or
- (b) otherwise—the indexed value for the previous year.

*GDP implicit price deflator value* for a calendar year means the GDP implicit price deflator value that was published by the Australian Bureau of Statistics in
