

Taskforce submission

As a citizen of Australia I ask that you support the development of a Australia Post banking system. It is imperative for rural Australia to have access to banking services and this would be a solution. Postal system being the 'people's bank'. It would aid in forcing real competition and postal banks are successful all over the world. Indeed the Commonwealth Bank started as a postal bank.

Therefore, I want you to endorse a postal bank system.

Kind regards

Anna Reygan
