BRENDON AGPASA SUBMISSION TO COMMONWEALTH BUDGET 2022-23

Dear Minister Sukkar,

I am write to request the Treasurer, Hon Josh Frydenberg MP's pre-budget submission to receive your favourite few things including digital radio rollout, digital TV rollout, pay TV rollout, ABC's expansion of international media services, NDIS funding, ABC and SBS funding, all your some favourite things and sister cities we're the costs of reinvestment for a total of multi-million dollars and a multi-billion dollars.

The pre-Budget submission outlines the Government's plans for the year ahead, it will respond to your favourite some things we're reinvestment for the funding and includes forward estimates outlining plans for spending in future years, the Treasury and Michael Sukkar in joint partnership with Paul Fletcher (Federal Member for Bradfield, Minister for Communications, Urban Infrastructure, Cities and the Arts) and Peter Khalil (Federal Labor Member for Wills) providing the support of your local communities and our services that rely on them, we're making history of the Federal Government's multi-year Budget funding, in order to accommodate the Federal election 2022.

While the Federal Government took it's eight year plan in seven year agreement was adopted, it has been influenced by community feedback and share your ideas from our community engagement is working alongside Communications Minister Paul Fletcher, Federal Labor Member for Wills: Peter Khalil MP, Moreland City Council, Hume City Council and our partnerships to provided our key issues of your favourite things on local communities in Australia.

We hope you will consider the favourite things below as part of the budget plan. So let me know what is your top policy priorities are key issues affecting the essential services for all Australians.

It will support a focus on creating great neighbourhoods, arts, the local economy, sustainable transport and community equity and health, while grants to support low income households to install solar panels as part of investing environmental sustainability.

An economic recovery plan is designed to create more jobs, secure Australia's future, and explore the essential services for local community groups we're funded by the Government's reinvestment of your favourite things.

We will continue a focus on core services and infrastructure, while improving services, the delivery of important services and explore the few things we're re-developed.

The arrangement of having the sector rely on yearly budget decisions for significant funding is unsustainable in the long-term, the details of this are outlined in the table below:

	2022-23	2023-24	2024-25	2025-26	2026-27	2027-28
Digital radio rollout	\$3,310m (digital radio)	\$3,210m (digital radio)	\$3,450m (digital radio)	\$4,415m (digital radio)	\$4,400m (digital radio)	\$4,075m (digital radio)
Analogue radio to Digital radio conversions	\$200m (analog to digital radio)	\$195m (analog to digital radio)	\$184m (analog to digital radio)	\$175m (analog to digital radio)	\$159m (analog to digital radio)	\$140m (analog to digital radio)
Digital TV rollout	\$3,280m (free to air digital TV)	\$3,310m (free to air digital TV)	\$3,378m (free to air digital TV)	\$3,415m (free to air digital TV)	\$3,494m (free to air digital TV)	\$3,510m (free to air digital TV)
Pay TV rollout	\$4,280m (pay TV)	\$4,310m (pay TV)	\$4,378m (pay TV)	\$4,415m (pay TV)	\$4,494m (pay TV)	\$4,510m (pay TV)

ABC's expansion of international media services	\$2,210 million dollars	\$2,315 million dollars	\$2,294 million dollars	\$2,410 million dollars	\$2,194 million dollars	\$2,181 million dollars

The Communications Minister Paul Fletcher was a new joint partnership will have a funding the digital broadcasting services of radio and television in radio wave spectrum allocations to include analog radio (AM, FM), narrowcasting (LPON, HPON), shortwave radio (HF shower transmissions) and narrowband radio (MF-NAS, VHF-NAS) will convert to adopt the Digital Radio Mondiale, 202-209 MHz digital radio, new DAB+ satellite radio, UHF digital television, VHF digital television, digital satellite television (VAST) and satellite broadcasting is working with ACMA to provided radio and television broadcasting in radio wave spectrum plans.

Pay TV providers will deliver it's subscription channels adopts DVB-S and DVB-C broadcast standards of transmission systems for digital cable television, direct-broadcast satellite television and IPTV services, we also imported pay TV channels from around the world, which mainly TV channels from free-to-air satellite services from overseas, all pay TV

channels will convert from standard definition to high definition format in any subscription required, and closely working with Foxtel to deliver its new and existing channels provided documentaries, international news and sports, foreign language services such as Greek, Italian and more, general entertainment, sub-licences of AFL and NRL coverage, US sports from ESPN and Fox Sports USA, new content deals with ABS-CBN's Filipino Channel, Mediacorp's CNA and NHK World Premium, all 200+ Foxtel channels converted as expands to increase their high definition service, free-to-air retransmissions and more, in development for satellite and cable subscribers.

The Terrestrial transmissions of free-to-air TV services includes primary channels and digital multi-channels from ABC, SBS, Seven, Nine and 10 will be reinvested in retransmitted via pay TV's Foxtel satellite and cable services, as well as IPTV service of Fetch TV, as part of new funding for subscription linear content and linear streaming content.

Digital TV enhancements provided HbbTV and IPTV services to work with Freeview and Viewer Access Satellite Television will allow the Electronic program guide, video program guides, datacasting, news and weather information, catch-up TV, on-demand programs, streaming channels, program extensions and dedicated sport content, we should enable an integrate broadcast channels for free television to our enhancements.

The satellite distribution network of pay TV services across all the subscribers through Foxtel, Optus and Telstra to provide satellite, cable, free-to-air terrestrial retransmissions, live sports and international news are encrypted, interactive features, independent channel providers, 4K ultra HD TV, over 200+ channels, streaming services, new relationships with Fox Corporation and The Walt Disney Company, pay-per-view, adult entertainment, near video on-demand movie service, new partnership with free-to-air satellite systems to deliver the international TV services, movies and TV shows on-demand, retransmission of our radio services from domestic (ABC Radio stations, SBS Radio stations) and overseas (BBC World Service, RAI Radio, ANT1 Radio), new live multi-channel viewing of news and sport, broadcast operations and cable and satellite transmission facilities.

Satellite feeds of radio and television services to be located at the transmission facilities of radio and TV stations would be enabled VAST radio and TV channels through the satellite downlinks with Optus.

We have the future of digital broadcasting services we're rolled out in the re-planning processes, in particular the work being considered the roll-out of digital radio to provide frequency blocks 8A, 8B, 8C, 8D, 9A, 9B, 9C and 9D in the bands 195.168 – 196.704 to 207.296 - 208.832 MHz, as well as DRM broadcast in the bands under 30 MHz for long-range transmissions, extended trials of DVB-T2 technology, and of course, digital TV to provide channels 6 to 51 in the bands 174-181 to 687-694 to adopt the DVB-T and DVB-S2 standards.

Our priorities outlined include the continued transitioning of analogue radio services from AM and FM frequencies to accept the adopted DRM30 and DRM+ signals where spectrum is readily available, coverage improvements of digital radio roll-out in metropolitan, regional and remote areas for national, commercial, community, narrowcast and narrowband broadcasting where spectrum is available, arrangements to allow further rollout of digital radio where feasible, and supporting for trials of new types of broadcasting technology such as DVB-T2 trials.

Digital Radio Channel Plan (DRCP) for the licence areas where the incumbent broadcasters have committed to roll-out of digital radio across regional Australia in 2022.

The national broadcasters had plans to extends its frequency 206.352 MHz on DAB+ channel block 9C into regional areas were reinvested. The commercial radio broadcasters in all regions is earmarked for an expansion of adopting DAB+ and Digital Radio Mondiale to regional Australia, including Gold Coast, Ipswich, Sunshine Coast, Geelong, Sale, Newcastle, Dubbo, Orange, Wollongong, Bundaberg and more.

The Digital Radio Mondiale in the bands under 30 MHz was exported to Australia is rolled-out in digital spectrum. Took them with all remaining frequencies of AM (522 - 1705 KHz) and FM (87.5 – 108.0 MHz) bands will be migrated from analogue radio to adopting DRM bands in the near future.

It enables all coverage of local, regional, national and international in broadcast bands of AM and FM, DRM simulcasts operation with AM and FM analogue signals, and increasing amount of large-areas and local coverage in adopting DRM bands. Also, its proposing to extend its digital spectrum of radio and TV broadcasting licences over a multi-year period when the impact of new legislation is clearer.

We are exciting for making Digital Radio Channel Plans for regional DAB+ where the national broadcasters and commercial licensees has committed to a rollout, converting all analogue services from AM, FM, Shortwave and VHF-NAS frequencies to accept the DRM signals where new digital spectrum is available and enhancing coverage of

national, commercial, community, narrowcast and narrowband broadcasting services where digital radio spectrum is readily available.

Over 7 national radio services (ABC Local Radio, ABC RN, ABC PNN, ABC-FM, JJJ FM, SBS AM, SBS FM) will be planned for extends to digital radio we're rolled out to cover the entire regional areas of Australia.

The new spectrum needs to be made available in over 8 capital cities to allow this small-scale DAB+ technology, it would be to set up a 4th metro-wide DAB+ multiplex (64kbps for each of few suburban stations in all capital cities), as well as an extra channels with a full-time CBAA's Community Radio Network, BBC World Service, NIRS and RPH Australia feeds via satellite to fill the gaps.

Additionally, metropolitan DAB+ roll-out extends into sub-metropolitan and some regional areas such as Tuggeranong, Queanbeyan, Katoomba, Blacktown, Campbelltown, Geelong, Rosebud, Gold Coast, Sunshine Coast, Ipswich, Adelaide Hills, Fremantle, Huon Valley, and more. The Community, LPON, HPON and MF-NAS radio services are also expands to DAB+ and DRM roll-out.

In all metropolitan areas of capital cities, DRM+ to digitise the sub-metropolitan community radio services that generally do not have DAB+ access, DRM+ could be used to provide additional digital radio services.

Also, in all regional and remote areas of Australia, DRM30 will provided to digitise the national radio services, as well as additional digital radio services.

The new frequency 95.9 MHz on the new DRM+ trial in DRM simulcasts FM band was transmitted from Mount Baranduda in Victoria was extended coverage in the digital radio regional rollout.

DRM frequencies is creating 168 DRM+ channels in each regional area, as well as a single high powered HF DRM transmitters to cover the whole of Australia and DRM30 transmissions to cover remote local coverage of Australia.

ACMA is working with the ABC to have latest development of Longwave broadcasting was exported to Australia where spectrum is readily available, the International Telecommunication Union Region 3 to cover whole of Australia, it will approach to new transmitters of Longwave frequencies will accept the DRM30 signals across the regions including 198 kHz in Shepparton, 183 kHz in Alice Springs, 198 kHz in Katherine, 189 kHz in Brandon, 177 kHz in Tennant Creek and 252 kHz in Carnarvon was pending across the regions.

ACMA is working with ABC Radio National is conducting a DRM test on 747 KHz transmitted from Dockers Plains, Victoria alongside the regular 756 KHz AM broadcast from near Wangaratta, Victoria.

New DAB+ satellite service to deliver radio channels from Viewer Access Satellite Television to Australian listeners in remote and rural areas as well as terrestrial black spots will be funded by Australian Government is rolled out to be worked with Optus satellites on the digital spectrum, the satellite communications and radio broadcasting, it was similar to Sirius XM in the United States and Canada. Ongoing success of digital radio and TV rollouts to consider it's installations of satellite dishes to get downlinks is proposed within the radio and TV transmitters in Australia, that is the same as antenna farm.

As part of funding the radio wave spectrum, Digital Radio Mondiale was suitable for DRM30 and DRM+ is 47 - 68 MHz is cleared of analog TV channels 0 - 2 was reinvested.

HF broadcast services of shortwave radio stations in the range of 2.3 MHz to 26.1 MHz bands will convert to DRM in future expansion of digital radio rollout.

Digital Radio rollout in Australia continues to joint partnership as we working with the ACMA's Five year spectrum outlook over a multi-year period. When the Government agreed to allocate an simulcast of analogue stations and additional digital services so they could simulcast in the period of Digital Radio Mondiale rollout.

The 600 MHz band is suitable for use an sixth channel for trials of more advanced digital television technology, it will provided an approach that could make 84 MHz of spectrum available in the 600 MHz band for reallocation as the result of consolidation of television services onto shared multiplexes. This would align the 600 MHz band in Australia with the United States 600 MHz channel plan. However, we would like to see this extended sixth channel of community TV services into all Metropolitan, Regional and Remote areas, as well as 4K TV broadcasts in full-time transmissions of DVB-T2 trials.

We got DVB-T2 trials for television will carry 4K TV broadcasts, 4K broadcasting four times later the picture quality of the crystal clear High Definition standard. Free TV and BAI Communications working with the ABC, SBS and commercial TV networks will all trial the rolled out of DVB-T2 technology to provide expansion of 4K TV services. The TV broadcasters have provided a range of multiview services on few channels and programs on a digital spectrum also in the 7 MHz and 600 MHz bands.

The community television broadcasting licences in Melbourne, Perth and Adelaide we're migrated to the new national community TV service from Australian Community Television Alliance. New digital channel number 41 in remote Central and Eastern Australia as well as remote Western Australia to have a digital terrestrial free-to-air licences of Indigenous Community Television (ICTV) via satellite feeds was pending.

The national, commercial and community television networks will deliver the digital TV channels is transmitted via satellite feeds under the multiplexes of 7 MHz spectrum for Broadcasting Services Act 1992.

There are three 7 MHz multiplexes shared between five broadcasters across the new licences of commercial television broadcasting services, all digital multi-channels of Seven, Nine and 10 networks can extends into regional and remote areas across the channel numbers we're increased.

Michael Sukkar is suggested that the new licences of television broadcasting services has an interest in an allocation at 600 MHz band, but is still committed to get radio and TV broadcasting services in digital spectrum.

This will be in current analogue radio, digital radio and digital TV formats until government legislation on implementation of digital radio and TV broadcasting services within the metropolitan, regional and remote areas of Australia is finalised.

We provided the student media has all the researched topics covering radio and TV as part of the study areas in schools, universities, TAFEs and disability services.

Our media organisations from Australia to include radio, free-to-air television, subscription television, satellite television and internet television will have a costs of multi-million dollars in this reinvestment to fund a roll-out of digital radio, digital television and pay television services.

The ABC funding provided increase funding of our services include radio, television, online, audio streaming, video streaming, mobile apps, commercial (publishing, licensing, content sales, distribution, music, events, studios and media production resources), international development, international radio, international television, news and current affairs and sport.

The SBS funding also provided increase funding of our services include radio, television, online, audio streaming, video streaming, mobile apps, distribution, news and current affairs, sport and language services.

Imparja Television in remote areas is the network purchases programming from the Nine Network channels (Channel Nine, 9Gem, 9Go, 9Life, 9Rush) and locally produces Indigenous programs to promote Aboriginal culture and values.

In regional areas, the commercial TV stations in regional Victoria with these networks are Prime, Southern Cross Austereo and WIN was partnered with Seven, 10 and Nine respectively, also the commercial TV stations in regional South Australia with these networks are WIN (Mt. Gambier, Riverland) and Southern Cross Austereo (Spencer Gulf, Broken Hill) was also partnered with Seven, Nine and 10 in the monopoly areas respectively.

Foxtel provided subscription cable and satellite channels with their subscription fees were covering the cost of the pay TV service in metropolitan and regional areas.

Channel 31 is a community TV broadcaster that services the Melbourne and Geelong areas to provided the range of community TV programming from Melbourne and interstate Australia, which was broadcasting on-air for over 25 years in three decades.

Community Radio broadcasters to server a community of interest (e.g. ethnic and multicultural, youth, fine music, specialist music, educational, religious, Indigenous, print handicapped, gay and lesbian, and general).

Our film and TV industry to deliver it's the new productions for film and TV content we're commissioned for 2022-23, as well as new documentaries, short films and new Australian and overseas co-production of new film and TV titles in development of the movie and TV show content.

Explore Student media to provided activities for student work in all aspects of radio, free-to-air television, subscription television, satellite television and internet television, as well as radio drama and the industry of television productions.

Young people aged 12-26 to provided Counselling and individual support, health professionals, peer support and programs, youth services, support at school and recreation days for Canteen.

Various local festivals and events for gay and lesbian community across Australia, including Midsumma Festival in Melbourne and Perth Pride in Perth across the year.

Some of your favourites for youth and LGBTQIA+ communities to include Access (carers, aged care, disability services), Aged Care, Charity, Community Health, Education and Research, Faith and Spirituality, Festivals and Events, General Health Services Providers, Government, Carers, Transport, Telecommunications, Hospitality and Tourism, Mental Health services, Environment, Queer Networks and Resources, Queer Social Groups, Retail, Sports, Wedding Services and many more groups, organisations and businesses who have support and serve our communities all year round.

Music content provided international DJ's to keep on dance floor at the stage in festivals and events, some of international music artists have travelled to Australia for concert tours and music festivals including Lady Gaga, Britney Spears, Kylie Minogue, Katy Perry, Rihanna, Kesha, Taylor Swift, Usher, BTS, Little Mix, Jonas Brothers, Ed Sheeran, Bruce Springsteen, Rita Ora, Mabel, Dua Lipa, Coldplay, Guns n' Roses, Muse, Green Day, Foo Fighters, Ariana Grande, Maroon 5, DJ Khaled, Dolly Parton and many more, the concert tours and music festivals will apart from international music artists, but will also see opening acts to feature Australian music artists such as Isaiah Firebrace, Dami Im, Zoe Badwi, 5 Seconds of Summer, Jessica Mauboy, Daryl Braithwaite, Human Nature, Grinspoon, Delta Goodrem, Hilltop Hoods, John Farnham, Samantha Jade, Amy Shark, Pete Murray and many more.

The Gay and Lesbian ski week provided group activities, delicious dinners, lessons and on-mountain accommodation throughout Victoria, various cruise lines is sailing the ships will contain restaurants, entertainment and accommodation onboard from the world, and various domestic and overseas airlines is providing cabins to contain Economy seats, food, beverages and In-flight entertainment who have departed and arrived in flights at the airports.

The tourism for Indigenous, people with a disability, youth, gay and lesbian, and seniors to have a range of holiday destinations from Australia (domestic) and overseas (international), travellers can receive Australian and international tours, accommodation venues, day trip with snow and ski, travel services, restaurants, cafes and airports, but the Gay and Lesbian Tourism Australia provided gay and lesbian travellers.

An retail destination for both various shopping centres and various homemaker centres to provided categories including clothing, accessories, baby stores, books, newsagents, cafes, restaurants, movie theatres, entertainment, electrical, appliances, video games, health and wellbeing services, music record stores, home video stores, toy stores, travel products, variety stores and many more, as well as personal services.

Finally, additional cost of \$10 million dollars over next 6-8 years to provided it's funding the community services, medical care, Religious services, sport, exercise, travel agents, residential aged care facilities, disability services, accommodation venues, hospitals, schools, universities, TAFEs, colleges, childcare, kindergarten, leisure centres, shopping, retail, personal services, attractions and more from across all states and territories.

In the conclusion: This submission promotes Federal Government measures to provided your favourite things such as radio, television, NDIS and disability support, sister cities, arts, entertainment, National Broadband Network, education, sport, digital broadcasting, media, digital technology, solar energy, accommodation and more that was relying on local communities from Australia. But they'll continued to our domestic and international audiences, the Federal Government investment is working with the state and territory governments and local councils will support your favourite things and diverse communities that rely on their activities and services.

Thank you for taking the time to submit our views to the 2022 Pre-Budget submission process.

Kind regards,

Brendon Agpasa

28 January 2022

The Hon Paul Fletcher MP

PO Box 6022

House of Representatives

Parliament House

Canberra ACT 2600

BRENDON AGPASA – PAUL FLETCHER’S 2022-23 PRE-BUDGET SUBMISSION

Dear Minister Fletcher,

We have exciting for the 2022-23 Budget to support digital radio, digital TV and pay TV rollouts in the federal funding to help funds for federal budget’s multi-year deal, learn about the future of digital radio and TV rollout were amendments to the Broadcasting Services Act 1992.

Brendon Agpasa welcomes the opportunity to contribute to the discussions and development of the 2022-23 federal budget, in partnership with Minister of Communications, Paul Fletcher MP.

The Government’s commitment to digital radio and TV broadcasting, it seems timely to make a permanent commitment to digital radio and TV by completion of making it ongoing success from radio wave spectrum to a new rules for a new media landscape and it’s yours to show your support media diversity.

But radio and TV broadcasters is extending it’s broadcasting reach of digital radio and TV rollouts to new and emerging local communities, and wants to seeking feedback on the financial year of Budget.

The ACMA, ABC, SBS, commercial radio, community, narrowcast radio, narrowband radio and Digital Radio Mondiale project office are committed to working with Government to create a more certain funding environment in order to fund it’s extending DAB+ and Digital Radio Mondiale rollout.

The ACMA, Freeview, VAST, ABC, SBS, Seven Network, Nine Network, Network 10, regional affiliates of commercial TV networks, community TV and open narrowcast TV are also committed to working with Government to create a more certain funding environment in order to fund it’s completion of transition to digital TV rollout for over many years.

About digital radio and TV through Department of Infrastructure, Transport, Regional Development and Communications

Digital Radio services have commenced in some parts of Australia, where they operate alongside existing analogue AM and FM radio services. While digital radio technology offers higher audio quality and more services, it does not always achieve the same coverage as AM radio services. Unlike television, there are no plans to switchover to digital-only radio.

Australia has achieved a historic switchover from analog to digital-only free-to-air TV transmissions. Everyone can now enjoy high quality television services anywhere in Australia.

Pay TV services are available to subscribers on payment of subscription fees. These services are funded by subscriptions primarily and limited advertising revenue.

Subscription broadcasting (pay TV) services provide programs of general appeal that are subscribed to main retail pay TV service provider, as well as smaller pay TV operators and these operators deliver subscription broadcasting and bundled services to niche and regional markets in Australia.

The content of pay TV programming and channels from Australia and overseas in partnership with Australian Subscription Television and Radio Association (ASTRA), Other subscription services can include those made available through Internet Protocol Television (IPTV) services that are provided with some internet services including channel packages provided by Foxtel and content packages offered by providers such as Fetch TV, and Subscription Video-on-Demand (SVOD) services offered directly over the internet, such as Stan and Presto.

A long-term funding certainty combined with greater support and certainty needed for digital radio and TV broadcasting in Australia.

Budget funding for digital radio and TV broadcasting for more than 100 per cent of being overall revenue but it is vital in supporting development of the digital future.

This was fan of Australian radio and TV had more exciting well, in preparation for the implementation of digital radio and TV rollout will be undertaking essential upgrade works on the installation of digital radio and TV transmission antennas and satellite feeds towards the start with it's middle of 2022 and beyond.

It has been planning to create and migrate to digital radio and TV rollout, once the expanding of convert an analogue (AM/FM) radio services to accept the adopt DRM signals permanently across metropolitan, regional, rural and remote areas of all capital cities and Australian country regions.

A portion of funding designated for digital radio and TV rollout, as well as funding allocated for the Australian media industry and enhance the range and quality of services and content in proposed media reforms, and it's supporting media diversity in Australia to be worked with Senate Standing Committees on Environment and Communications would include the state of local, metropolitan, regional, rural and remote media outlets in Australia.

In its response, the Government noted its outlines the digital radio, digital TV and pay TV rollouts, and slated its support for media diversity and recognition of the valuable service that digital broadcasting brings to groups in the community but we cannot specifically served by commercial, community, subscription or national broadcasters, and its contribution to the diversity of the new media landscape.

Digital radio rollout

Digital radio uses the DAB+ standard and is available in all capital cities (Sydney, Canberra, Brisbane, Melbourne, Adelaide, Hobart, Darwin, Perth) and regional centres such as Mandurah, Gold Coast and more in regional Australia uses the AAC+ codec provided with upgraded DAB+ standard.

The ABC, SBS, commercial radio stations, and community radio stations in each market provide many of their services and a few digital-only services on the digital platform.

Despite the ABC and SBS services extends into regional Australia on a separate multiplex (both on 9C, 206.352 MHz) providing the same services as in 8 capital cities, the Digital Radio Mondiale was exported to Australia, becoming the first digital radio technology in metropolitan, regional and remote Australia to have DRM simulcasts AM and FM services, when AM and FM services accept the DAB+ and DRM signals.

According to this, the content licences of 63 ABC Radio stations, 7 SBS Radio stations, 261 commercial radio stations, 450+ community radio services, 2610+ narrowcast radio services and 80+ narrowband radio services would be increased as expands to be simulcasts in digital formats on both DAB+ and Digital Radio Mondiale services across all the licences in most regions.

The Federal Government in funding to help commercial, community, narrowcast and narrowband broadcasters with the costs of beginning digital broadcasts.

Last decade in 2019, over 3.8 million listeners tune in to DAB+ radio in Australia.

ACMA has adopted a set of principles for planning the rollout of digital radio services to regional areas, it will be enable them to match the extending coverage of all existing analogue radio services expands to digital radio in all areas over the next few years where was the complex technical planning process of digital spectrum.

Recently in 2019, Vision Australia Radio provides a vital community service for Australians who are blind, low vision or have a print disability to support digital radio rollout but thanks to Peter Khalil MP to keep community radio service on air, plus RPH Australia stations can continue to deliver its essential services.

The DRM digital standard can carry up to 3 digital radio programs along with data services on a single radio frequency, once the AM and FM transmitters can easily be converted to Digital Radio Mondiale in future.

In markets where ABC carries all four national networks (Classic, News on Radio, RN, Triple J) plus Local Radio, that gives them potentially 15 digital stations. Currently the ABC broadcasts six—Country, Sport (formerly Grandstand), Jazz, Kids Listen, Double J and Triple J Unearthed—plus the five simulcasts.

If DRM was adopted, increasing the rollout of NewsRadio, metropolitan and regional Local Radio stations and expanding digital radio could be rolled into one for the ABC.

DRM from Broadcaster to Listener had digitising is much more than new gear or even more content, everything from evaluation, planning, implementation and communication to all the radio listening.

Recently, an estimated 1,000,000+ people at all ages listen to your favourite Australian radio stations at some time in a year, based on a radio survey #8 is Sydney's 2GB, Melbourne's 3AW, Brisbane's Nova 106.9, Adelaide's Mix 102.3, Perth's Nova 93.7, Hit Network and Triple M which ranks number 1 in December 2020 from last 2 years.

In addition, our AM and FM transmitters had expanded to DAB+ and DRM transmitter licences so we would be very pleased to have a new digital transmitters of analogue radio services. In 2021 from last year, regional QLD's Gold Coast is expanding to DAB+ had a 10th market, to include simulcast and extra stations across the region.

Over 4.0 million DAB+ radio listeners in 2020, we have 51.8% of households with access to DAB+ radio, plus 10 hours and 6 minutes of average time spent listening to DAB+ each week.

Over 6.2 million DAB+ enabled devices sold included 2.8 million receivers and 3.4 million vehicles in cumulative DAB+ sales.

Over 3.4 million vehicles sold with DAB+ had 71.8% new vehicles sold with DAB+ and then up to 52 vehicle brands to adopt DAB+.

There's visualise the radio stations on DAB+ multiplexes in Sydney to get ABC and SBS on block 9C, SCA, Community, BOG, SEN, Sky Sports Radio and Niche Radio on block 9A and ARN, Nova, Radio Maria, Nine Radio, Community and SCA on block 9B in 2020 for last 2 years, once the ACMA to make a digital radio channel plan for the Gold Coast area can be completed as rolled out in the future from 2021 onward.

The narrowband broadcast stations (VHF NAS) across the Sydney, Canberra, Brisbane, Melbourne, Hobart, Darwin, Adelaide and Perth areas could be expands to adopt the DRM and DAB+ signals, to receive over 20+ stations including 2VNR (Vietnamese), 2AC Mandarin, 2AC Cantonese and more.

Digital Radio services working alongside radio broadcasters is hoping to extend it's broadcasting reach to new and emerging communities and wants to see an long-delayed expansion of extending digital radio rollout to be completed by a multi-year deal.

It has been a licences for a new DRM+ trial on 95.9 FM is broadcasting from Mount Baranduda in south of Albury-Wodonga would transmits the ABC is carrying the additional services in DRM+ mode, ABC Radio is trialling DRM30 transmissions to carrying Radio National frequencies is 747 AM and 756 AM is being broadcasting from Wangaratta.

It has been "placed an embargo on frequency bands potentially suitable for use by broadcasting services using Digital Radio Mondiale until spectrum planning can be completed" "those bands being "5,950–6,200; 7,100–7,300; 9,500–9,900; 11,650–12,050; 13,600–13,800; 15,100–15,600; 17,550–17,900; 21,450– 21,850 and 25,670–26,100 kHz.

The Sub-metropolitan licences of community radio stations in all capital cities were expands to both small scale DAB+ multiplex services and Digital Radio Mondiale's DRM+ services to make room for all of regional and remote community radio stations had expands to DAB+ and Digital Radio Mondiale.

The commercial radio services in Murwillumbah, Lismore, Moree, Inverell, Grafton, Coffs Harbour, Armidale, Gunnedah, Tamworth, Kempsey, Broken Hill, Taree, Dubbo, Mudgee, Newcastle, Parkes, Orange, Bathurst, Lithgow, Gosford, Katoomba, Campbelltown, Griffith, Young (NSW), Goulburn, Wollongong, Nowra, Wagga Wagga, Deniliquin, Albury, Cooma, Bega (NSW), Muswellbrook, Cairns, Atherton, Innisfail, Townsville, Charters Towers, Mount Isa, Mackay, Longreach, Emerald, Rockhampton, Bundaberg, Charleville, Roma, Maryborough (QLD), Gympie, Nambour, Kingaroy, Toowoomba, Warwick, Ipswich, Remote QLD & NSW, Gold Coast, Mildura, Swan Hill, Wangaratta, Shepparton, Bendigo, Horsham, Ballarat, Hamilton, Warrnambool, Colac, Geelong, Warragul, Sale (VIC), Maryborough (VIC), Port Lincoln, Spencer Gulf North (SA), Riverland, Murray Bridge, Mount Gambier, Remote SA, Launceston, Burnie (TAS), Devonport, Scottsdale, Queenstown (TAS), Alice Springs, Remote NT, Port Hedland, Karratha, Carnarvon, Remote WA, Geraldton, Kalgoorlie, Narrogin, Merredin, Northam, Bunbury (WA), Katanning, Bridgetown, Albany, Esperance and Broome was reinvested in extending DAB+ and Digital Radio Mondiale rollout across regional centres as priority markets within next few years, but the Mandurah commercial radio services is now on Digital Radio in regional WA, as well as DAB+ received Gold Coast commercial stations in regional QLD.

Thousands of listeners right across Australia are set to enjoy a small-scale revolution for local radio to provided an innovative new technology called small-scale DAB+, ACMA's digital radio spectrum delivers small-scale DAB+ provides a low-cost way for local community, LPON, HPON and MF-NAS services to take to the digital airwaves. Some of the hundreds and thousands of analogue radio stations set to launch on both small-scale DAB+ and DRM+ are existing analogue community, narrowcast and narrowband radio services.

The VAST radio services are delivered through Direct to Home implementations to launch of new DAB+ satellite services which provides the range of radio channels via satellite feeds in remote areas, as well as terrestrial rebroadcast of their analogue radio services will be switch on digital radio.

While the MF NAS licences of over 80+ narrowband AM radio stations across the regions will be completed in the new DAB+ and DRM services across locally and nationally, including a simulcasts of Vision Christian Radio, 2ME Radio Arabic, Rete Italia, Peter Tate's Station X, Radio Great Southern WA and more.

The national, commercial and community radio network utilises a large number of VAST satellite feeds were connected to high-power transmitters of DAB+ to provide infill coverage in all capital cities and regional centres.

DRM supports both multi- and single-frequency network operations which enables a broadcasters operating on Digital Radio platforms to show simulcasting of their AM and FM frequencies.

However, these services of VAST radio channels are primarily Direct to Home and require a dish antenna and dedicated receiver to go DAB+ in remote and rural areas.

DAB+ transmitters through use the various transmitters in each capital city are able to carry all existing metro wide AM & FM programs, it carries the existing ABC & SBS AM and FM programs all with additional unique to digital programs and the new DAB+ transmitters in regional areas in program distribution costs.

SBS delivers its regional services via community funded retransmissions is going digital, when the ABC's domestic shortwave radio services in NT, international audiences of ABC Radio Australia shortwave, VLW (WA), and VLM (QLD) and VLQ (QLD) will be expanded to DRM longwave broadcasting digitally for HF shower transmissions via satellite and old shortwave feeds. In regional, rural and remote areas there are new satellite fed transmitters of digital radio which only cover the local communities and visitors to enjoy it.

For those without radio coverage and travellers the ABC, SBS, radio for the print handicap, aboriginal community and religious radio programs are added to the new DAB+ radio signals. To receive these signals a stationary dish accurately pointed at the satellite were connected to satellite fed DAB+ services.

Which is diverse of community radio services providing local, community, niche and Indigenous broadcasting services mainly via DAB+ and DRM to metropolitan, regional and remote audiences.

Which was approximately niche services mainly horse racing information, tourist information radio, Italian language radio, Greek language radio and Christian radio would turn over to go digital radio.

A snapshot of free to air radio services as of 2019/2020 from over the last decade, including National had over 715 transmitter licences, Commercial (BSB) had over 261 content licences through 600 transmitter licences, Community had 468 content licences through 549 transmitter licences, Narrowcasting had class licences in over 2610 transmitter licences and Retransmission is Exempt of over 830 transmitter licences.

The on-channel repeaters of DAB+ multiplex services in all capital cities could be required on new radio translator sites across the regions.

At least, the ABC remote local radio and remote WA licences (ex-Red FM: Hit and ex-Spirit: MMM and SEN) can be licence for coverage will cover remote WA.

The broadcast capacity of VAST transmission costs could be extended to remote area radio stations, but is HF DRM commercial station licence areas should be encrypted.

ABC to contract BAI Communications to restart at least one of its DRM capable transmitters, which was relaying their AM and FM transmitters of ABC stations (RN, capital city stations, regional stations, ABC-FM, PNN, JJJ-FM), new digital signals of ABC Radio Australia across the Asia-Pacific region to DRM for HF broadcast service of old shortwave radio transmissions via satellite across Brandon in regional Queensland, and provide a digital signals from their studios of ABC in over 8 capital cities and 45 regional locations.

The ACMA receives an lot of activities to help support radio including improving the coverage of radio broadcasting services where spectrum is readily available, making digital radio channels for regional DAB+ rollout and supporting trials of new broadcasting technology in Future Delivery of radio services.

DRM transmitters can also be installed to over 168 transmission channels, in addition, ABC/SBS to carry the additional programs, many DRM+ signals which will allow of the program from capital cities on DAB+ to regional listeners.

Tropical HF band DRM will use National coverage of ABC News Radio and ABC Sport (formerly ABC Grandstand), remote area commercial broadcasting and ABC state remote program particularly in WA, NT, SA, Qld and NSW.

For example, the Rolleston Mine in Central QLD to make way for new DAB+ retransmissions were licenced, which shows the rebroadcasts of Triple J, 4HI Emerald, Hit FM Emerald, Triple M Brisbane and Triple M Rockhampton was relaying to Digital Radio retransmission services in each region.

Vision Christian Radio expands to digital radio would be able to receive a both simulcasts of AM and FM frequencies and digital-only main station in over 730+ locations, such as Brisbane, Sydney, Canberra, Melbourne, Hobart, Adelaide, Darwin, Perth, Geelong, Sunshine Coast, Gold Coast, Newcastle, Wollongong, Townsville, Central Coast, Gladstone, Gympie, Mount Isa, Taree, Tamworth, Wagga Wagga, Port Macquarie, Orange, Dubbo, Albury-Wodonga, Ballarat, Bendigo, Gippsland & Sale, Launceston, Mount Gambier, Riverland, Coffs Harbour, Grafton, Geraldton, Victor Harbor, Esperance and other regional centres, and Vision180 Radio expands to digital radio as extends into all of metropolitan, regional and remote areas.

More Sydney tunnels to provide new DAB+ radio retransmission in Northconnex, Westconnex - M5 extension and Westconnex - M4-M5 link had been completed, as well as new DAB+ retransmission extends into a retrofit existing tunnels in Sydney, Melbourne, Brisbane, Adelaide and Perth.

Rete Italia frequencies carried Niche Radio Network is now on Digital Radio in Melbourne, Sydney, Brisbane, Canberra, Adelaide, Darwin, Perth, Hobart and 22 regional centres, we suggested that the satellite feeds of the station will be accepted this signal to DAB+ and DRM platforms including Niche Radio 1 broadcasts Italian (Rete Italia) and Vietnamese (Hon Viet Radio) content, Niche Radio 2 broadcasts Arabic (2ME Radio Arabic) content, Niche Radio 3 broadcasts Cantonese and Mandarin (2AC National Australian Chinese Radio) content and Niche Radio 4 broadcasts Hindi (Indian Link Radio) content.

Internet radio station Hepburn Community Radio is going digital to expand the Digital Radio Mondiale and DAB+ multiplex services which was broadcast across the region of Hepburn Shire area in Victoria.

It will follow up to full-time and temporary Community Radio broadcasting licences were renewed at ACMA over the next few years, the Government to allow additional funding for local community radio broadcasters in sub-metropolitan, regional and remote areas will be extending digital radio rollout up to additional cost of over \$1.9 million dollars in total.

We have the direct relays of VOA Music Mix will be heard via satellite feed of Voice of America's VOA1 to listeners through Melbourne's WYN FM 88.9 Werribee will be reinvested in extended digital radio rollout for Victorian listeners.

In 2020 from last 2 years, DAB+ stations to reach a weekly audience of 2.35 million people, with AM and FM stations simulcasting on DAB+ reached over 4 million listeners.

For all ages in our audiences, the weekly listeners of 5.3 million in 1 in 4 Australians tune into over 450+ community radio services across Australia throughout nationally.

We need a range of groups to switch on Digital Radio's community services includes Local communities, Indigenous Australians, Ethnic communities, Educational services, Religious communities, People with a print disability, Music, arts and culture, Youth and seniors and LGBTIQ communities.

Examples of Narrowcast services which includes Racing & Sports, Tourist info/Visitor Information, Youth, Indigenous, Ethnic, Religious, Niche Music and Special Events were licenced to broadcast LPON and HPON services.

The major broadcasters of narrowband radio services had included, we have Ethnic communities (Italian, Arabic, Greek, Hindi, Lebanese, Chinese), Christian programming through religious communities, country music, Classic gold

music, low power high school outlets and some commercial station relays were licenced to broadcast MF-NAS services, excludes VHF NAS licences.

A satellite footprint to use over 60 programs in 100 satellite radio channels across rural and remote areas will deliver the VAST radio services will be expands to DAB+ platform.

However some community funded antenna towers will be shared between ABC Local Radio and RN, but the HF DRM transmitters were installed in Kulgera NT, Newman WA and Liena Tas to receive a direct relays of RN, ABC Local Radio, ABC Classic (ABC-FM), ABC News (PNN), Triple J FM (JJJ), SBS FM and SBS AM (2EA, 3EA) were delivered to shared between satellite feeds on downlinks, studio to transmitter links and connected to longwave frequencies.

We also use to transmit an alternative frequency table using AMSS for AM broadcasters and RDS for FM broadcasters to go digital transmitters, an broadcasters are to pay ACMA licence fees for their digital broadcasts in addition to the licence fees for their analog licence to take on DAB+ and DRM formats.

All broadcasters who broadcast on digital (DAB+, DRM) which simulcasts their analog transmissions using AMSS on AM and RDS on FM in all the regions.

The old shortwave transmitters in Alice Springs, Katherine and Tennant Creek are ready for longwave on DRM capable is nearly there, the ABC to cover the NT and parts of the Kimberley in WA and North West QLD to receive digital radio. ABC Sport and ABC News which shows rolling formats of current affairs, news and sport content is also heard during this time on both ABC Sport (Grandstand) DAB+ and ABC News on Radio.

HF DRM to cover the whole of Australia for national coverage of ABC/SBS could transmit all of its national programs in stereo and mono, and for commercial and ABC Local radio in the remote areas of Australia such as Mt Isa, Longreach, Broken Hill, Port Augusta, Pilbara and Kimberley.

Digital Radio Mondiale which shows DRM from broadcaster to listener, the transmitters using shortwave, medium wave (AM) and FM services in around the world, DRM can offer full national and international coverage to Australia's public broadcaster, DRM can offer services to smaller community stations for the needs of local listeners in small cities and villages, DRM allows the broadcaster to transmit up to three or more different radio broadcasts from one of single transmitter, so you can have ABC and SBS radio stations are found on DRM.

This means national and local radio programmes and emergency notifications can now reach everyone, A second additional option is to establish of upgrade the existing medium wave transmitters just for regional coverage. Each of these transmitters can carry up to 3 broadcasts.

An AM and FM transmitters switched over to DRM provides the same coverage, but using up to 50% less power than analogue, that's a lot of energy savings. A further option is to digitise the FM radio stations in Australia.

And in other parts of the country, the AM and FM stations of ABC Local, RN, ABC-FM, PNN, JJJ-FM, SBS, Commercial, Community, LPON, HPON and MF-NAS, could also benefits from both DAB+ and DRM.

More content, in more languages on flexible DRM for all. All these three digitisation scenarios can be scheduled and combined in order to reach all of many people from Australia.

You can see the extra benefits of DRM, DRM radios also have a screen and DRM can provide data along with the audio broadcasts. Data means text and pictures from live sports results, news headlines, emergency warnings in case of disasters, music playlist (for example there's youth music from Triple J and Double J) and more, DRM provides an opportunity for digital radio station managers to use this data channel to create a new revenue stream.

New DRM local, regional and national broadcasting allows the extending reach of Australian communities as they have an analog broadcasts of radio stations in AM and FM frequencies across the region.

You can now benefit from the reinvention of radio and enjoy: Excellent sound quality for small or large area broadcasting with countrywide coverage.

It has been successful rolling out digital radio to enjoy superior DRM for all, a regulatory framework is required. The government needs to promote digitisation publicly and actively. Let broadcasters know when new digital frequency licences will be available and when the digital services will be launched.

Regulators, broadcasters, receivers, manufacturers and retailers need to work together from the start of digital radio project.

Remember, digital broadcasts cannot be heard using analogue receivers, Nearer to the digital radio launch date there needs to be a public awareness campaign, especially in all regions of metropolitan, regional and remote areas.

Well the government could consider subsidising new receivers to get new Digital Radio Mondiale services so that their prices are as low and high as possible. The Australian government could also request the digital radio rollout and receive grants and funding from domestic and international organisations.

In addition to SEN stations in Melbourne (1116 SEN, 1593 SEN Track, SEN NSW) and Sydney (1170 SEN, 2CH DAB+, SEN VIC, 1539 SENTrack) is now on Digital Radio, SEN owned stations expands to DAB+ and Digital Radio Mondiale nationally including simulcasts of SEN Bendigo, SEN Ballarat, SEN Geelong, 1629 SEN SA Adelaide, SENTrack 657 Perth, SEN WA (relay of Melbourne station), SEN QLD (relay of Sydney and Melbourne stations), Hobart 1629 (SEN Tasmania is a relay of 1116 SEN), Hobart 1611 (relay of SENTrack Victoria), SEN Track Northern Tasmania (Launceston 1611AM, Devonport 1611AM), 1620 SEN Gold Coast, SENTrack (Brisbane 1053, Darling Downs 91.5 (Toowoomba), Atherton 99.1, Ingham 96.9, Kingaroy 96.3), SENTrack Mildura 89.1, SENTrack Latrobe Valley 91.9, SEN Mount Gambier 1629, SENTrack Adelaide 1620, SEN Griffith 90.3 (relay from Sydney via SENTrack), SENTrack NSW (Wollongong 1575, Gosford 801), SEN NT, Darwin 1611 (relay of 1116 SEN, replacing the current broadcast of VAST channel 800 loop), SENTrack Darwin 90.7, SEN Peel Mandurah and SEN Spirit Bunbury 621 is yet to be completion of the national radio footprint.

ABC News on Radio broadcasts live feeds of major news events, press conferences and Parliament which heard will be first on Digital Radio simulcasts AM and FM frequencies in Australia and on relaying into the Pacific and Asia on ABC Radio Australia's satellite fed FM retransmissions (news and sport only on FM) and satellite service.

Southern Cross Austereo's Perth stations is Hit 92.9 will be rebrand to 92.9 Triple M, becoming the 49th station, sister station Mix 94.5 will join the Hit Network brand from last 2 years, the stations had music content to include young adult contemporary hit music and mainstream rock formats as well the network's program affiliations of Hit Network and Triple M LocalWorks across metro and regional WA, while Canberra FM Radio took a partnership with Southern Cross Austereo to create the 50th station is new digital radio station in Canberra was Triple M Canberra Digital.

Under the federal legislation, these are the analogue (AM/FM) radio stations able to convert to digital radio (DAB+, Digital Radio Mondiale) as part of another initial roll-out in extended multi-year deal, which includes the range of commercial stations in regional and remote areas, community stations in sub-metropolitan, regional and remote areas, ABC & SBS stations - including Radio National, Local Radio's 45 regional stations, Classic, News on Radio, Triple J, SBS Radio, LPON stations, HPON stations and MF-NAS stations, these more stations will be able to offer an entirely new listening experience, including the capacity for a simulcasts of AM and FM stations, slideshows, Electronic Program Guides, extra detail-on-demand for advertised products, and much more. Each station will be choosing and designing features to best suit their respective audiences. Christmas pop-up stations (Elf Radio, LightChristmas Melbourne, Christmas Hope Sydney) is received for DAB+ across each capital city, which runs throughout the summer season in December each year across annually.

Over 103 commercial licence areas will continue to go DAB+ and DRM, but increase population coverage up to 85%, throughout multi-year timeframe in regional deployments.

When the ACMA issued foundation category 2 digital radio multiplex transmitter licences for commercial, community, and national radio services in all capital cities and regional centres could commence is being ready to go in 2022 onwards.

You need to re-scan your digital radio in order to receive your favourite radio stations were increased but we look up AM, FM and digital radio stations will be streamed live on the web and mobile apps.

The complete range of equipment and services of DAB+ and DRM transmission systems, includes new transmitters, antenna systems, digital multiplex, encoding equipment, radio satellite distribution networks. digital microwaves links (STLs) and implementation of simulcasting AM and FM frequencies are used in new digital formats. An data services was completed via digital radio rollout is technical systems.

If there is designed and implemented systems to allow transmission of services on the VAST platform to their new DAB+ satellite platform, these channels feeding over 100 radio channels allow a simple and cost effective distribution system via the OPTUS satellites. An expansion of their Satellite Radio Distribution Networks to meet the existing and

future demands of their Radio networks across Australia, the broadcast capacity of digital radio services will be delivered to allow for additional expansion into DAB+ stations, DRM stations, longwave frequencies and DAB+ satellite platform to more efficient use of the satellites.

The new digital radio services of community-based relay transmitters will rebroadcast Radio National, ABC Local Radio, ABC Classic FM, ABC NewsRadio, Triple J, SBS Radio and DAB+ only stations in most areas which would be completed as delivered via satellite fed translators are sent to new digital spectrum.

Southern Cross Austereo will roll out the rest of it's expanded to DAB+ and Digital Radio Mondiale in regional Australia to provided simulcasts of Hit Network and Triple M network stations throughout regional NSW, regional QLD, regional VIC, south-east SA and regional and remote WA, as well as Southern Cross Austereo's digital-only radio stations expands to regional areas.

LiSTNR's *Australia Today* program will be heard regionally on Triple M stations (Coffs Harbour, Griffith, Wagga Wagga, Orange, Port Macquarie, Dubbo, Toowoomba, Maryborough) expands to digital radio in regional Australia.

Vision Australia Radio stations in regional Victoria is also taking live coverage of Australian Open Tennis in AO Radio simulcasts via Vision Australia IRIS digital radio.

Commercial DAB+ stations is recently launched in Gold Coast from last year to include Hot Tomato, KIX Country, new Classic Hits feed of Hobart's 7HO Classic Hits, Hit 90.9, Buddha Hits, Easy 80s Hits, Triple M 92.5, MMM Classic Rock and MMM Country.

Grant Broadcasters will deliver it's new localised Classic Hits station in regional Australia including Geelong, Goulburn, Launceston, Ipswich, Sunshine Coast, Gold Coast, Mildura and more, it will taking the feed of 7HO Classic Hits relayed from Hobart respectively.

Nova Entertainment will also deliver it's DAB+ stations such as Nova 90s, Nova 00s, Nova 10s, Nova Throwbacks, Smooth 80s and Smooth 90s will be increased as expanded to 5 capital cities (Sydney, Brisbane, Melbourne, Adelaide, Perth), as well as Gosford in Central Coast.

The new DAB+ translators will be needed for transmit power from one of many main sites to get coverage of ABC Riverina at Griffith and MIA in regional NSW for example.

DAB+ capital city coverage was extended coverage from Sydney to Newcastle and Wollongong, Melbourne to Geelong and Brisbane to Gold Coast and Sunshine Coast, as well as Adelaide to Adelaide Hills, with the costs of digital transmission equipment for many radio listeners and broadcasters.

Community radio station in Melbourne is 88.9 WYN FM Werribee continued it's satellite, shortwave and online feeds of Voice of America to provide audio streams of few stations such as VOA foreign language transmissions with over 47 languages, VOA1 (music mix), VOA Global English, VOA Africa, and VOA Newscasts, this was relaying to listeners from across Victoria will have receive Voice of America radio stations via satellite feeds.

Proposed Merimbula community radio service to have local station 97.5 Sapphire FM in licence area was expanded to digital radio in Bega NSW, while ACMA may allocate a new digital community radio multiplex services in sub-metropolitan Australia, regional and remote Australia and Australian island territories.

Last year, the DAB+ digital radio quality and reducing of broadcasting costs to include ABC Classic has been increased to 120 kbit/s, ABC Jazz has also been increased to 88 kbit/s, ABC Country, triple j and triple j Unearthed which are reduced to 72 kbit/s, ABC Kids Listen are reduced to 64 kbit/s, the ABC Local Radio for each capital city is still transmitted in 64 kbit/s which has changed to parametric stereo, ABC and SBS speech only programs 40 kbit/s is used, SBS Chill and SBS Pop Asia are still 72 kbit/s stereo, Commercial radio data rates in general for quantity of different programs compared to quality, Community broadcasters are mostly 48 or 64 kbit/s, Southern Cross Austereo has made all of their many programs 32 kbit/s using parametric stereo and the other national radio networks as well as 6IX Perth are 48 kbit/s stereo each.

SBS has amalgamated programming from SBS Radio 1 and SBS Radio 2 through the National Radio Network expanded to digital radio in regional and remote areas, excluding all capital cities.

Southern Cross Austereo's DAB+ only stations from Hit Network (Hit Buddha, Hit Urban, Hit Easy 80s, Hit Oldskool 90s, Hit Dance) and Triple M Network (MMM Classic Rock, MMM Soft Rock, MMM Country, MMM 90s, MMM Hard 'n'

Heavy) to be worked with LiSTNR's 50 music-based stations providing hit music, rock music, country music, Australian music, kids music, pop music, Australian music, easy chillout music and more, which will be simultaneously in audio streams on both online streaming and digital radio's pop-up stations across the country.

Segments of news and current affairs reports from radio news bulletins, radio current affairs programs (*AM, PM, The World Today, Correspondents Report*), Radio Australia News, rural news and news in Indigenous languages had been part of rolling news and current affairs bulletins is broadcast for domestic audiences on ABC News on Radio.

SBS Radio provided digital radio services would deliver it's specialist programming featuring languages from China, the Indian subcontinent, East Asia, Africa, Europe and the Middle East.

Digital Radio secondary services to create part time programming across full time channels, these include ABC's Parliamentary News Network, SBS's National Radio Network, emergency broadcasting services, and pop-up special broadcasts, when output is transmitted as a secondary services to ABC News on Radio, SBS Radio 1, SBS Radio 2 and other radio stations.

Specific proposals included:

- Expanded to increasing 63 ABC Radio stations, ABC's Parliamentary News Network, 7 SBS Radio stations and SBS's National Radio Network, plus ABC stations in Australian island territories.
- Expanded to increase 260 commercial radio stations, 450+ community radio services, 2610+ narrowcast radio services, and 80+ narrowband AM radio stations, plus various radio stations in Australian island territories.
- The additional launch of DAB+ satellite platform to offer audio streams of radio channels from Viewer Access Satellite TV, as well as additional radio services in remote and rural areas.
- An update to Digital Radio services provides a much easier way to develop its radio receivers were expanded including AM, FM, DAB+ terrestrial, DAB+ satellite, DRM30, HF DRM and DRM+ to make way for new digital radio broadcasting capabilities in country regions of metropolitan, regional, and remote Australia.
- Retransmission of analogue radio licences expands to digital radio.
- DAB+ only stations extends into regional and remote areas of Australia.

The benefits of listening to DAB+ radio and Digital Radio Mondiale including More station choice, Niche formats, on-screen graphics (e.g. slideshow, song and artist information, radio programs), Digital sound quality, free-to-air, News, sport and weather updates, Electronic Programme Guide (EPG), the emergency warning alerts, Journaline text information, DRM data services, DAB+ slideshow, DRM text services, Emergency Warning Functionality (EWF), No subscription required, and No data usage, data carriers of AMSS and RDS respectively through simulcasts of analogue AM and FM transmissions.

The new transmitter licences of Category 2 Digital Radio Multiplex services provided a few national, commercial, community, narrowcast and narrowband stations could be expanded to regional, metropolitan and remote Australia.

Digital Radio (DAB) Frequency Blocks are the frequency blocks being 8A, 8B, 8C, 8D, 9A, 9B, 9C and 9D will be available for allotment in each licence area to multiplexes carrying national, commercial and community services.

New DAB+ satellite gives access to a suite of radio channels in terrestrial digital radio 'black spots' across regional and remote areas, as well as new DAB+ satellite is extending coverage to travellers across Australia.

Southern Cross Austereo's digital-only stations (Buddha Hits, Oldskool 90s Hits, Easy 80s Hits, Urban Hits, Dance Hits, MMM Classic Rock, MMM Country, MMM Hard n Heavy, MMM Soft Rock, MMM 90s, Soundcloud Radio) expanded to regional areas of NSW, QLD, VIC, SA and WA, as well as regional Hit Network and Triple M LocalWorks stations also expands to simulcasts of analogue radio services via digital radio in regional Australia.

New DAB+ and Digital Radio Mondiale services in remote areas of commercial radio broadcasting to provided Flow FM expands to digital radio in regional and remote communities of South Australia, New South Wales, Victoria and the Northern Territory, as well as Rebel FM and The Breeze also expands to digital radio in regional and rural areas of Queensland and New South Wales and Red FM - now Hit Network (6RED, 6HED, 6FMS, 6GGG) and Spirit Radio Network - now Triple M and SEN (6KA, 6NW, 6SAT, 6BAY, 6EL) expands to digital radio in regional and remote areas of Western Australia, this was enable an extended coverage of local commercial radio services to be transmitted on digital radio terrestrially in regional, rural and remote communities of Australia for the first time in radio history, various student radio stations in Sydney, Canberra, Melbourne, Bathurst, Armidale and Adelaide (Adelaide University student

radio via Radio Adelaide programming) to have input signals (off-air, satellite, microwave links), transmission equipment and satellite equipment to FM and DAB+ digital radio transmitters for community broadcasters.

However, This will be in the current analogue radio format until government legislation on digital radio broadcasting within the metropolitan, regional and remote footprint area for extending coverage of all capital cities and country areas is finalised, listeners can continue to have Digital Radio services in your local markets.

For your continuing interest in digital radio broadcasting, the digital radio rollout across Australia, then we would be happy to assist you, enjoy the switch-on digital radio rollout in the future.

Analogue radio to digital radio conversions

WorldDAB and Digital Radio Mondiale is working with ACMA's approach to get digital radio switchover with its request analog (AM, FM) to digital radio conversions and infill transmitters to go with digital radio simulcasts an existing AM and FM services, excluding shortwave and VHF-NAS services.

Longwave was exported to Australia, where a range of various frequencies is used for Digital Radio Mondiale broadcasting in near future.

New DRM transmitters could carry Radio teleswitch, PSK data, and an antenna upgrade, but the Omnidirectional aerial was installed on the single frequency networks, maximum of radiation in the east, west, north, south and central directions and rolled out of upgraded masts in the AM transmitters of radio services to DRM test transmissions taking a full time of digital broadcasts.

In regional and remote Australia, which relays radio broadcasters will ran 24 hours a day, the various radio stations is yet to be plans for future of between longwave and DRM over next few years.

The shortwave radio services will be expanded to Longwave broadcasting, while ABC's outback radio services in NT and ABC Radio Australia was also expands to digital formats of Longwave broadcasting.

Longwave was also connected to HF DRM transmitters in most regions, DRM30 is planning to simulcast of their AM radio frequencies (531-1701) as well as stations will be operating a medium wave frequencies on new Digital Radio Mondiale services across your local markets including ABC Radio National, ABC Local Radio, ABC News Radio, CBAA's community stations, Crocmedia's SEN, Nine Entertainment Company's Macquarie Media (now Nine Radio), Super Radio Network, SCA's regional Triple M Local Works stations, Sky Sports Radio (2KY), Radio TAB (4TAB, 5TAB, 8TAB, 7TAB), TAB Radio WA (Racing Radio), RSN (Sport 927), Vision Australia Radio (RPH), Vision Christian Radio and many more.

Last 2 years, 2CH Classic Hits will be migrated from 1170 AM to DAB+ across Sydney in October 2020, as well as 3MP 1377 relaunched on 1377 AM and DAB+ in Melbourne from July 2020.

Your complete coverage of 50 kw - 100 kw AM (MW) transmitters will be able to receive the new DRM transmissions in regional, rural and remote areas were launched.

The FM bands in old analogue signals that allows DRM transmissions to carry multiple services of FM radio stations at higher quality in the same space.

Similarly, the new digital spectrum that allows the multiplex services of ABC Regional Radio, ABC National (ABC RN), ABC Classics (ABC-FM), JJJ-FM, along with SBS, BRACS, Community, Narrowcast and Narrowband could be used in the consideration process for DAB+ and DRM expansion.

The AM and FM transmitters of ABC, SBS, Commercial, Community, Retransmission, LPON, HPON and MF-NAS services will be completed in expansion of extending DRM and DAB+ platforms were rolled-out in the process of digital radio future.

But using the AM Signalling System (AMSS) and Radio Data System (RDS) were also connected to DAB+ and DRM platforms which simulcasts AM and FM transmitters in their regions.

DRM+ can use the frequencies vacated by analog TV's channels 0 – 2 creating 168 DRM+ channels, the ABC/SBS can transmit all the programs for metro areas in each regional area on a single transmitter per TV site, substituting the local radio for the region. Commercial stations have dual programs can transmit their signal from the FM site on a single DRM+ transmitter.

The ABC state program, Grandstand sport and News on radio along with encrypted commercial broadcasting should be available to the 470,000 remote Australians. A satellite fed transmitters of FM services will be jump over to digital radio which was served in extending coverage of remote, regional and rural areas were improved.

The extended coverage outside of all capital cities where listeners only have the ABC/SBS/Aboriginal/religious broadcasts to go DAB+ satellite services once the domestic High Frequency (Shortwave) ABC radio services to broadcast ABC Local Radio, CAAMA Radio and TEABBA Radio content are sent to the network (various radio transmitters, BRACS community radio, NIRS program feed, TEABBA studios Darwin, CAAMA studios Alice Springs, IMPARJA satellite uplinks, Optus satellite, ABC studios, NIRS at BIMA, microwave links, DAB+ multiplex transmitters, VAST satellite receivers) and receive capability of new HF DRM services.

Reach Beyond in Kununurra WA is broadcasts to Asia using HF AM to go digital in the near future, but it is still feeding programs of ABC Radio Australia to an Intelsat satellite for reception of new digital radio rollout to listeners in extending coverage to Asia, India, the Pacific and Middle East.

What will be viable options to supplement of digital radio over next few years: For ABC News on radio and Grandstand sport should be transmitted in a single high powered HF DRM to cover the whole of Australia from a single transmitter to allow the network of AM, FM and DAB+ transmitters, the ABC/SBS in regional Eastern Australia, SE SA and SW WA all programs should be broadcast in DRM+ on band 1 using existing TV transmitter towers, Community radio can choose between their own DRM on 26 MHz band + to combine community stations in the same area and feed a DRM+ transmitter. This can be in city and country areas. For those of same as satellite feeds in remote areas like ABC North West WA, ABC Alice Springs NT, ABC North & West SA, ABC Western QLD and even the ABC Western Plains NSW need to be transmitted in HF DRM. Frequencies are typically between 2.3 – 5 MHz. And for commercial regional stations should start transmitting their AM and FM programs through a single DRM+ transmitters once the completion of DAB+ multiplex services in regional areas.

The allocations should be offered to the ABC for national and state coverage to go DRM in the future. Along with the ABC local radio stations, as well as remote area commercial stations in Qld: Mareeba, Mt Isa, Longreach, Charleville. NSW: Broken Hill, SA/NT: Flow FM (Kapunda SA +), WA: Esperance, Kalgoorlie, Carnarvon, Karratha, Broome and NT: Alice Springs, plus remote area Community station in Fitzroy Crossing.

We needs to allocate your embargoed High Frequency channels to expand DRM broadcasts of ABC Radio Australia is relaying to the Pacific and Asia was negotiated.

The DRM+ only in Band 2 (FM band) and Band 1 (old analogue TV channels 0 – 2) will use their simulcasting FM frequencies anything once from ABC-FM and JJJ to commercial stations, the additional DRM+ transmissions in existing FM band to receive a lot of analogue FM frequencies and DAB+ only stations were rolled out.

A single 1 TV transmitter can transmit up to 68 DRM+ channels including range of Commercial and Community stations as well as Radio National, ABC Local Radio, ABC Classic FM, ABC News Radio, JJJ, ABC Sport, ABC Jazz, ABC Country, ABC Kids Listen, Double J, Triple J Unearthed, SBS1, SBS2, SBS3, SBS Arabic24, SBS Chill, SBS PopAsia, SBS PopDesi, Emergency Warning System, images & journaline and TPEG.

A transmitter channel and program allocation uses program streams of ABC/SBS playout, EWS, regional studio, transmitter site and Band 1 antenna on the TV tower once the ABC/SBS radio distribution to radio and TV transmitter sites is still being completed as well.

To produce a local and national coverage from a single high power HF DRM transmitter should carry ABC NewsRadio, ABC Sport and the state based ABC remote Local radio HF broadcasts in NT is also transmitted in DRM via each frequency and ensemble number.

For all regional centres, the ABC/SBS to use radio transmitters for all program streams through AM/FM frequencies is being simulcast on digital radio, to enable reception outside of towns in Greater coverage area, Country commercial broadcasters to combine AM and supplementary FM licence into one DRM+ licence, this transmitter should carry the Emergency Warning System complete with emergency alerts, DAB+ extends into Gold Coast, Sunshine Coast, Newcastle, Central Coast, Illawarra and Geelong, increase improved coverage of DAB+ and DRM services in all regional and remote centres, the retransmission sites and blackspots will receive the satellite fed equipment, and the ABC/SBS and outback community broadcasters should continue to extending DAB+ via satellite into remote areas.

This is new Digital Radio satellite feeds to complete with ABC Radio Australia (Asia, Pacific) which has been transmitting shortwave for last 78 years.

The remote ABC radio, ABC Sport and ABC News Radio to start high powered national coverage within 2 or more years using a single high powered HF transmitter of DRM services. No analogue radio switch off required until it's digital radio switchover next few years.

We do switch off of the rest of analogue radio for within next 10 years later, but the rest of AM/FM radio services were increased for expands to DAB+ and DRM in most regions since it's launched in 2009.

The AM and FM transmitters of analogue radio stations are mono and stereo in competition to stay using DRM went expands to pay for a new satellite down link. While the community owned repeaters, Community funded transmitters and reducing transmissions costs to use DRM30 and DRM+ transmitters of ABC Local, RN, PNN, ABC-FM, JJJ-FM, Commercial, SBS, LPON, HPON, Community and MF-NAS as well as DAB+ transmitters to make way for same coverage area.

Remote Local Radio coverage is a pair of an ABC Local Radio and commercial radio stations can be received in DRM30 transmissions including ABC New England North West, ABC Western Plains, ABC Riverina, ABC Goulburn Murray, ABC Northern TAS, ABC Southern QLD, ABC Western QLD, ABC North West QLD, ABC Far North, ABC Broken Hill, ABC North & West SA, ABC Alice Springs, ABC Goldfields-Esperance, ABC North West WA, ABC Midwest & Wheatbelt, ABC Great Southern and ABC Kimberley, as well as commercial stations in Moree/Inverell, Dubbo, Griffith, Deniliquin, Wangaratta, Sale, Cairns/Atherton, Mt Isa, Charters Towers, Longreach, Charleville, Oakley/Roma-St. George, Broken Hill, Burnie/Queenstown, Alice Springs, Port Pirie, Port Lincoln, Kalgoorlie, Esperance, Karratha, Geraldton and Broome and a community station in Fitzroy Crossing.

Similar to Rollout for Analog to DRM30 conversion in India completed by 2013, the expansion of AM/FM to simulcast in DRM across Australia went completed by contract ends at the end of multi-year deal, once the completion of DAB+ rollout in regional areas is nearly done yet as well.

Is there was each program streams of ABC Radio Australia's English language and multi-language services will be rolled out to possible target audience across the Pacific and Asia would switch on Digital Radio Mondiale's new HF digital transmissions as they upgrade from old analogue signals to new digital formats directly from satellite fed transmissions, but is being moved from old Radio Australia shortwave transmitters in Shepparton Vic to shared with ABC North Queensland transmitter in Brandon Qld to make room for future of digital radio rollout respectively.

We are carrier frequencies of Longwave is exported to having a new digital formats in Australia, because of long-wave signals can travel long distances in crystal clear reception were improved, the new stations can be found on 198 kHz in Shepparton was former home to Radio Australia shortwave, 183 kHz in Alice Springs, 177 kHz in Tennant Creek and 252 kHz in Carnarvon which covers the whole of regional and remote Australia, as well as relaying into Asia and the Pacific.

The Omnidirectional aerial, two guyed steel lattice masts with a height of 154 – 248 metres (699 – 814 ft), insulated against grounds, it could be the single and multi frequency networks and the digital transmitter for each stations was powers is increased at day and night to 300 kW (Alice Springs, Tennant Creek), 100 kW (Carnarvon) and 500 kW (Shepparton) for carrying a Digital Radio multiplex all day and overnight, featuring one of these radio broadcasters to take on DRM tests, but is AM, FM and DAB+ transmissions now operate full-time once again went taking on-air.

The ABC are ready to join the exported Longwave radio broadcasting service is a new digital transmitters around Australia, it's all four transmitters carry DRM and Radio teleswitch, the PSK data signal had a longwave versions of AMSS and RDS and the stations is transmitted on digital longwave.

In Alice Springs, Katherine and Tennant Creek relays ABC Radio National, ABC Alice Springs, ABC Classic FM, CAAMA Radio and TEABBA Radio 24 hours via multi frequency network, in Shepparton and Brandon relays ABC Radio Australia 24 hours had broadcasting into the Pacific and Asia, as well as ABC News Radio (weekends 10.00 to 12.00) and ABC Grandstand sport (now ABC Sport DAB+) (Sat. from 12.00 to 22.00, Sun from 12.00 to 19.00) was inserted into new Radio Australia longwave via single frequency network.

Also, Carnarvon relays ABC News on Radio 24 hours coupled with live broadcasts of Parliament runs on weekdays from 09.00 to 22.00 Monday to Friday is delayed in WA listeners, as well as combined BBC World Service and Deutsche Welle programming, various international radio broadcasters relayed from analogue radio and shortwave radio services in overseas and a Digital Radio Mondiale multiplex overnight featuring WRN Broadcast from 23.00 nightly to 07.00 each day via multi frequency network.

The new long-wave digital broadcast transmitter compared to a medium-wave (AM) and DAB+ ones, in Australia wants to see all of its new LW digital broadcast transmitters combined with satellite fed transmissions and the Digital Radio Mondiale platforms would be connect from antennas to digital tests.

The VHF NAS stations in the 151 MHz and 172 MHz NAS bands are all foreign language broadcasters to include Greek, Chinese and Arabic broadcasters with some other language groups broadcasting in Hindi, Vietnamese and Tamil would be considering the rollout of DRM technology, but it will use the Narrowband FM services is adopting the DRM (digital radio mondiale) rollout.

ABC is conducting a DRM test of Radio National on 747 kHz alongside the regular 756 kHz AM broadcast from near Wangaratta VIC, this was transmitted digitally from Dockers Plains VIC, the new DRM transmissions for listeners in Australia for people who have a DRM capable receiver, new DRM30 transmission in Dockers Plains VIC is simulcasting the analogue frequency of ABC Radio National Melbourne 621 AM.

The HF broadcast services will receive shortwave radio stations (Radio 4KZ Queensland, Island Memories Radio – Bay Islands Radio, Unique Radio NSW, Radio Hobart International, Reach Beyond Australia) in Australia would be considering the rollout of DRM technology, joining the international shortwave stations can be heard on DRM in extending coverage to Australia to include Radio New Zealand Pacific, BBC World Service, NHK World Japan, Deutsche Welle, Voice of America, Radio Canada International, All India Radio, Radyo Philipinas Worldwide, Voice of Indonesia and more from several other overseas radio stations as well, the broadcasters and listeners can continue to show a capable of receiving DRM transmissions around the world will get the crystal clear reception to go digital.

Our services is a single ABC/SBS DAB+ transmitter carries 18 programs, the commercial/community DAB+ transmitters are carrying up to 32 programs each, this was DAB+ transmitters expanded to regional Australia.

For country areas, there is band 1 DRM which covers a larger area than FM, a single DRM transmitter can carry both commercial programs in better quality than now.

There is data capacity for slideshow advertising, an indexed text service including pictures called Journaline.

This will reduce transmission costs particularly for those with an AM transmitter, the ABC/SBS can also use band 1 DRM to carry all their 18 programs using 6 channels on a single transmitter in each country area, there is an emergency warning functionality to deliver the latest alerts on emergency radio broadcasting, there are 206 band 1 DRM is still enough channels to install DRM on existing FM transmitter towers.

The radio stations in rural and remote communities includes ABC Country, ABC Jazz, ABC Sport, Triple J Unearthed, Double J, Red FM WA (now Hit Network), Spirit Radio WA (now SEN Spirit Bunbury and Triple M), Hot FM WA (now Hit Network), Rebel FM QLD and NSW, The Breeze QLD and NSW, National Indigenous Radio Service, SBS Radio, ABC Radio National and more will be converted from FM radio retransmission services to adopted DRM+ services.

The transmission via HF shortwave, AM analogue and FM analogue services will be reinvested in extending digital radio services into all metropolitan, regional and remote areas continued in analogue radio to digital radio conversions.

Finally, The AM-FM conversions of Commercial radio broadcasting licensees will continue to heard on analogue radio, but we may consider the analogue radio stations for AM-FM conversions in NSW (Armidale, Bathurst, Bega, Cooma, Goulburn, Grafton, Nowra, Taree, Gunnedah, Inverell, Lismore, Lithgow, Moree, Parkes, Tamworth, Young), VIC (Warrnambool, Wangaratta), TAS (Burnie, Devonport, Queenstown, Scottsdale), SA (Murray Bridge, Port Lincoln, Riverland, Spencer Gulf North), NT (Katherine) and WA (Karratha, Port Hedland, Remote WA (Exmouth, Paraburdoo and Tom Price), Mandurah, Albany) will expanded as converted to adopt Digital Radio Mondiale signals, plus infill transmitters (repeaters) to go with new DRM for an existing AM and FM services.

New Satellite Radio coverage in regional and remote areas to deliver it's new DAB+ digital radio satellite service will be funded by new agreement between Australian Government and various radio broadcasters to ensure access to radio channels for listeners in the various regional and remote Australia licence area along with those in regional and metropolitan areas who are unable to receive their local radio services terrestrially.

Similar to Sirius XM satellite radio in US and Canada, DAB+ satellite service will provide access to over 100 VAST radio channels, as well as additional radio services, the self help transmitters would be able to receive all of the digital radio services from the new satellite service, the Government will also provide a subsidy of \$400 to eligible households to expand the new satellite radio service, we using their Optus satellites, and DAB+ satellite receivers.

DRM features included high-quality stereo and mono with up to 3 audio services plus multimedia per DRM transmission, Multi-lingual Journaline text services in English and foreign languages, Emergency Warning Functionality, Flexible multi-DRM transmission of up to number of signals – providing DRM services (audio programmes, Journaline services) from a various AM and FM transmitters, simulcast of an analogue (AM, FM) and digital DRM signals from each transmitter and Interference-free insertion of digital DRM signals in crystal clear reception between the existing analogue AM/FM services.

Various AM and FM frequencies of Analogue radio stations in Mildura, Regional SA, Broken Hill, Regional VIC, Regional QLD, Gold Coast, Sunshine Coast, Southern NSW, Canberra, Northern NSW, Tasmania, Perth, Brisbane, Regional WA, Darwin, Sydney, Melbourne and Remote central and eastern Australia is set to be broadcasting digitally on AM radio, FM radio, expanded to DAB+ digital radio and expanded to Digital Radio Mondiale in your local markets.

New content on DRM to include ABC national talk network, ABC capital city stations, ABC regional stations, ABC classical music, rolling news and Parliament from ABC news and current affairs, ABC jazz music, ABC country music, ABC sport, ABC children's radio, ABC youth radio (JJJ, Double J, JJJ Unearthed), SBS multicultural and multi-lingual radio, music formats from various commercial radio stations, various groups from community radio stations and more.

The DRM international consortium, ABC and HFCC to create the new global DRM transmissions directly from Australia, we deliver the domestic transmissions of ABC Radio stations as well as overseas transmissions of ABC Radio Australia was broadcasts into target areas of Australia, Asia and the Pacific across all the DRM frequencies.

Minister Fletcher is working with the ACMA invites transmitter licences to provide all ABC, SBS, Commercial, Community, LPON, HPON and MF-NAS services across locally and nationally in Australia will be considering the adopted DRM technology when the opportunity to convert their analogue radio (AM, FM) services as expanded to Digital Radio Mondiale (DRM30, DRM+, HF DRM), alongside DAB+ digital radio in your local regions.

New DRM awareness campaign to promote the DRM (Digital Radio Mondiale) digital test transmissions of radio services that consists maximum number of services in various frequencies at a time, maximum number of audio services, number of Journaline services and superior quality, Australian radio broadcasters (ABC, SBS, commercial radio, community radio, narrowcast radio, narrowband radio) impressive implementation of the DRM digital radio standard in the country, that we bring you DRM was exported to Australia, as well as DRM International broadcasts in Australia to provided shortwave radio stations from the world and longwave radio stations from around the world.

If it's approved for Government's Budget funding to have analogue radio stations from metropolitan, regional and remote areas will be expanded to Digital Radio Mondiale in a new multi-year period, DRM International Consortium and WorldDAB is commitment to rolling out DRM radio in the country, as well as new DAB+ regional rollout.

Digital TV rollout

Digital television uses the DVB-T standards and is available in all capital cities and regional and remote centres, the phase out of analogue PAL transmissions was completed by December 2013.

The completion of digital terrestrial and satellite broadcasts was to target the metropolitan, regional and remote areas after more than 20 years of Australian digital TV services. With thanks to broadcasters, manufacturers, suppliers and retailers had all things digital television services in order to receive the digital signals.

We have the initial roll-out of digital television services provides the full-time standard and high definition digital transmissions, primary channels of old analogue TV services, digital multi-channels, digital TV tuners, set top boxes, datacasting services, widescreen, crystal clear pictures, improved sound quality, multi-view broadcasts and more.

The cost for reinvestment of digital TV rollout were completed over the next few years, including digital TV transmission and satellite equipment, direct to home satellite delivery of digital TV, digital TV retransmission services and lots more.

An access to terrestrial TV transmissions will have a range of more HD and digital multi-channels was extending into regional and remote areas were implemented for many broadcasters.

Freeview uses the newly interactive content such as electronic programming guide technology, a capable of receiving free-to-air broadcasts, the library of TV shows, news bulletins, some sports, movies, multi-view services and more.

To ensure digital TV rollout remains viable and you can operate in an environment of certainty, our request to Paul Fletcher MP is that our funding becomes ongoing success of digital TV rollout was also affected.

Our new licence offers a three 7 MHz multiplexes shared between five broadcasters, the transmission quotas on multichannels combined with 55% Australian content quota on main channel, there's no commercial broadcasting tax and must participate in restack when the Government requires it.

An implementation of digital TV rollout will require the FTA TV broadcasters (ABC, SBS, Seven, Nine, 10) are also retransmitted to pay TV providers Foxtel and Fetch TV were delivered via satellite with any subscription required.

ABC TV Plus to create a home for a range of genres, such as Kids, Comedy, Arts, Science, Religion, Entertainment, and History, it broadcasts nationally on TV channel 22.

Community TV only learned of reprieve to plans for another spectrum once Channel 31 Melbourne and Channel 44 Adelaide have been given a 3 year broadcasting extension to June 30 2024, while community TV stations in Melbourne, Adelaide and Perth will expand to it's broadcasting licences of national community TV service.

Regional broadcasters provides the digital multi-channels extends it's reach into our regions, including 9Rush extends into metropolitan market of Darwin, Southern NSW/ACT, Northern NSW/Gold Coast, Griffith/MIA, Regional QLD, Regional VIC, Mildura/Sunraysia, Spencer Gulf/Broken Hill, Mount Gambier/Riverland, Tasmania, Regional WA, and Remote Central and Eastern Australia, as well as 7two, 7mate and 7flix to viewers in Regional QLD, Northern NSW/Gold Coast QLD, Southern NSW/ACT, Regional VIC, Mildura VIC/Sunraysia, Regional/Remote WA, Mount Gambier/Riverland, Griffith NSW/MIA, Tasmania, Spencer Gulf SA/Broken Hill NSW, Darwin, and Remote Central/Eastern Australia, 9Gem, 9Go! and 9Life to viewers in Darwin, Northern NSW/Gold Coast, Regional QLD, Southern NSW/ACT, Regional VIC, Mildura VIC/Sunraysia, Tasmania, Mount Gambier/Riverland, Griffith NSW/Murrumbidgee Irrigation Area, Remote/Regional WA, Remote Central/Eastern Australia, and Spencer Gulf SA/Broken Hill NSW, and 10 Bold, 10 Peach and 10 Shake to viewers in Regional QLD, Southern NSW/ACT, Regional VIC, Spencer Gulf SA/Broken Hill NSW, Mount Gambier/Riverland, Griffith NSW/Murrumbidgee Irrigation Area, Mildura VIC/Sunraysia, Tasmania, Darwin, Remote Central/Eastern Australia and Remote/Regional WA.

The HD services of primary channels extends it's reach into regional, some metropolitan and remote areas, including 9HD, 7HD and 10 HD to viewers in Southern NSW/ACT, Northern NSW/Gold Coast, Griffith NSW, Regional QLD, Regional VIC, Mildura VIC, Tasmania, Darwin NT, Spencer Gulf/Broken Hill, Mount Gambier/Riverland, Remote Eastern and Central Australia and Regional and Remote Western Australia.

Apart from Netflix and Foxtel, the planned roll-out for new 4K transmissions is a high-quality video format that is 20 times the resolution of HD which shows SD and HD programming for free to air TV broadcasters in near future. 4K TVs artificially upscale fine 4K details from an HD source.

The Nine Network to reached an extended multi-year affiliation deal with WIN Television (Southern NSW, ACT, Griffith NSW, Regional QLD, Regional VIC, Mildura VIC, Tasmania, Mount Gambier/Riverland, Regional WA) were renewed over next few years, as well as Network 10 for ViacomCBS will reached another extended multi-year affiliation deals with Southern Cross Austereo (Southern NSW/ACT, Regional QLD, Regional VIC), WIN Television (Northern NSW, Griffith, Mount Gambier/Riverland), Tasmanian Digital Television, Mildura Digital Television, and West Digital Television. The regional affiliates of Nine and 10 were completed it's affected areas of another multi-year affiliation deals since July 1 2021.

Recently, Viewer Access Satellite Television uses the Regional News service provided a local and national bulletins for *WIN News* (QLD, VIC, Southern NSW, Tasmania, Wollongong, Canberra), *10 News First* local update (QLD, VIC, Southern NSW), *Nine News Darwin*, SCA's Seven and 10 local news updates (Darwin, Remote Central and Eastern Australia, Tasmania), SCA's *7 Nightly News* (Tasmania, Spencer Gulf/Broken Hill), *Seven News Regional Queensland*, *NBN News* (Northern NSW, Gold Coast) and *Prime7 Local News* (Northern NSW, Southern NSW, Victoria).

An terrestrial retransmissions uses self help sites on the TV retransmission sites coupled with Digital TV repeater and translator sites which shows the popular choices are ABC, SBS, Freeview and VAST services.

The digital television transmission equipment, MPEG2 and MPEG4 transcoders, transmitters, digital receivers, satellite equipment, satellite downlinks and antennas were increased that the free to air digital TV services will be transmitted on Freeview and VAST, alongside the free to air services of ABC, SBS, Seven, Nine and 10 was also retransmitted on the Foxtel and Fetch TV platforms.

Australian TV broadcasters and pay TV services relays news aired by overseas broadcasters coupled with drawn resources of International News broadcasters such as VTV (Vietnam), TVNZ (New Zealand), Mediaworks (New Zealand), SKY (New Zealand), ABC (US), NBC (US), CBS (US), CGTN (China), PBS (US), BBC, France 2 (France), DW (Germany), KBS (South Korea), TVE (Spain), Al Jazeera (Qatar), NDTV (India), ABS-CBN (Philippines), Mediacorp's CNA (Singapore), NHK (Japan), RAI (Italy), ANT1 (Greece), TVB Jade (Hong Kong), TVRI (Indonesia), Dubai TV (UAE), TV1 (Malaysia), Russia Today (Russia), CNBC (US), CNN (US), ABC (Australia) and more.

All uplink operations for digital TV broadcasting are carried out to transmit its broadcast satellite from the uplink and transmission facilities in cooperation with ABC, SBS, Channel Seven, Channel Nine, Network 10, Prime Television, GWN, WIN Television, Southern Cross Austereo, NBN Television, Imparja Television, Foxtel, and Optus, but is coupled with sent via digital terrestrial TV transmitting stations to make room for upgrade to TV broadcasting facilities and systems in preparation of play-out and transmission facilities to be broadcast in HD would be links via satellite.

While the uplinking of satellite broadcasts are also sent to TV transmission facilities of Digital TV multiplex transmitters in metropolitan, regional and remote areas, as well as its re-transmitted on various pay TV services.

Free-to-air TV broadcasters will be upgrading its digital TV service for your local stations to digital broadcast technology, which included digital TV transmitters, antennas, microwave links, off-air feeds, DVB-T2 transmission standard has been adopted is 4K ultra HDTV, satellite dishes, transmission and satellite equipment and upgrades to transmission and satellite systems, which was based in all TV transmitters (ABC, SBS, Seven, Nine, 10, regional affiliates, community TV, open narrowcast TV) and all TV re-transmitters (ABC, SBS, commercial TV, VAST satellite service) located at all locations in metropolitan, regional and remote Australia.

The funding includes free to air TV services will be used for roll-out of digital TV services are sent via over-the-top (OTT) platforms, Hybrid Broadcast Broadband TV (HbbTV), subscription TV, and syndicated to international TV broadcasters for a new five year deal with free-to-air retransmissions was expansion of digital cable and satellite TV distribution service to pay TV providers were phased in.

The adoption of DVB-T2 broadcast technologies would likely require our digital TV transmitters to receive 4K ultra HD broadcast trials for FTA broadcasters is transmitting our signals. In this eventuality we would seek carriage via DVB-T2 transmission services elsewhere.

VAST will carry the digital multichannels 9HD, 9Life, 9Rush, 7HD, 7flix, 10 HD, and 10 Shake in remote central, eastern and western areas for the first time, as well as datacast channels Racing.com and TVSN will join VAST in remote central and eastern areas.

Commercial broadcasters were allowed to transmit regional TV networks was an sole affiliated to Seven Network, Nine Network and Network 10 was initially to simulcast in HD had extends into Regional NSW, Canberra, Regional QLD, Regional VIC, Regional SA, Tasmania, Darwin, Remote Central and Eastern Australia and Regional WA.

Relay transmitters across regional and remote areas of various locations to address pockets of patchy reception of the digital channels, the translators and repeaters will relay all primary channels of ABC, SBS, Seven, Nine, 10 and their associated multichannels to viewers in the regions.

The few channels from TV stations in rural and remote communities includes ABC TV, SBS TV and Regional commercial TV stations is an sole affiliates of Seven, Nine and 10 networks have reliable digital television retransmission services to help with the installation costs for the ABC/SBS digital television services, commercial TV networks and satellite systems.

For example, the Highton self-help tower in Geelong will be re-transmitted from the digital TV transmitter in Mount Dandenong to receive Melbourne TV channels, soon we have extending coverage into Geelong area will be the Ballarat TV channels received via digital TV transmitter in Lookout Hill to join the retransmission of Geelong's new second local repeater at Highton self-help retransmitter as a long distance of TV DX in crystal clear reception.

The ABC and SBS provide audio described programs across their broadcast networks and delivering audio described services via broadcast-mixed audio description using DVB-T secondary audio technology.

Commercial TV broadcasters has upgraded multi-channels (7two, 7mate, 7flix, 9Go!, 9Gem, 9Life, 9Rush, 10 Bold, 10 Peach, 10 Shake) in each capital city (excluding Regional QLD and Darwin) from SD to HD is MPEG-4 format.

The Digital TV transmitters which can be utilised for C31 Melbourne retransmissions would be implemented in regional Victoria, south-east SA and Tasmania, coupled with re-transmissions of C44 Adelaide would be implemented in Riverland, Spencer Gulf and Broken Hill and re-transmissions of former home to WTV Perth would be implemented in regional WA. The simulcasts of the C31 Melbourne and C44 Adelaide services would be distributed state-wide for local re-broadcasts when ICTV (Indigenous Community TV) is also utilising the satellite transponder for its own programming. It provide participating communities with an additional free-to-air TV services during these times.

These transmission facilities are co-located with ABC TV and SBS TV, also have adjacent satellite dished and decoders, satellite reception equipment in regional and remote areas was configured to receive ABC TV and SBS TV on the VAST satellite, whereas the ICTV service will be delivered via an Optus satellite, the new channel sharing arrangement to show a separate "cherry picked" rural community TV service in style of Bushvision Mount Gambier, the country service would be comprised of the very best of all programming broadcast in Melbourne, Adelaide, Perth, Sydney and Brisbane over many years, plus programming generated from VIC, SA and WA rural centres. New national channel of regional community TV service as a regional monopoly affiliated with community TV stations in Sydney, Brisbane, Melbourne, Adelaide and Perth was planned in the future, due to extending community TV licences over next 3 years.

ABC Television had been able to continued development of digital TV channels is covering all things general entertainment, comedy, drama, children's, youth, news and public information, sport, education and a 'best of overseas' content (mainly BBC shows, other overseas shows) across all the TV network channels through ABC TV, ABC TV Plus, ABC KIDS, ABC ME and ABC News channel.

The national playout centres of commercial TV networks in Sydney and Canberra was a home to Seven, Nine, 10, Prime, GWN, SCA Seven, SCA Nine GDS/BDN, NBN, Imparja, WIN, SCA 10, joint venture TV stations and supplementary monopoly TV stations will be delivered via satellite feeds to transmission centres of broadcast facilities and systems, working alongside outside broadcasting, studio productions, news and sports coverage, control rooms, in-house TV production facilities, improving digital TV reception, and TV viewers broadcast live from all capital cities and regional centres as part of technical operations and activities.

Digital TV satellite will have access to ABC news is provided through ABC TV on a state basis, the national news broadcasts through ABC News channel and SBS world news is provided through SBS TV on a national basis.

For Broadcaster controls had broadcaster studios, studio to transmitter links, main transmitters, new gap fillers, translators, self help relay transmitters, satellite feeds, satellite uplinks and satellite downlinks to make room for upgraded Digital TV broadcasting capabilities to fed via satellite services.

Digital TV brought a range of enhancements such as datacasting, multi-view services, HD services and additional content would be transitioned to combined free-to-air and pay TV services once the retransmits free-to-air channels. Regional TV stations have relay of direct feeds from 5 capital cities.

The regional TV stations send their news programs for VAST Regional News service to a playout centre in Sydney, NSW, as well as sports coverage is delivered via an encrypted signals on satellite feeds.

It's predicted that by multi-year arrangements every Australian household and traveller will extend the reach of digital TV services. It provides crystal clear reception and sharper pictures, clearer sound, widescreen programs and it will provide extra channels.

A long term commitment to a full —7MHz channels for ABC, SBS, Seven, Nine, 10 and community TV. Provide funding for our digital transmission costs including transmission equipment to accept the satellite feeds of VAST signals through transmitters.

We have a license to broadcast digitally, the digital set-top-boxes and digital TVs to receive ABC, SBS, Seven, Nine, 10 and community TV programs will be connect from the old RF antenna to set-top-box, the sooner you have crystal clear reception of free-to-air channels on your TV and digital set-top-box in HD.

You can get free-to-air channels as a service to viewers had included on pay TV, we got Foxtel and Fetch TV carry ABC, SBS, Seven, Nine and 10 digitally, but the community TV stations and regional affiliates of Seven, Nine and 10 will not included in pay TV services.

Antennas for Satellite uplink/downlink were connected in playout and transmits this signals via satellite feeds are sent to the TV transmission facilities in all states and territories. The High Definition production facilities were shared by digital TV transmission facilities were located in over 8 capital cities and regional centres of all cities and towns.

A purpose built facilities to use a microwave links provided to the local TV towers for program transmissions, an automated presentation systems controlling the breaks in the feeds from Seven, Nine, 10 and Community TV and for the inserting of local content.

Regional stations would operate as sole affiliates of commercial TV stations as a program feeds from that station, there would be breakaway programs from the local area could mainly classic TV shows and movies and some sports from SBS and NITV such as the FIFA World Cup soccer and *Heartland Footy* would be included in place of direct feeds from Seven, Nine and 10 networks.

National Indigenous Television (NITV) is part of SBS had a partnerships with Indigenous Community TV, and Imparja Television provides Australian content of various indigenous TV series from Aboriginal & Torres Strait Islander programming, NITV is broadcast via Imparja's second channel had transmits a free-to-air service to parts of remote central and eastern Australia via satellite are sent to SBS TV channels. Under the proposal of digital community TV services, regional stations would operate as an monopoly affiliate of Community TV stations C31 Melbourne, C44 Adelaide and WTV Perth is a program feed from that station in much the same way as Commercial Regional TV stations operate. However, there would be breakaway programs from the local area, and some programs from TVS Sydney, 31 Digital Brisbane, Access 31 Perth and BushVision would be included in place of the Melbourne, Adelaide and Perth feeds.

This sees 7MHz allocations for FTA TV broadcasters to deliver few channels across the multiplex of FTA TV services, broadcasters to participate in the long-term planning of the 600MHz spectrum band and new broadcasting technologies of 4K ultra HD TV in support for FTA television broadcasters, digital multi-channels in each service will be migrated as they converted from standard definition (SD) format using MPEG-2 compression to high definition (HD) format using MPEG-4 compression, as well as additional channels and programming for FTA TV services.

The FTA TV broadcasters had manually switched digital playout to transmit most programmes were played out from control rooms are sent to the transmitters was carried over a dying digital microwave links and satellite feeds, once the digital TV could access to DVB-T and DVB-S transmissions will be fed via satellite delivery of local TV services.

ABC TV channels will continue to air Australian and overseas kids' shows on their multi-channels (ABC TV Plus for kids, ABC ME), as well as youth and general entertainment content.

The SBS hopes to launch a new channel LOTE TV has been proposed with more foreign language content, providing programs predominately in languages other than English in the future, SBS LOTE TV will deliver it's variety of shows, including international shows, world movies (shared with SBS World Movies), kids' programming (shared with NITV), foreign language news (shared with SBS TV and SBS Viceland) and live sports such as Italian soccer and Greek soccer (shared with SBS TV, SBS Viceland and NITV).

Nine's digital multi-channels (9Gem, 9Go!, 9Life, 9Rush) will be devoted to a mix of general entertainment, lifestyle, reality, classics, kids and movies.

ACTA is working with CBAA to provide a new National Community TV service in all capital cities such as C31 Melbourne and C44 Adelaide, as well as regional and remote Australia are under implementation, with development now a priority, and being addressed, but we got specifically UHF Television channels 41-50 included in clear and re-purpose use of the 600 MHz spectrum band, while vacant regional channel allocations used for community TV in Melbourne, Adelaide and Perth as the sixth new channel in regional areas.

TV broadcasters provided a free-to-air multi-view services on Freeview, VAST, Fetch TV and Foxtel including additional content such as a number of federal parliament audio and video streams, video program guides, news, weather, sport (Olympics, Commonwealth Games, horse racing, rugby union, AFL, rugby league, cricket, tennis, golf, motorsport, netball, soccer, sport news, more sports), catch-up TV library and more.

The ABC, SBS, and commercial broadcasters (Seven, Nine, 10, various regional affiliates) will convert a TV services located at various transmission sites and retransmission services to accept the VAST signals to work with direct to home satellite delivery as part of reinvestment.

The upgrade and maintenance of equipment for digital TV services in regional and remote areas are being advised to install a satellite dish, downlinks and antennas on the transmission services.

Viewer Access Satellite Television in remote and rural areas will deliver its additional TV services, including Parliamentary broadcasts (ABC), live rolling coverage of Emergency broadcasting (ABC) and programming from Languages other than English content (SBS).

Additionally, Electronic Program Guide uses On-screen information about your favourite TV programs and movies will be able to see what's on now and next for all free-to-air stations for next 8 days a week, the free-to-air broadcasters offers interactive TV enhancements on pay TV for example: an enhancement may be used on a programs such as ABC News channel broadcasts live coverage of emergency information, a multiview uses a megawall of Nine's Australian Open tennis coverage, multi-screens of Seven's Olympics and cricket coverage, news and sport headlines and the live streams of free to air channels via ABC iview, SBS On Demand, 7Plus, 9Now and 10 Play on demand, as well as digital retransmissions of Australian free-to-air TV services will be relaying to the Pacific region via pay TV services in overseas from around the world.

Our digital multi-channels such as 7two, 7flix, 9Go!, 9Life, 9Rush, 10 Bold, 10 Peach and 10 Shake will be expanded to high definition formats, with 7mate and 9Gem is already simulcast in high definition format of MPEG-4.

Core programming for Seven, Nine and 10 is fibre-fed out of Channel 7 Sydney, Channel 9 Sydney and Network 10 Sydney to its sister stations and regional affiliates, with Channel Seven, Channel Nine and Network 10 has a digital TV transmission sites in each capital city and regional centre to become compatible with the new Freeview and Viewer Access Satellite Television signals and accept the Optus satellites by 1 September 2022.

Regional commercial TV stations (7, 9, and 10 affiliates) will be delivered via satellite to various transmission sites.

Similar to Satellite stations and semi-satellites in the US and Canada, Optus and VAST satellites will carry the commercial TV stations in local markets such as Channel 7 (Sydney, Brisbane, Gold Coast opt-out, Melbourne, Adelaide, Perth), Channel 9 (Sydney, Brisbane, Gold Coast opt-out, Melbourne, Adelaide, Perth) and Network 10 (Sydney, Brisbane, Melbourne, Adelaide, Perth), as well as enable an additional local TV services via satellite such as regional affiliates of Seven, Nine, and 10 networks to be transmitted terrestrially in regional and remote Australia.

Recently, the regional television realignment for over 5 years (2016 to 2021) to provide Network 10 affiliation through WIN Television stations in Northern NSW, Southern NSW/ACT, Griffith/MIA, Regional QLD, Regional VIC, Mildura/Sunraysia, Tasmania, Eastern SA (Mount Gambier, Riverland) and Regional WA will be reinvested in affiliated stations such as Southern Cross Austereo's SCA 10 (Southern NSW/ACT, Regional QLD, Regional VIC), WIN Television Northern NSW, WIN Television Griffith, Mildura Digital Television, Tasmanian Digital Television, WIN Television South Australia and West Digital Radio, as well as Channel Nine network affiliation through WIN Television (Griffith, Eastern SA), Southern Cross Austereo's Nine Regional (Southern NSW/ACT, Regional QLD, Regional VIC), Mildura Digital Television, Tasmanian Digital Television and West Digital Television will also be reinvested in Nine programming and channels via the WIN Television network throughout Southern NSW/ACT, Griffith/MIA, Regional QLD, Regional VIC, Mildura/Sunraysia, Tasmania, Eastern SA (Mount Gambier, Riverland) and Regional WA, as part of regional affiliation swap in 2021 from last year.

Digital TV services in metropolitan, regional and remote areas which shows metro and regional TV stations through Seven, Nine and 10 networks, along with ABC and SBS channels, it now broadcasts few programs in High Definition but now, you will be able to enjoy the benefits of HD while your favourite shows broadcast in HD such as new various Australian TV shows included in both 2021 upfronts and 2022 upfronts, *Married At First Sight*, *LEGO Masters*, *The Block*, *Australian Ninja Warrior*, *Celebrity Apprentice Australia*, *Beauty and the Geek Australia*, *The Weakest Link*, *Love Island Australia*, *Travel Guides*, *Amazing Grace*, *Taronga: Who's Who in the Zoo*, *Mega Zoo*, *Accidental Heroes*, *Paramedics*, *RBT*, *Emergency*, *Millionaire Hot Seat*, *60 Minutes*, *A Current Affair*, *Nine News*, *ARIA Awards*, *TV Week Logie Awards*, *Today Show*, *Today Extra*, *NRL Sunday Footy Show*, *AFL Sunday Footy Show*, *Footy Classified*, *Sports Sunday*, *100% Footy*, *The Road to Miss Universe Australia*, *Getaway*, *Postcards*, *Gold Week Telethon* (Sydney), *Carols by Candlelight*, *Big Brother*, *Farmer Wants a Wife*, *The Voice*, *SAS Australia*, *Australia's Got Talent*, *The All New Monty*, *7 News Spotlight*, *Home And Away*, *Better Homes and Gardens*, *Highway Patrol*, *Border Security*, *Seven News*, *Sunrise*, *The Morning Show*, *The Chase Australia*, *Holey Moley*, *Ultimate Tag*, *Wife Swap Australia*, *Dancing with the Stars*, *Outback Truckers*, *AACTA Awards*, *The Front Bar*, *NSW Schools Spectacular*, *Good Friday Appeal* (Melbourne), *Perth Telethon*, *Victorian State Schools Spectacular*, *Carols in the Domain*, *Ambulance Australia*, *Todd Sampson's Body Hack*, *Bondi Rescue*, *The Project*, *The Sunday Project*, *Family Feud*, *The Cube* with Andy Lee, *I'm A Celebrity... Get Me Out of Here*, *MasterChef Australia*, *Australian Survivor*, *The Masked Singer Australia*, *The*

Living Room, The Bachelor, The Bachelorette, The Amazing Race Australia, Five Bedrooms, Gogglebox, Have You Been Paying Attention?, Hughesy, We Have a Problem, The Cheap Seats, Drunk History Australia, Pilot Week, How to Stay Married, 10 News First, Studio 10, Neighbours, One Born Every Minute Australia, Territory Cops, Christmas with the Australian Women's Weekly, Easter with the Australian Women's Weekly, more Australian TV programs, overseas programs, special events, movies and live sports are also aired during this time on free to air TV services in Australia, as well as various ABC and SBS programs also broadcast in High Definition format.

The networks all broadcast in various HD signals – ABC, SBS, Seven, Nine and 10 will air in HD format: 1080i, as well as digital multi-channels from commercial TV networks expands to HD in your local markets.

Commercial network transmission arrangements in metropolitan, regional and remote areas providing primary transmitters and secondary translators/re-transmitters to cover the relay sites, microwave links, primary off-air, secondary off-air and the satellite transmission.

What will be the Digital TV's Broadcaster Features and Enhancements are listed:

Widescreen programming - An increasing amount of All new and encores Australian and overseas programming content, as well as news, current affairs and sport.

High Definition - The ABC, SBS, Seven, Nine and 10 is upconverting it's SD services to HD (1080i picture resolution) on various channel numbers.

Extra Channels – Video Program Guide Channels, ABC Radio National, ABC Local Radio (capital city stations), ABC Classic, ABC News on Radio, Triple J, ABC Jazz, ABC Country, ABC Kids Listen, Double J, Triple J Unearthed, SBS Radio 1, SBS Radio 2, SBS Radio 3, SBS Arabic24, SBS Chill, SBS PopAsia, SBS PopDesi, VAST satellite radio services (remote and rural areas), datacasting services, Community TV, Open Narrowcast TV

Digital Enhancements - 'Now and Next' program information, Closed Captioning

According to that, the retransmission of free to air digital TV services such as ABC TV, SBS TV, Seven, Nine, 10 and regional stations are being re-transmitted on various repeaters, self-help relay transmitters and translators as well as it's retransmitted on the Foxtel cable and satellite platform.

What will be reinvestment of digital TV services and other external services could be improved:

- Supporting federal budget to provide the future of Australian digital TV rollout, The launch of additional channels through VAST, namely 7HD, 9HD, 10 HD, 7flix, 9Life, 9Rush, 10 Shake, Racing.com and TVSN, as well as additional versions of ABC and SBS channels in all timezones.
- An updated to the VAST regional news service to include news bulletins and updates from *WIN News*, Southern Cross Austereo's regional TV news (7 Darwin news update, 7 Central news update, *Nightly News 7 Tasmania*, *Nightly News 7 Spencer Gulf/Broken Hill*, 10 News First Local update, 10 News First Tasmania update), *Seven News Regional QLD*, *NBN News* and *Prime7 News*, plus 9 News Gold Coast, 9 News Darwin, 7 News Gold Coast, *GWN7 News*, and *WIN News* local newsbreaks (Northern NSW/Gold Coast, Mt Gambier, Riverland, Wide Bay), as well as VAST state-based news service to provide the new home of ABC TV News bulletins at 7pm in each state and territory, which was state and territory news provided by ABC News.
- Multi-million dollar costs to reinvestment of allowing C31 Melbourne and C44 Adelaide to use of the broadcast spectrum we occupy had extends on-air to June 30 2024.
- Free-to-air digital TV services in metropolitan, regional and remote areas had both national, commercial and community broadcasters and VAST satellite miscellaneous broadcasters located at all transmission sites to accept the signals via satellite using DVB-T standards, Optus satellites and Direct-to-Home satellite transmissions.
- Free-to-air broadcasters ABC TV, SBS TV, Seven, Nine and 10 to be retransmitted on the negotiations with Foxtel and Fetch TV through the cable, satellite and IPTV subscribers to view all primary channels and all digital multi-channels to broadcast free-to-air programs with digital quality pictures and sound.
- Internationally, the ABC had improved digital TV broadcasting capabilities is upgrading to HD to some of the regions across the Pacific and Asia currently relying on rebroadcasters, satellite, apartments and hotels.
- ABC and SBS delivering an average of increased 14 hours per week of audio described programming across their broadcast networks.
- Network 10 to renewed a multi-year affiliation deals with Southern Cross Austereo in Southern NSW, Canberra, regional QLD and regional VIC, WIN Television in Northern NSW, Griffith, Mount Gambier and

Riverland, Tasmanian Digital Television, Mildura Digital Television and West Digital Television (Regional WA) effective since 1 July 2021 and beyond.

- Nine Network to renewed a multi-year affiliation deal with WIN Television in Southern NSW, Canberra, Griffith, Regional QLD, Regional VIC, Mildura, Tasmania, Eastern SA (Mount Gambier, Riverland) and Regional WA took effective since 1 July 2021 and beyond.
- Primary channels 7HD, 10 HD and 9HD extends into regions of remote areas and more regional centres.
- Multi-channels 7flix, 9Life, 9Rush and 10 Shake extends into regions of more regional centres and remote areas.
- We operate under a new kind of commercial television broadcasting licence were used in the digital spectrum.
- New 4K broadcasts extends it's trialling DVB-T2 technology to carry full-time 4K TV services, everything from movies and sport content to High Definition scenic loop.
- Local broadcasters Aboriginal Broadcasting Australia's TV channels in Darwin, Goolarri TV in Broome, Ngarda TV in Roebourne, and Snowy Mountains Television in Jindabyne to use of the broadcast spectrum locally, shared with extended broadcast licences of C31 in Melbourne and Geelong, C44 in Adelaide and WTV in Perth.
- VAST satellite channels Indigenous Community TV and narrowcast TV service 3ABN Australia TV is delivered via satellite feeds to viewers across nationally, using DVB-S2 standards.
- For example, expanded digital TV reception in south-east SA and western VIC is variable but we access to local Victorian and SA stations such as the ABC and SBS Victorian services, Prime7, SCA 10, WIN VIC, the ABC and SBS SA services and WIN SA (Seven SA, Nine SA, WIN 10 SA), used in converting long-distance analog TV signals of ABC and SES8 (WIN SA) to digital TV transmissions.

Other external services

The free-to-air satellite TV services for travellers (caravans, campervans, motorhomes) will be receive an extending coverage of rural and remote areas has been improved, while the satellite master antenna TV systems (SMATV) and master antenna TV systems (MATV) would be distribute the capable of receiving digital TV signals to units in hotels, motels and caravan parks will provide the terrestrial free-to-air TV services, VAST satellite service, Foxtel and other pay TV services will convert to new digital distribution systems in accommodation venues, pubs and clubs.

Australian TV broadcasters and pay TV services offers sports broadcasting contracts including the range of local, national and international sports from Australia, New Zealand and overseas will be syndicated to international broadcasters across the world, such as Sport 24 (Inflight, Inship), BT Sport UK, Sky TV (NZ), ABC Australia (Asia Pacific region), OSN (Middle East), SuperSport (South Africa), Fox Sports Asia, EMTV (PNG), Fiji TV (Fiji), TV3 (Samoa), ESPN International, NHK (Japan) and more.

The Budget supports digital TV services had an ever increasing numbers of Australia's population living and travelling throughout the metropolitan, regional and remote areas – currently extends it's reach to more than 90,000 travellers and 10,000,000 households who have access the services.

These terrestrial and VAST services provides the range of national broadcaster, commercial, community, and open narrowcasting FTA TV services via Freeview and Optus Aurora Digital satellite platform. The current and past services are well received and should continue as well but the technology within the Freeview and VAST platform is old and needs updating/upgrading including NBN services etc.

For any devices, the metropolitan networks have explore the internet-delivered Broadcast Video-On-Demand (BVOD) platforms (7plus, 9Now, 10 Play) was also extending the reach into their regional affiliates went to additional funding which are targeted to their specific broadcast areas, mainly TV shows, movies, news and sport content which can be viewed over the internet in regional areas to watch episodes on-demand and live streaming shows across the TV channels.

Any reduction in this support digital TV rollout, you need to updating/increasing the platform to include more of access to digital TV multi-view services are re-transmitted to subscription TV services (pay TV providers) including video program guides, program information and high definition.

Free-to-air TV and pay TV services relays news aired by overseas broadcasters on World News including ABC, HLN(CNN), PBS and Bloomberg (US), BBC (UK), ZDF and ARD (Germany), F2 (France), TVE (Spain), RUSSIA TODAY (Russia), TRT (Turkey), Al Jazeera (Qatar), NDTV (India), CCTV, Shanghai RTS and Hong Kong TVB (China), KBS (South Korea), ABS-CBN (Philippines), METRO (Indonesia), VTV (Vietnam), ABC (Australia), Rede Bandeirantes (Brazil), CNA (Singapore), NHK (Japan) and more.

The full bulletins of local, national and international news is broadcast live on relayed from all capital cities has been worked with regional TV stations cover local news, news from overseas via satellite to deliver the international news resources, Australia is able to receive direct telecasts from most part of the world via many international satellites located above the Pacific Ocean and the Indian Ocean.

Programs, live special events and news reports can be beamed live from overseas television stations to their Australian counterparts, and sporting enthusiasts are able to watch major sporting events, such as Wimbledon tennis, F1 Australian Grand Prix, Olympics, World Cup soccer, Southeast Asian Games and more, while the games of rugby league, Australian rules football, rugby union, horse racing, motorsport, cricket and more are being played.

The Parliament of Australia's ParITV – in-house radio and TV service will be able to expanded free-to-air TV channels, digital satellite channels, some pay TV services and radio channels could be rolled out for digital radio and TV services in Canberra. We have free-to-air TV channels in Canberra, ABC Australia TV, Fox Sports channels, Sky News channels, Fox News, Fox Business, CNN, BBC World News, Bloomberg, Al-Jazeera, CNBC, CNA (Singapore), NHK World Japan, Russia Today, Deutsche Welle, France 24, CGTN, VOA TV (US), TVB News Channel, ESPN, BeIN Sports, Euronews and the Parliamentary TV channels will be updated to upgrade the digital TV services via satellite, plus the Parliamentary Radio channels are audio streams will be joined by local radio transmissions of AM, FM and DAB+ stations in Canberra and Digital TV's audio streams of ABC and SBS radio channels are delivered via satellite fed to upgrade the new digital radio services.

International news and sports, TV channels and programs are gathered by broadcast operations, news transfer operator, playout facilities and are brought in via one of the many satellite dishes from Australia and around the world.

In remote areas, the VAST satellite service had additional funding to show TV channels on DVB-S as well as radio stations are found on both DVB-S and expands to DAB+ accept this DTH transmissions.

The digital broadcasting is now fully covered by radio and TV services, it provides digital radio in regional and remote markets, regional TV affiliations, shortwave radio, longwave radio, digital radio narrowcasting, digital TV retransmitted to pay TV providers, ABC Radio Australia digital and more.

Supplementary information about digital radio, digital TV and pay TV rollouts

The ABC can save the additional funding that they have AM and FM transmitters in regional areas for Radio National, ABC Local Radio and ABC News Radio, as well as FM transmitters of ABC FM and JJJ in regional areas will increase the savings to adopt the DRM services, for those audiences to receive DAB+ services in all capital cities. The RABS satellite also going digital radio in remote areas.

Pulse FM Hobart expands to digital radio in metropolitan areas of Tasmania, alongside the all of local LPON and HPON radio stations is expanding to DAB+ and Digital Radio Mondiale across Australia in the few stages.

Narrowcast stations had expands to digital radio locally and nationally in the near future including Vision Christian Radio, 3ABN Australia Radio, Faith FM, Raw FM, KIX Country, Sky Sports Radio, RSN Racing and Sport, Rete Italia, Radio TAB, 5RTI Adelaide 531, Racing Radio (WA TAB), TEABBA Radio, Surf FM Frankston, 2ME Radio Arabic, Radio Great Southern Wagin, 3XY Radio Hellas and many more.

The suitable for DRM+ and DRM30 is available for the MF and FM bands currently occupied by AM radio, FM radio and the HF band, it was 47 - 68 MHz is cleared of analog TV channels 0 - 2, DRM can use the new digital formats of AM, FM, shortwave, narrowband FM (VHF NAS) and longwave services to give the extended coverage areas as existing AM, FM and HF transmissions.

Digital Radio in Australia has worked with the community radio stations should direct relays via satellite feed of Voice of America's VOA1 to listeners through Melbourne's WYN FM 88.9 Werribee at least, no charge for free.

Longwave was exported to Australia, where a range of various frequencies is used for Digital Radio Mondiale broadcasting in near future.

New DRM transmitters could carry Radio teleswitch, PSK data, and an antenna arrays, but the Omnidirectional aerial was installed on the single frequency networks, maximum of radiation in the east, west, north, south and central directions and rolled out of upgraded masts in the AM transmitters of radio services.

In regional and remote Australia, which relays radio broadcasters will ran 24 hours a day, the various radio stations is yet to be plans for future of between longwave and DRM over next few years.

The shortwave radio services will be expanded to Longwave broadcasting, while ABC's outback radio services in NT and ABC Radio Australia was also expands to digital formats of Longwave broadcasting.

Longwave was also connected to HF DRM transmitters in most regions, DRM30 is planning to simulcast of their AM radio frequencies (531-1701) as well as ABC Radio will be operating a longwave frequencies on new Digital Radio Mondiale services.

The rebroadcast partnerships between ABC Radio Australia and other quality broadcasters throughout Asia, the Pacific and the world will continue to expand the new arrangements throughout 2022-23, including Radio 2AP Samoa, WRN Broadcast, All India Radio, Radio RRI Indonesia, Radio New Zealand International, Radio Fiji One, Radio Fiji Two, NBC Radio Papua New Guinea, TBC's Radio Tonga, NHK Radio Japan, ABS-CBN (DZMM Radyo Patrol, DYAP Radyo Patrol, DYAB Radyo Patrol, DXAB Radyo Patrol, MOR Philippines), Mediacorp's CNA938, KBR68H Indonesia, KBS World Radio, CBC Radio Canada, China Radio International, RTHK Hong Kong, RTM's TraXX FM and Nasional FM stations, Radio Norfolk (Norfolk Island), SIBC Solomon Islands, USA Radio NPR, Voice of Vietnam, Radio Vanuatu, World Radio Paris and more, the ABC Radio Australia programs can be heard on more than 300 AM and FM local radio stations across the world as well as syndication partnerships internationally.

ABC local radio is now broadcasting on digital radio in Australia to activated its Emergency Broadcast Service and utilising it's Radio National, ABC Local Radio, ABC News on Radio and multiplex licences of digital radio transmitters in Australia as well as ABC Radio Australia's FM transmitters in the Pacific commenced digital broadcasts into the affected areas. This allows listeners with AM, FM, digital, satellite and shortwave receivers in the regions to listen to our coverage, in the event that the cyclone and bushfires damages ABC transmitters or power and telecommunication sources.

DRM+ transmitters could easily carry Radio National, ABC Local Radio and ABC News Radio on a single transmitter. A second transmitter could carry ABC Classic FM and JJJ.

We note that is the future delivery of radio services in it's Report from ACMA released on 26 March 2020 in the last decade to 2010's, our report had the broadcast spectrum planning priority activities including making digital radio channel plans for regional DAB+ where there is a planned rollout.

Remote area commercial broadcasters REDWAVE Media (Red FM is now Hit, Spirit is now MMM and SEN) WA, Flow FM (South Central/East) SA/VIC/NT and Rebel Media (Rebel FM, The Breeze) Qld should be allowed to transmit using high frequency DRM.

Australia with its population of 25 million was based on Census 2021 has had high frequency radio for a long time is now planning a DRM national, local and regional rollout, and considering they have hundreds and thousands of local communities, they will be using high frequency DRM.

Over 14 years ago, 2ME Radio Arabic has become Australia's first commercial broadcaster to use its own existing AM radio frequencies to broadcast in digital using the Digital Radio Mondiale (DRM) platform. The station is using a converted Blythe DRM transmitter broadcasting from Homebush Bay to simulcast its 2ME programming on AM 1701. It will be able to hear 2ME's signal on DRM digital transmissions.

After almost 16 years ago, The ABC has successfully broadcast what is likely to be the first standard DRM (Digital Radio Mondiale) signal transmitted in Australia.

It is planned in the future, the LPON, HPON and MF-NAS radio services will be expanded to digital radio across Australia in the future, while the national, commercial and community digital radio services has yet to planned in extending digital radio rollout into regional Australia over multi-year period.

Once the national, commercial, community, narrowcast and narrowband digital radio services are on-air, the capital city and regional rollout of digital radio will be complete by multi-year and beyond.

The installation of VAST receiver boxes, re-point the dish to OPTUS satellites across Satellite dishes to digital transmitter downlinks of supplying signals for VAST radio services at the various radio station transmitters in all metropolitan, regional and remote areas.

For example, the satellite dishes could be installed for TX sites through AM, FM and digital transmitters of Radio National, ABC Local Radio, ABC FM, ABC News Radio, JJJ, SBS Radio, community radio stations, Vision Christian Radio, Hope 103.2 Sydney, Faith FM, RadioTAB (QLD, NT, SA, TAS), Vintage FM (NSW), RPH Australia network of stations, NIRS, indigenous community radio stations, other radio services and DAB+ digital radio multiplex services were located at various transmission sites.

The Optus C1 and D3 will supply the new satellite feeds of almost 100 radio channels to be rolled out of VAST radio services expands to DAB+ satellite platform in rural and remote areas.

Provide funding for our digital transmission costs, plus an expansion of satellite equipment to digital TV transmission services, allow community television to broadcast as simulcast in HD (MPEG-4) on digital once the broadcast community TV stations in Melbourne and Adelaide to 3 year licence extension until 30 June 2024.

A long term commitment to a full "7MHz" channel for community TV. Some of the transmission equipment, a TV transmission tower and a satellite dishes have transferred from old Channel 8 studios located at 51-59 John Watson Drive Mount Gambier to digital TV broadcast site at Mount Burr in south east SA.

A co-operation with the Federal Government and regional commercial TV networks have given approval for a digital TV transmitter to be installed with satellite equipment such as transmitter downlinks, dishes, VAST receivers and the satellite TV distribution network to be designed and implemented systems to allow transmissions of services on digital TV and VAST platforms to their transmission sites of Prime7, SCA 10, 9NBN, WIN Television (QLD, NSW/ACT, VIC, TAS), Seven Queensland, SCA Seven Tasmania, 10 Tasmania, 10 Mildura, WIN Mildura, SCA Seven Darwin, 10 Darwin, WIN Griffith, WIN SA, SCA GTS/BKN, SCA 10 SGS/SCN, SCA Nine GDS/BDN, SCA Seven Central, Imparja, 10 Central, GWN7, 10 Western Australia and WIN WA, these channels feeding some hundreds and thousands of sites allow a simple and cost effective distribution system via the OPTUS satellites.

We're giving a crystal clear Digital TV reception have an upgrade to HD formats. WIN has invested in the digital transmitters, which will deliver the WIN 7, 9 and 10 services in Griffith, Mount Gambier and Riverland will be upgraded to HD, as well as ABC and SBS digital transmissions nationally and WIN Television services in Southern NSW/ACT, Northern NSW/Gold Coast, Regional QLD, Regional VIC, Mildura, Tasmania and Regional WA.

The Australian TV channels and programming is also relaying into extend their coverage of rebroadcast partners will cover the Asia-Pacific region from PNG to Indonesia.

VAST receivers are DVB-S2 with MPEG-4 decoding for HD and SD signals, to work with satellite delivery of DTH transmissions could access to digital TV, viewers who are outside terrestrial coverage of national and commercial broadcasters.

An new satellite installations of TV services to provided the equivalent of over-the-top streaming video on-demand services, Freeview, VAST, Foxtel, Fetch TV and other international satellite/cable TV services were increasingly to it's customers.

A new international satellite uplink in Oxford Falls, NSW for distribution of ABC Radio Australia and ABC Australia TV services in the Pacific, Asia and Indian regions we're shared with ABC Australia television operations at MediaHub and ABC Radio Australia operations at ABC Ultimo centre in Sydney, as well as ABC Southbank centre in Melbourne.

The Department of Foreign Affairs and Trade to congratulates them on providing supporters of Australian broadcasting services in the Asia Pacific region to their local audiences, we have the digital radio and TV rollouts for ABC Radio programming through ABC Radio Australia, Australian TV programming through ABC Australia and Australian free-to-air TV content from PacificAusTV for Pacific broadcast partners will supply the best content is delivered via satellite feeds in technical systems.

WIN outsources few channels to MediaHub will be a multiple links between WIN Television studios in Wollongong, Griffith, Charlestown, Canberra, Maroochydore, Ballarat, Mildura, Hobart, Mount Gambier, and Bunbury, Channel 7 studios in 5 capital cities, Network 10 studios in Sydney, Brisbane, Melbourne, Adelaide and Perth, Channel 9 studios in 6 capital cities, Sky News studios in Sydney and the MediaHub facility at Ingleburn in NSW.

The Budget also supports digital radio services had an ever increasing numbers of Australia's population living and travelling throughout the metropolitan, regional and remote areas – currently extends it's reach to more than additional 10,000,000 listeners who have access to your favourite stations.

The DAB+ satellite services provides the range of Remote Area Broadcast Service (RABS) radio channels of ABC and SBS, including Radio National, ABC Local Radio, ABC FM, ABC NewsRadio, JJJ and SBS Radio, plus DAB+ satellite platform could carry the VAST radio services for the first time in radio history.

We got the internet-delivered Broadcast Video-On-Demand (BVOD) platforms (ABC iview, SBS on Demand, 7plus, 9Now, 10 Play) provided episodes of catch-up TV programs on-demand, movies live and on-demand, news bulletins on-demand, live streams, live streaming of live sports, video clips, and full list of TV shows and movies.

We are expanded long-distance digital TV reception in south-east SA and western VIC is variable but we access to local Victorian and SA stations such as the ABC TV and SBS TV Victorian services, Prime7 (Seven programming), SCA 10 (10 programming), WIN VIC (Nine programming), the ABC TV and SBS TV SA services and WIN SA (Seven SA, Nine SA, WIN 10 SA).

While the new long-distance digital TV reception in Riverland SA and Mildura VIC is variable but we access to local Victorian and SA stations such as the ABC TV and SBS TV SA services, WIN SA (Seven SA, Nine SA, WIN 10 SA), the ABC and SBS Victorian services, Prime7 (Seven programming), Mildura Digital Television (10 programming) and WIN Mildura (Nine programming).

Indigenous Community TV is planning to expand it's a new digital terrestrial free-to-air licences across remote Central and Eastern Australia, including Mount Isa in Queensland.

Remote communities with digital terrestrial repeaters had begun to install equipment to automatically expand the channels of Imparja's digital terrestrial transmitter network are relays of both Channel 9 programming through Imparja, 9Gem and 9Go! channels and ICTV is broadcasting a full time services.

A successful transition for community radio broadcasters is needed to go digital radio rollout across the regions in near future.

Outside of the metropolitan areas, the national broadcasters (ABC and SBS), commercial TV services (mainly regional stations broadcast Seven, Nine and 10 programming), open narrowcasting services are transmitted terrestrially and via direct-to-home satellite in regional and remote areas.

As well as a successful transition from analogue radio to Digital Radio Mondiale in Australia for the next 10 years, the AM/FM analogue radio could accept the DRM signals in most regions were rolled out.

The dish and equipment supplied and installed at the pay TV providers to supply satellite feeds for providing free-to-air satellite services of International TV channels digitally with the motorized and fixed systems, for example there was Al Jazeera, France 24, DW (German, English), RAI (Italian), ANT1 Pacific (Greek), NHK (Japanese, English), CNA (Channel News Asia Singapore), ABS-CBN, Russia Today, various foreign language channels, Voice of America TV, BBC World News, ABC Australia TV (broadcasting throughout the Pacific and Asia), CGTN, EWTN and more.

For example, this satellite dish and equipment supplied and installed for ABC Australia TV is relaying to Asia-Pacific region will be above the radio and TV studios at the ABC in over 8 capital cities from Canberra to Melbourne, one of the many dishes installed at Millicent for Italians living in South East SA to enjoy the Italian TV channel RAI with no monthly fees and this dish, hardware and equipment can be called upon by the sports venues and local sports clubs to supply satellite feeds for live sports such as AFL and NRL, the Footy Direct service is a cable TV's new sport channel mainly live and replayed games for Australian rules football and rugby league to secure the broadcast rights of footy seasons for many cable TV subscribers, the AFL and NRL match content has been sub-licensed to Fetch TV in Canberra, Ballarat, Geelong and Mildura by Channel 7, Channel 9 and Fox Sports.

However, the Redwave Media stations Red FM and Spirit Radio in Geraldton, Karratha, Port Hedland, Broome and remote WA will be rebrand to Southern Cross Austereo's Hit FM and Triple M stations across regional WA since March 2020 will be reinvested in extending digital radio rollout in Western Australia.

While the Sports Entertainment Network's SEN Spirit 621 Bunbury had plans for an expansion to digital radio rollout in regional WA, it comes after Spirit Radio to be rebranded as SEN WA in Bunbury from August 2020 in last 2 years.

In addition, the achievements had awarded a new digital licenses to get all analogue (AM/FM) services of ABC, SBS, commercial, community, LPON, HPON and MF-NAS were reinvested in extending local and national digital radio rollout over the next few years, when the Gold Coast DAB+ services had launched in regional QLD from it's completed later in 2021 from last year onwards. We have a microwave links provided to the local TV towers for program transmissions in regional and remote areas.

Regional Community TV is intended to be an Community Digital TV service, which would be operated by ACTA. New Regional Community TV service would operate as an monopoly affiliate of Melbourne's C31, Adelaide's C44 and Perth's WTV, and would operate with a program feeds from that station in much the same way as Commercial Regional TV stations operate. However, there would be breakaway programs from the local area, and some programs from Access 31 Perth, TVS Sydney, 31 Brisbane, and BushVision Mt Gambier would be included in place of the Melbourne and Adelaide feeds.

There will be a mixture of local content including local news, Community Billboard service and many more. The station at broadcast facilities, would have an automated presentation system controlling the breaks in the feeds from C31 Melbourne, C44 Adelaide, WTV Perth and for the inserting of local content, it was located at C31 studios in Melbourne, ABC Adelaide studios in Collingswood and ABC Perth studios in East Perth, as well as an OB Van with facilities for a local live links back to the studios.

This proposal had first other digital channel would be a feed of Indigenous Community Television (ICTV), it would also be proposed to sell the airtime on the second other channel is a feed of Expo Channel.

We have pay TV satellite and IPTV systems was a lot of international channels such as DW (German, English), Channel News Asia, France 24, Euronews, NHK World Premium, ABS-CBN's TFC and more, alongside Greek TV, Italian TV, premium Chinese content, world news, premium sport, adult entertainment, and pay per view events.

Regional Australia has an unused UHF digital transmitters that the new community TV service has permission to use, but is awaiting a Trial Community TV license to go full time so it can broadcast programs locally inside a community TV format, like Rural News, educational programs, information only programs and more, the transmissions will also allow a Regional and Rural community TV station as just like the former home to Bushvision Mt. Gambier to expand the national service in near future, C31 Melbourne and C44 Adelaide should be seeing Bushvision and MELfeed.video content as co-operate in exchanging suitable programs with one another, the new Regional Community TV service will be broadcast Free to Air on the digital satellite platform VAST, once the community TV broadcast licences in Melbourne and Adelaide for 3-year extension, which was expired on 30 June 2024 before the expansion of digital community TV content to reach their multi-year extension. We have install a satellite dish and equipment to receive the Optus satellite signal for VAST radio and TV services and new national channel of Regional and Rural community TV service. They had viewers in Mount Gambier SA and other regional and rural centres of Australia to receive a new national community TV license from ACMA which will enable them to transmit C31 Melbourne, C44 Adelaide and WTV Perth's Freeview signal around their local towns. In the coming years, Bushvision was originally changed into new Regional and Rural Community TV service, it broadcasts on UHF channel 35 digital in the future expansion, but there's a non-profit organisations that provides community TV services across Australia.

The terrestrial transmitters, direct-to-home satellite feeds and re-broadcast via relay transmitters to receive their microwave links to signals direct from the satellite using their own satellite downlinks, we have free-to-air TV stations are also re-transmitted via pay TV providers, it displaying free-to-air broadcasts sports events in pubs, clubs and accommodation venues (hotels, motels, resorts) etc. We have various regional TV stations had sole affiliates purchases much of its programming from the Seven, Nine and 10 networks, as well as indigenous programming, local news, locally produced programs and community information to the local, rural and remote communities throughout regional Australia, outside of all capital cities.

We supply, installation, repairs and maintenance of TV antennas and satellite dishes to provided free-to-air digital TV, VAST black spot satellite, VAST satellite, pay TV, international satellite TV and Christian satellite TV for local installers of satellite systems and services of TV antennas in your area.

As a major funding initiative, digital radio coverage is currently being expanded in regional centres with populations of 10,000 and above, Over a multi-year period (2022–29) approximately DAB+ and DRM transmission services will be installed to deliver a potential increase in population coverage to 100%.

Communications Minister Paul Fletcher MP are committed to working with the Government to create a more certain funding environment and would welcome a partnerships with the federal, state and territory Governments, radio

broadcasters and TV broadcasters as well as pay TV providers, streaming services and satellite systems to ensure the student's public good contributions for all Australians can continue to support the federal budget funding.

Additional funding for supporting Australian radio and TV content to international broadcasters

The Government is commitment to support Australian radio and TV to international audiences for additional cost of \$1.8 million dollars to be reinvested in expanded radio and TV services and content in down under.

ABC Radio Australia continues to broadcast it's range of programs from domestic ABC Radio networks across the Pacific region, Rebroadcast partnerships between ABC Radio Australia and local radio stations across Asia, the Pacific and rest of world to expanded satellite relays of Radio Australia broadcasts on 400+ radio partner stations around the world, World radio partners include BBC World Service, Deutsche Welle, NHK World, Radio Canada International, NPO Radio Netherlands, Radio Sweden, Radio France Internationale, Voice of America, Radio New Zealand and more will expand it's utilising our resources of Australian material from ABC Radio Australia, ABC Australia TV is distributed to rebroadcasters and syndication partners across Asia, India and the Pacific, along with PacificAus TV broadcasts a variety of Australian television programs syndicated to Pacific broadcast partners. Radio Sport NZ and FM 100 PNG also broadcasts NRL and AFL coverage from Nine Radio's 2GB, 4BC, 3AW and 6PR stations throughout overseas, EMTV and TVWAN in Papua New Guinea broadcasts Australian TV content for example, Our various Australian TV programs are syndicated to Asia Pacific region, and worldwide sales to networks provided Australian TV programming to various TV networks/channels and home entertainment distribution partners around the world, such as Australian TV shows was sold to TVNZ, Three, Prime, Maori TV and SKY TV in NZ.

Conclusion

This was the 2022/23 Budget took the multi-year deal with targeted funding allocated under the previous estimates to first two multi-year deals are 2020-21 and 2021-22 budget funding is supporting digital radio, TV and international media services. Clearly it's time for the Federal Government to recommit to Australian digital broadcasting from our partners and to plan for sustainable radio and television budgets that meet international standards.

I would like to acknowledge the process of each pre-Budget submission to provided completion of radio and television services, digital broadcasting services and international media services is working with the Government that supports ABC and SBS funding, as well as media diversity in Australia is our media outlets, thanks everyone to show your support new media landscape and explore the funding of Australian media services from domestic and overseas, who have a range of radio and television services and content to all Australians. We encourage the Government to recognise the important role of digital radio, digital TV and pay TV and include our sectors when designing and implementing measures to enhance Australia's media landscape – for example, the improvement of the digital radio and television coverage in crystal clear reception, on behalf of Paul Fletcher MP.

Thank you for taking the time to this submission, we're glad you to see more of an expansion of digital radio and TV rollouts across Australia in plans for the future, I look forward to switch on digital broadcasting services to re-scan your radio stations and TV channels, and then listen to radio and watch TV.

Kind regards,

Brendon Agpasa

Digital radio rollout

Peter Khalil in partnership with Paul Fletcher to provided the analogue radio services of ABC, SBS, commercial, community, narrowcasting (LPON, HPON, MF-NAS) and Retransmission would be expanded to be simulcast in digital formats on DAB+ and Digital Radio Mondiale across the all radio licences in your local markets.

In addition to DAB+ stations in all capital cities, the Government in funding support to help various analogue radio stations will make the transition to digital radio broadcasting, this sees Digital Radio Mondiale was expanded as exported to Australia, as well as regional radio stations are converted to digital radio services.

The conversion from AM frequencies to FM frequencies in solo markets of regional areas should be expanded to infill transmitters of DAB+ and DRM multiplex services, as well as various DAB+ only stations from radio broadcasters extends into regional and remote areas of Australia.

Extended coverage of digital radio to metropolitan, regional and remote Australia will be improved to have crystal clear reception, the digital radio mondiale (DRM) was exported and expanded to across Australia includes DRM simulcasts the expanded AM band and FM band options, and the new DAB+ satellite service to deliver the range of radio channels from Viewer Access Satellite TV and additional radio services across the remote and rural areas.

Digital TV and Pay TV rollouts

Peter Khalil in partnership with Paul Fletcher intends to provide the digital free-to-air terrestrial, subscription satellite, subscription cable and internet TV services as part of these reinvestments for digital TV and pay TV.

There's a new licence for commercial broadcasters to operate a new sixth channel in 600 MHz band is suitable for under their existing commercial television broadcasting licence, and it will remain subject to existing regulations.

We have three 7 MHz multiplexes shared between five broadcasters when the Government requires it. We have additional spectrum that is planned for transition from 14 MHz in Melbourne and 7 MHz in Adelaide used for local community television services to a new national community TV service in all metropolitan, regional and remote areas of Australia is reallocated to Australian Community Television Alliance was pending, as well as additional spectrum that also is planned for remote central, eastern and western Australia to have a digital terrestrial free-to-air licences of Indigenous Community Television via satellite feeds in retransmission was pending.

Australian regional TV stations involved in the realignment again across the regions to see an completed affiliation changes occurred since July 2021 to include WIN Television (Southern NSW, ACT, Griffith, Regional Queensland, Regional Victoria, Mildura, Tasmania, Mount Gambier, Riverland, Regional WA) to reach an affiliation deal with the Nine Network, as well as WIN Television Northern NSW, WIN Television Griffith, Southern Cross Austereo's Nine affiliated stations is now SCA 10 (Southern NSW, ACT, Regional QLD, Regional VIC), Mildura Digital Television (Mildura VIC), Southern Cross Austereo's Tasmanian Digital Television, WIN 10 (Mount Gambier SA, Riverland SA) and West Digital Television (Regional WA) would reach an affiliation deals with Network 10 from ViacomCBS for a extended multi-year agreements, as well as Southern Cross Austereo and WIN Television took a multi-year deal with Australian News Channel to carry Sky News Australia content on a free-to-air channel as Sky News Regional, it broadcasts across Southern NSW & ACT, Regional QLD, Regional VIC via SCA's regional markets, Northern NSW, Griffith NSW and Eastern SA via the WIN Network and joint ventures in Mildura VIC, Tasmania and Regional WA.

Under the new arrangements, all TV broadcasters will make a transition to a new licence and plan to use a combination of DVB-T, DVB-S2 and MPEG4 technologies in the process of developing the new channel arrangements and the 7 MHz multiplexes.

Contribution to technology transition costs for broadcasters, we're making the costs of multi-million dollars in funding for digital TV rollout, examples include transmission equipment, satellite equipment, playout facilities, antennas, satellite dishes, live video streams and more.

We have upgrading transmission equipment and technology to deliver the satellite transmissions and 4K TV broadcasts for the ABC, SBS and the regional commercial broadcasters is serving regional, some metropolitan and remote audiences.

When the Federal Government takes to support digital TV rollout, it should prioritise content and support for digital TV channels, as this is such a vital audiences. I would like to see free-to-air channels in your local markets and I hope that the Minister Fletcher to continue to reinvest in digital TV rollout is completed.

The commercial television broadcasters in Southern New South Wales, Canberra, Northern New South Wales, Griffith, Regional Queensland, Regional Victoria, Mildura, Tasmania, Mount Gambier, Riverland, Spencer Gulf, Broken Hill, Darwin, Remote Central and Eastern Australia and Regional Western Australia will deliver it's all of digital multi-channels from Seven Network, Nine Network and Network 10, it will be complemented by primary channels from regional affiliates of the Seven, Nine and 10 networks across regional, remote and some metropolitan Australia.

The Federal Government intends to have broadcast licences of Community TV was extension to at least in June 2024, in ordered broadcasters to extend broadcast licences of community TV stations in Melbourne and Adelaide as well as an online-only model in Perth, providing an open-access, free-to-air platform for independent stations.

Additional channels on digital TV to include Indigenous Community Television (ICTV) satellite channel expands to free-to-air terrestrial licences in regional and remote areas, the new National Community TV channel proposed carried by local community stations (C31 Melbourne, C44 Adelaide, WTV Perth) and datacasting channels is mainly advertorial datacasting services and live horse racing coverage.

The internet-delivered Broadcast Video on Demand (BVOD) platforms (ABC iview, SBS on Demand, 7Plus, 9Now, 10 Play on demand) to provide Australian and overseas content which can be viewed through live streams, catch-up TV episodes and video clips over the internet.

Pay TV services to deliver the range of channels and services from the Australian FTA TV broadcasters, pay TV providers and SVOD services including free-to-air retransmissions, Foxtel channels, streaming services and more.

Satellite services provided the range of international TV services including various Ethnic TV channels in many languages, Italian TV channels, Greek TV channels, Spanish TV channels, Arabic TV channels, various other foreign language channels, Channel News Asia, NHK World (English, Japanese), ABS-CBN's TFC and lots more, this was pay TV subscription to carry free-to-air satellite services.

In addition to Fetch TV provided IPTV channels, the pay TV subscription providers will also carry the streaming services such as various over-the-top streaming video on demand providers.

ABC's expansion of international media services

Peter Khalil for the Government is working with the ABC to have Budget funding of international media services will reach a new deal is set for a minimum seven-year term and for access to Integrated International Media Service for its international markets including Asia, the Pacific and India.

Show your support for media diversity, Australian media services in the Asia-Pacific and the ABC funding in the Budget, the Government that you have committed to international radio, television and news services.

Our new capability to include ABC Radio Australia broadcasts to audiences across the Pacific, these two broadcast streams (English service, Multi-language service) are delivered via a network of local FM stations as well as by satellite and the internet (ABC Radio Australia website, the ABC Listen app).

Radio Australia produces daily 30 minute program in Tok Pisin (Wantok). Our language services now involve significant collaboration with SBS Radio. New Daily news bulletins, hour-long daily program and weekly week-in-review program in Asian language service that consists of Khmer, Burmese, Chinese (Cantonese, Mandarin), Indonesian, Vietnamese languages, it has maintained its flagship daily morning news and current affairs program, Pacific Beat, produced by the Asia Pacific News Centre. The network broadcasts a mix of programs across the day including ABC Sport's NRL, AFL, Melbourne Cup and rugby union coverage, as well as English content drawn from multiple ABC radio networks including Local Radio, Radio National, and NewsRadio.

ABC Radio Australia to reinstate its expanded rebroadcasting partnerships throughout the Asia-Pacific region and rest of the world, these include nearly 400+ radio partner stations around the world, including a number of daily satellite relays, as well as international broadcast partners in co-operation with ABC News Radio, and Radio Australia programs was syndicated to partners in the Pacific and Asian markets.

This distribution network includes rebroadcast partners, syndication partners, and satellite have all of which provide extensive reach to local audiences and expats alike. ABC Australia TV delivers a diverse range of Australian content including news and current affairs, entertainment, sport, comedy, drama, kids, documentary, arts, education, lifestyle and English language learning, we have best content is supplemented by ABC International commissioned programs.

ABC Australia iView allows you to access a selection of flagship ABC programs in your region, as well as ABC iView has expanded live streaming of ABC Australia follow the Indo-Pacific program schedule to domestic and overseas audiences across Australia, Asia and the Pacific regions.

The dedicated Asia Pacific Newsroom delivers digital and broadcast stories about the Pacific and Asia in English and Multi-languages as part of international newsgathering capabilities to provided news and current affairs content with a focus on Melanesia, Polynesia and Micronesia, along with international resources of world news from ABC Radio Australia, BBC World Service, Voice of America and many more, the new-look overseas bureaus of ABC provided radio, television and news services to be based in Japan (NHK), Philippines (ABS-CBN) and Singapore (Mediacorp).

ABC International Development is working alongside radio and television broadcast partners that supports public broadcasting, educational broadcasting and emergency broadcasting activities in Asia and the Pacific regions.

Sister cities around the world

The sister city relationship is a form of social agreement between two geographically and politically distinct localities for the purpose of promoting cultural and commercial ties, sister cities became increasingly used to form strategic international business links among member cities, and may include localities of any scope such as villages, prefectures, or countries.

We got many features and benefits includes free-to-air, digital quality sound, more choice of stations, niche formats, information on-screen, slideshow, data such as text, pictures and Journaline, Emergency warning alerts, Electronic Programme Guide (EPG), Digital Radio receivers and many more.

Digital Radio rollout is working with ACMA to provided the future delivery of radio services.

Digital TV provides the range of free-to-air channels, we got better pictures, clearer sound, 16:9 widescreen, extra channels, additional programming, and many more in your local markets.

There's ghosted analog 4:3 pictures in digital format, crystal clear reception, sharper & clearer widescreen digital pictures, standard definition broadcasts, high definition, MPEG-4 stereo sound, datacasting, multi-view services such as video program guides and now-and-next program information, Electronic Program Guide, closed captioning, and audio streams of radio channels from ABC and SBS.

Receivers includes TVs, TV set-top-boxes and personal video receivers with in-built digital TV reception capabilities, the UHF and VHF antennas will be receiving digital TV.

This device enables a television set to receive and decode digital television broadcast in high quality Set Top Boxes, a set top box, TV and PVR is necessary for television viewers who wish to use their old analog television sets and new digital television sets to receive digital broadcasts and multi-channels.

DVB-T2 that receives Free-to-Air signals, each TV set and a set top box will see digital TV services to support 4K Free-to-Air channels in the future, as well as 4K test transmissions.

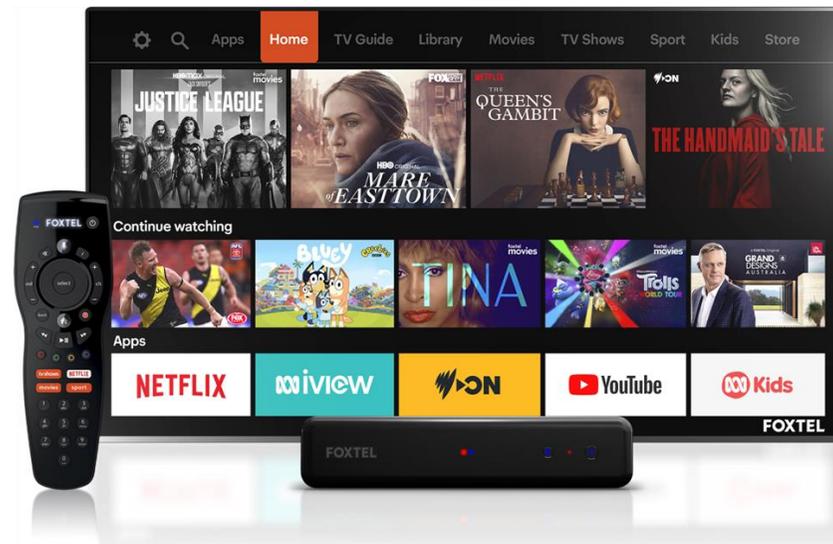

The Australian Government is working closely with pay TV providers and streaming services to ensure the smooth expansion of channels to pay TV across Australia in Budget 2022-23.

As part of this reinvestment of pay TV rollout, subscription TV providers give their customers access to digital free-to-air channels as part of their channel packages, as well as pay TV channels through Foxtel, MySat, Fetch TV, TV Plus, NHK World Premium, Canal+, ABS-CBN's TFC and more, plus International Satellite TV channels via cable, satellite and IPTV systems had as mixture of Christian and foreign language channels in Free to Air satellite services to be carried by the subscription TV services. Additionally, the streaming subscription and other internet TV services such as Netflix, Disney+, Stan, FlipTV Australia, iWantTFC, ZEE5 and many more are expands to included in pay TV channels and packages.

Apart from free-to-air retransmissions and pay TV services, each venue to supply satellite feeds for live sports and special events, such as AFL and NRL matches across the year.

The subscription TV providers will access to receive terrestrial digital TV channels, free-to-air satellite services, pay TV channels and live satellite feeds is delivered via satellite, cable and IPTV systems.

In metropolitan and country areas of all capital cities, regional Australia and remote Australia, the Federal budget includes an additional \$50 million in mental health support, including \$39 million over four years to expand acute mental healthcare capacity at local hospitals and health unit, investment focuses on expanding critical hospital services and increasing community and home-based health care.

This sees the establishment of the Federal Government's largest infrastructure investment up to \$5 billion over seven years to 2028-29, these include stage 2 of light rail in Canberra, expansion of local hospitals, new university and TAFE campus, the Terminal expansion projects in construction, refurbishments and runway extension in various Australian airports and construction, expansion and refurbishment of schools had been improved services across all the projects.

The government hopes to deliver a primary, secondary and high schools in few suburbs of each state and territory in over the future years, but over \$100 million to improving school amenities and facilities, as well as teaching, youth and support workers in education services.

The budget contains \$100 million towards community infrastructure, including parks, playgrounds, community centres and sporting ovals.

Alongside upgrading shopping centres in few suburbs of each state and territory, new Community and Education Centres will get underway at a cost of \$700,000.

The budget funding includes an additional \$500,000 for venues, schools, festivals and events across the country, as well as entertainment precincts in Canberra and interstate Australia.

The Federal Government's funding at additional cost of \$750,000 to include our lots of things to do from around Australia, including Early Childhood, Education and Training services, Sport and Fitness, Youth Services, Arts and Culture, Community Organisations, Places of Worship and Emergency services.

As well as Regional Infrastructure, Dining, Shopping, Accommodation and Excursions.

Plus, Entertainment, Visitor Information centres, Local communities, Rural communities, Remote community services and Indigenous communities included in this funding of investment.

Communications Minister Paul Fletcher to expand the digital radio services of ABC and SBS in regional and remote areas.

The budget of additional radio programming for the all regions, the ABC's request for funding would give people in regional and remote Australia are access to six DAB+ only stations, ABC Local's 45 regional radio stations, Classic FM, Radio National, News Radio and Triple J.

Also, the SBS's request for funding would give people in regional and remote Australia are access to five DAB+ only stations and programs from SBS Radio 1 and SBS Radio 2 broadcast on SBS National Radio Network.

In addition to digital radio services in all capital cities.

Listeners in the regional areas of NSW, QLD, VIC, SA, TAS, NT and WA would get ABC Digital Radio and SBS Digital Radio.

If successful the ABC and SBS's funding requests would be a positive result for listeners in all country areas.

Communications Minister Paul Fletcher to work with affected communities and the regional TV monopoly region to provide all the digital channels and community information in Limestone Coast and Riverland.

Our local TV stations SES-8/MGS-41 Mount Gambier and RTS-5A/LRS-34 Riverland via WIN SA (Seven SA, Nine SA, 10 SA) received Federal and SA Governments assistance to deliver services.

The Federal and SA Governments therefore, has a right and responsibility to work with the industry and community to ensure that the budget funding is getting ready a quality local service.

WIN Television received extra assistance for digital conversion of multi-channels (7mate, 9Gem, 10 Bold) from standard definition to high definition format because it was a regional broadcaster.

The digital TV rollout in multi-million dollars to providing all multi-channels of Seven (7mate, 7two, 7flix), Nine (9Gem, 9Go, 9Life, 9Rush), and 10 (10 Bold, 10 Peach, 10 Shake) as well as three primary channels should be expanded to broadcasting in eastern SA, alongside additional community information from local events in eastern SA to our partnerships, sponsorships and supporters of serving the local community services.

In development of digital broadcasting services for regional broadcasters, but the ABC proposal to deliver a regional local news services, as well as regional TV services in Mount Gambier and Riverland is relaying the Adelaide feed of ABC TV channel 2, as well as take some SBS TV programs and SBS sport was syndicated to WIN Television South Australia, plus satellite feeds of free-to-air TV broadcasters.

Additionally, the Federal, State and Territory Governments had a cost of \$200 million dollars in total to reinvest retail shops in shopping centres, homemaker centres and other local businesses to includes accessories, clothing, arts & craft, automotive, baby stores, book stores, newsagents, entertainment, cafes and restaurants, electrical & appliances, gym, health services, learning centres, technology, supermarkets, bottle shops, travel agents, toy stores, op shops, and more, as well as a cost of \$150 million dollars in total to reinvest Tourism and Hospitality, Services and Community Organisations, Beauty, Education Services and Schools, Health and Fitness, Cinemas, Ten Pin Bowling, Visitor Centres and lots more from your favourite few things to do.

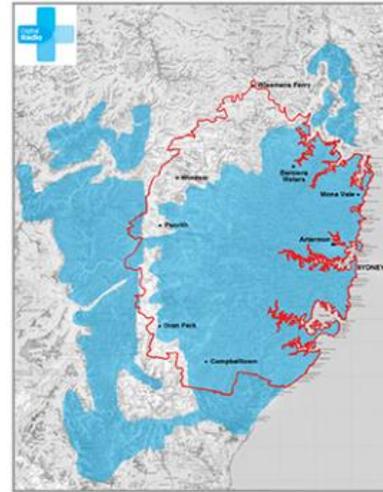

A proposal for Australian Digital Radio and TV rollout in radio and TV broadcasting services

By Chris Brendon Agpasa's
2022-23 Pre-Budget submission

January/February 2022

Total Coverage

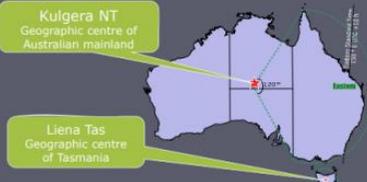

Green Coverage
Red No Coverage

★ HF DRM transmitter

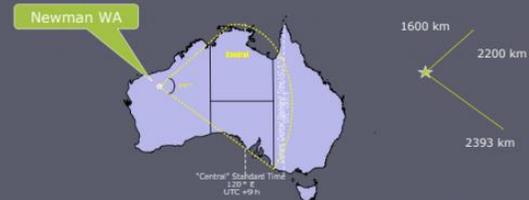

This coverage is suitable for live national coverage such as [Parliamentary NewsRadio](#)

Eastern Time Zone Coverage

This coverage is suitable for national programs for coverage in Eastern Australia
For example SBS Radio 1 & 2, Radio National, JJJ, ABC Classics,
Dig, ABC Jazz, ABC country & Grandstand
No program delays

Central Time Zone Coverage

This coverage is suitable for national programs for coverage in Central Australia
For example SBS Radio 1 & 2, Radio National, JJJ, ABC Classics,
Dig, ABC Jazz, ABC country & Grandstand
All programs are delayed 1 hour from Eastern Time

Western Time Zone Coverage

This coverage is suitable for national programs for coverage in Western Australia
For example SBS Radio 1 & 2, Radio National, JJJ, ABC Classics,
Dig, ABC Jazz, ABC country & Grandstand
All programs are delayed 2 or 3 hours from Eastern Time

Remote "Local" Radio

▶ An ABC Local Radio program and a pair of commercial radio programs from the nearest station can be received

Eastern Remote "Local" Coverage

Currently, there are some areas with no coverage. The map shows "local" programs in remote eastern areas. This will provide car coverage anywhere. 26 MHz DRM30 shower transmissions (NVIS) are best for these areas.

Remote "Local" Coverage SA

This coverage is suitable for "local" programs for coverage in South Australia. This will provide car coverage anywhere in SA. There are currently large areas with no coverage.

Remote "Local" Coverage NT

This coverage is suitable for "local" programs for coverage in Northern Territory. This will provide car coverage anywhere in NT.

Remote "Local" Coverage WA

This coverage is suitable for "local" programs for coverage in Western Australia. This will provide car coverage anywhere in WA. There are currently large areas with no coverage.

High Powered TV/FM transmitter sites, ideal for DAB+ or DRM+

- A single commercial broadcaster with twin programs
- Two or more commercial broadcasters

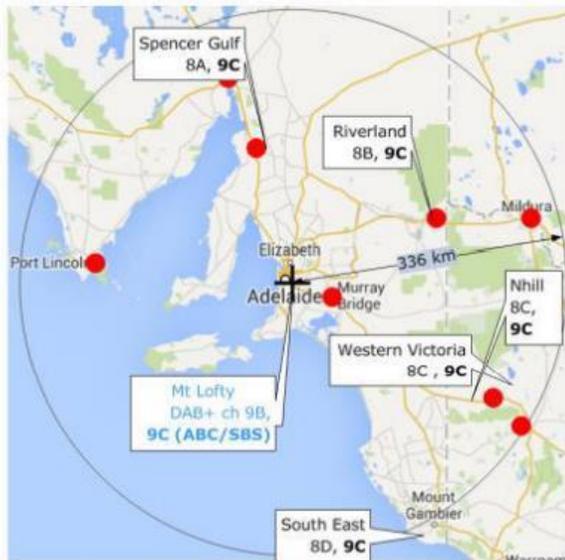

Community and High powered Open Narrowcasting omitted

High powered transmissions cannot use any site within 336 km on the same channel without interference. DAB+ channel 9C is a single frequency network with totally identical programs.

Only DAB+ channel 9A, 9D are vacant for future use within the circle

Band 3 DTV

Adelaide: SAS6, SBS7, NWS8, Unassigned 10, ADS11, ABS12
Mildura/Sunraysia: PTV6, STV7, SBS8, MOV10, ABMV11, UA12
Western Victoria: ABWV6, SBS7, UA, VTV10, BCV11, AMV12
All UHF only sites omitted

High Powered TV/FM transmitter sites, ideal for DAB+ or DRM+

ABC and SBS – radio stations, television channels, digital services

The new channel proposed from SBS TV - LOTE TV is a free-to-air television channel scheduling programs predominately in both English and languages other than English – with programs subtitled in English

- International content, with an Asia-Pacific emphasis

Exciting international content, including from our region, currently underserved in Australian media. Encouraging awareness and connection with global cultures and issues, for all Australians to develop a better understanding of the world and region we live in.

- English language tuition to support language learning

Targeted programs to support essential skills for new migrants to Australia, including familiarisation with Australian institutions and resources to help emerging communities engage better with Australian public life.

- Stories you would not know to search for
Exciting forms and genres curated for you beyond the barriers of language or geography. In an era of on-demand and user-led services, SBS will have a role in seeking out the best local international stories that will surprise and enrich the media experiences of audiences via subtitled original content.

A range of international comedy, animation, short film, soap opera, quirky game and lifestyle shows, 'cult' and new international movies. On SBS 4, audiences will watch their favourite Latin American telenovellas, Japanese anime, emerging Australian animators and a range of new, rich and engaging content navigated through the electronic program guide.

- Predominantly LOTE (subtitled)
SBS World will deliver more content in-language than ever before. Capitalising on the expertise of our subtitling unit, we can make it accessible to all Australians.

- Children's programming
For the first time, SBS will provide children's programs in LOTE (subtitled) benefiting language communities and also supporting language learning.

- Adding depth and context to significant stories
International documentary strands, investigative reporting, international news and current affairs, live and long-running sporting events that better inform audiences and take them deeper into their interests than can be offered on the main channel.

SBS will provide international perspectives on significant issues, such as French documentaries about religion in schools, African current affairs programs about aid and development, Chinese-language programming about climate change and behind the scenes on preparations for international sports events. SBS 3 will enable audiences to access different perspectives and in-depth coverage beyond the sound grab, in its original language, made accessible through subtitling.

- Stories that connect you to the world
The best documentary, drama and entertainment programs from around the world.

SBS will select the best of the world's content and make it available to all Australians through SBS's award-winning subtitling service. Adding to our exciting offerings such as *Inspector Rex*, *Inspector Montalbano*, *The Eagle*, *Anatomy for Beginners*, *Iron Chef* and *City of Men*.

- The best of international film
Fantastic free to air world movies programmed by theme, director or form and made accessible by SBS's award winning subtitling unit.

- Expansion of the WorldWatch service
In-language news services for more communities, running, in addition to an expanded current schedule, daily services in Hindi, Korean, Macedonian, Polish and Portuguese and others as they become available.

- New and exciting stories from our region
A range of content from the rich continent of Asia, including film, documentary, entertainment, drama and comedy from our Asian neighbours allowing deeper exploration of Asia than can be catered to on the main channel.

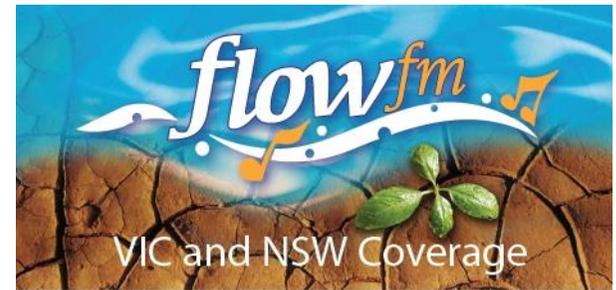

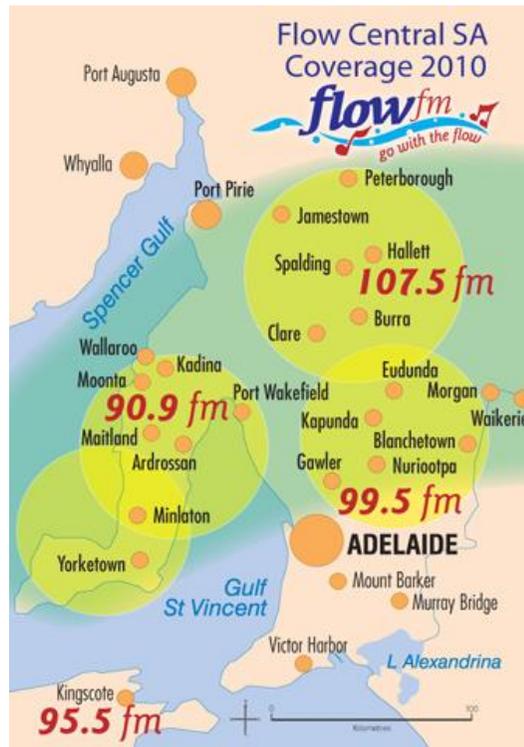

A range of content from Indian film, to Japanese anime to Korean soap opera, as well as in-depth current affairs and documentary on issues relevant to our region - including climate change, human rights, international migration and global business - allowing in-depth coverage in its original language, made accessible to all Australians through subtitling.

- Stories from the new Europe
Programming that explores the diverse cultures of Europe, with a deeper view of the social, cultural and political issues facing this changing continent.

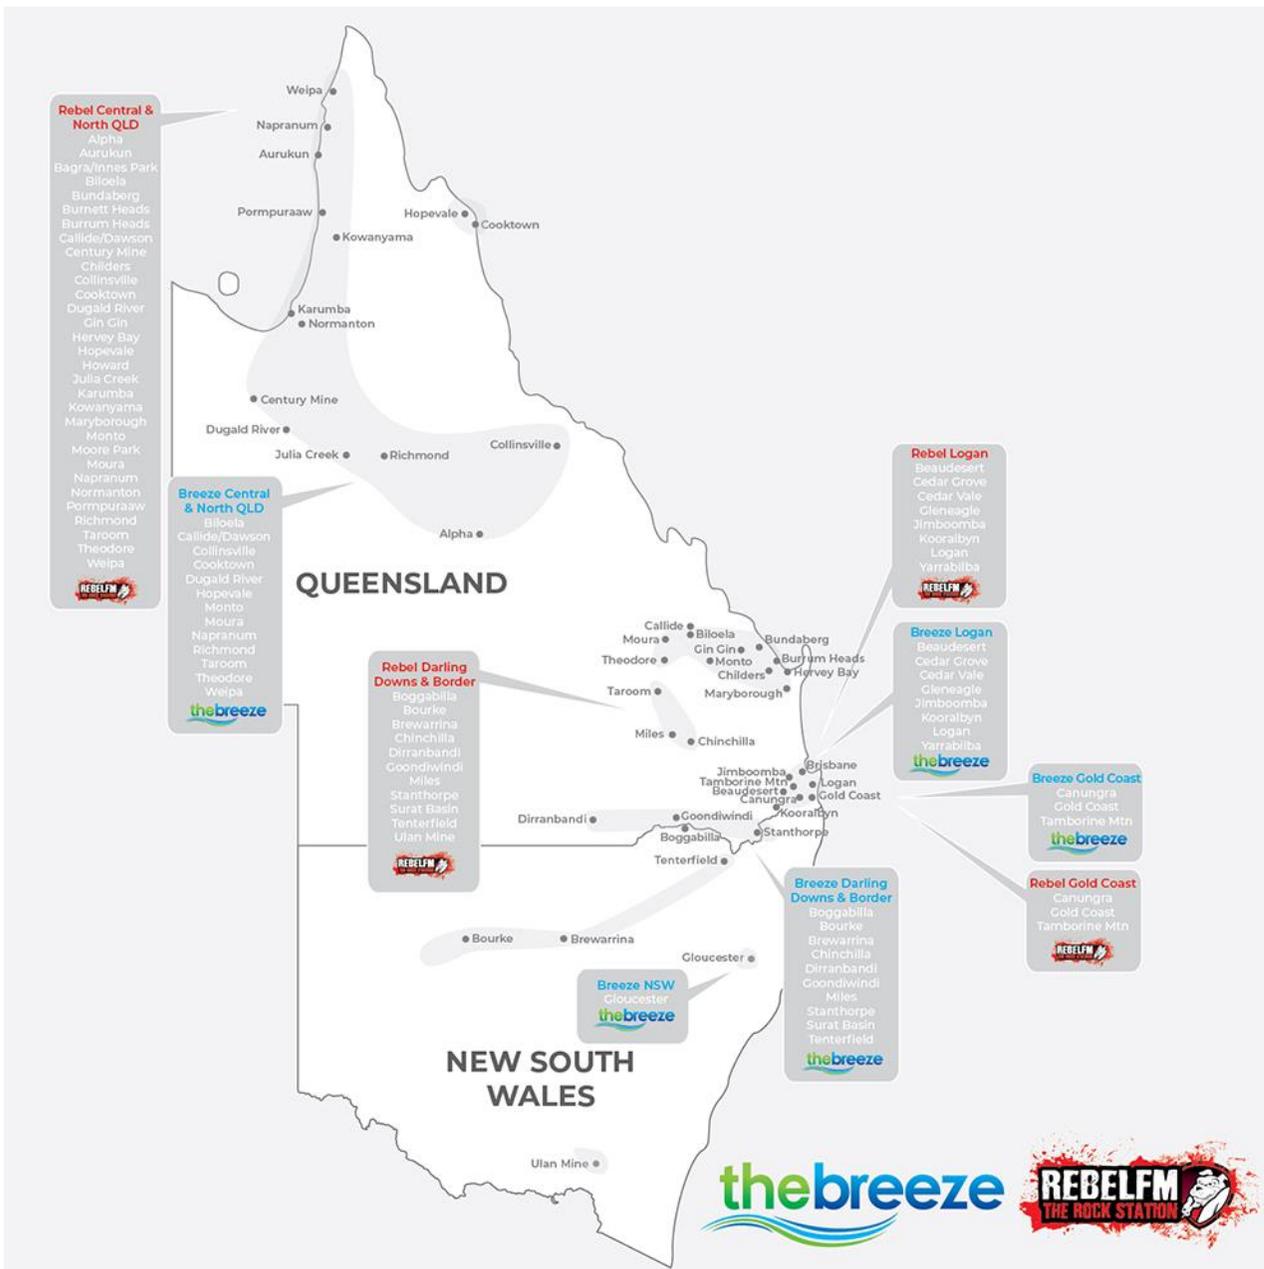

A range of European comedy, soap opera, 'cult' and new movies, current affairs and documentary exploring the varied cultural forms of the new European Union. On SBS 4, audiences will watch the best of Spanish film, French documentary, Russian comedy and food, travel, current affairs and arts programs that explore the diverse cultural forms and current issues of Europe.

In this option, SBS World would be adjusted to focus on regions outside Asia and Europe including, for example, the Middle East and Africa.

The ABC plans to have a dedicated ethnic digital radio station, providing Multilingual programming, as well as new version of old material from Melbourne access radio 3ZZ for the new digital radio station, in co-operation with ABC Radio Australia and 3ZZZ 92.3 FM.

The Government will fund the ABC to establish and operate a Digital Ethnic Radio Station providing Multilingual programming with ethnic groups of Australian content for multicultural communities, the new ethnic radio station is based in Melbourne, it broadcasts nationally on digital radio across Australia and internationally on Radio Australia in the Pacific region.

New Digital Radio station provided it's new version of Melbourne access radio 3ZZ broadcasts the English language service, multi-lingual programs and ethnic language programs, as well as other community access broadcasts, hourly news bulletins from ABC News and direct relays of the BBC World Service, Deutsche Welle Radio and Voice of America respectively.

Radio Australia
Overnight

New digital radio satellite services to listeners in regional and remote areas of Australia not accessible by analogue and digital radio, the radio broadcasters to provide DAB+ digital radio via satellite to eligible listeners in regional, rural and remote Australia, this will include access to range of radio channels from VAST satellite system, as well as additional radio services such as ABC Local Radio's 45 regional radio stations and more.

WIN Television Griffith

WIN Television Griffith is reaching over 68,800 potential viewers to its extended network coverage area in our regions of Griffith and the surrounding Murrumbidgee Irrigation Area (M.I.A.) regions, the WIN Network in Riverina MIA broadcast a mixture of programs derived from the sole affiliates of Seven Network (Seven/Prime Griffith, 7two, 7mate), Nine Network (Nine Griffith, 9Gem, 9Go, 9Life) and Network 10 (10 Griffith, WIN Bold, WIN Peach), as well as Sky News Regional also broadcast a mixture of news, current affairs, weather and sport content from Sky News and Fox Sports News programming.

WIN Television Northern NSW

WIN Television have extended their affiliation agreement with Network 10 for the regional market of Northern NSW for the next few years, WIN Northern NSW broadcasts a direct relay of Channel 10 Sydney to Northern NSW and Channel 10 Brisbane to Gold Coast will serve regional viewers, WIN News provided local newsbreaks from across the regions, WIN also transmits digital channels such as 10, 10 Bold, 10 Peach, Sky News Regional, TVSN and Gold via digital TV services.

Australian Community Television Alliance will provide funding for local community TV stations in 5 capital cities will be reinvested in the national digital community TV service in over \$3 million dollars, with existing capital city Community Television channels in Sydney (TVS - ceased December 2015), Brisbane (31 Digital – ceased February 2017), Melbourne (C31), Adelaide (C44) and Perth (WTV) is expanded to regional and remote areas in development of national community TV service.

We consider that the following areas must be prioritised when the Federal Government considers the Australian community television sector has also been allocated \$3 million in funding support to help cover the TV services in each business plan.

- An local community TV channel in Melbourne, Adelaide and Perth
- A national community TV channel in 8 capital cities, regional Australia and remote parts of Australia
- Program Contributors, Suppliers, Providers and Productions
- Various Community TV Programming ran for over 27 years
- Members and access affiliates of Community TV program groups
- Other Community TV Groups (it has begun communicating with these groups)
- Satellite TV (Indigenous Community TV, VAST)
- Pay TV (Subscribe to Foxtel will receive Aurora on channel 173)
- Digital Multichannelling (When all TV channels of ABC, SBS, Commercial TV and community TV are transmitting in digital only)
- Retransmissions in Outback Towns
- Web Streaming (CTV Plus delivers it's catch-up TV programs and live video streams, MELfeed.video past program streams)
- Technical and broadcast operations for community TV stations
- Cable Community TV channels via satellite in Ballarat, Geelong and Mildura
- Indigenous Community TV broadcasting in regional and remote areas
- Other external services (few things such as classic movies and TV shows, Deutsche Welle, Voice of America, Al Jazeera, RT World News, music video library, live broadcasts of various church services, student news from RMIT, infomercials, scenic loop, community services and many more)

The new national service of community TV broadcaster that communicates rural issues all over Australia, new national community TV service broadcasts on TV channel 44 digital, the local and rural communities to deliver it's information programs & local news was based in Mount Gambier, South Australia.

Community TV had plans to broadcast nationally throughout other capital cities and regional Australia, using the community TV stations in Melbourne, Adelaide and Perth as an initial area of the test transmissions, C31 Melbourne, C44 Adelaide and Community TV Broadcasting Inc. Perth is the possibility of introducing its community TV service to regional and remote Australia.

For local and rural communities, re-transmissions of Melbourne, Adelaide and Perth community TV stations would be implemented in regional and remote areas, the digital TV transmitters which can be utilised for retransmissions. Under the proposal, new regional community TV service would be distributed state-wide for local re-broadcast when C31 and C44 is not utilising the digital transmissions for its own programming nationwide, We would provide participating communities with an additional free-to-air TV service.

New service would take the community TV signals off air from Melbourne and Adelaide transmitters and feeds this signal to the satellite uplink, The new national community TV service in rural areas will be delivered via an Optus satellite to receive satellite dishes and digital satellite receivers for technical services and satellite equipment, the same as TV transmitters used to broadcast ABC TV and SBS TV, and regional areas towards a separate "cherry picked" rural community TV service that consists of community TV programming broadcast in 5 capital cities, as well as overnight loop.

World Radio Day 13th February 2023

World Television Day 21st November 2022

The hundreds and thousands of radio households all over the world will reach 1 billion listeners in 2022, coupled with the TV households worldwide will rise 1.74 billion by 2023.
