

Leave the dividends alone it's a fair tax system.

Stop trying to double tax people... it's illegal.

You told the voting public you would not stuff around with franking credit.

Have you also researched how many people will fall back onto the pension or some other form of welfare due to this tax grab for 10 million.

Waste of time and any political capital achieved by saying the franking tax will be left alone.

Shareholders are like business owners..

Taking a profit and paying personal tax on that money... fair and equitable..

Leave it alone..
