

I object most strenuously to this proposed legislation and especially to the proposed retrospectivity provision. Retrospective legislation, of whatever kind, is always reprehensible and abominable. It always ensures that those affected are stymied in their efforts to make plans based on what was lawful at the time they made their decisions. It brings total uncertainty in decision making which leads to a lack of trust in governmental institutions. Why was this proposed legislation not flagged prior to the last election?

My name is Darryl James Hindle of Antill Ponds, Tasmania, enrolled in the Federal electorate of Lyons.

P.S. As a traditional Labor voter, I feel so passionately about this matter that, should the legislation be passed, my vote will absolutely be changing.

Sincerely.....Darryl Hindle.
