

---

Dear Director

On my own and my wife's behalf, both self funded retirees in our late 70s, I would like to object to the proposed legislation concerning the above. We believe the effect of it would create great uncertainty in the business world and its retrospective nature is of great concern to those such as us who rely to a great extent on dividend income for our daily needs.

I am sure that others better qualified than me will put detailed submissions to you concerning perceived flaws in the proposed legislation. However, I thought that I would register my wife's and my own attitude towards and opposition to it.

Yours faithfully

David Barnett
