

---

Dear Director,

Our financial adviser is not able to calculate the effect that this retrospective legislation, if passed, will have on both our super and personal investments and the amount of time to study the effects seems inordinately short for retrospective legislation going back six years.

At the very least the consultation period should be extended. All the feed back we have had is that this is bad legislation coming at a difficult economic time.

Yours sincerely,  
Tony and Sue Cobcroft
