Assistant Secretary Corporate and International Tax Division The Treasury Langton Crescent PARKES ACT 2600

By email: MNETaxIntegrity@treasury.gov.au

Dear Kathryn and David

Multinational Tax Integrity – strengthening Australia's interest limitation (Thin Capitalisation) rules

The Property Council of Australia welcomes the opportunity to provide a further submission on the *Treasury Laws Amendment* (*Making Multinationals Pay Their Fair Share – Integrity and Transparency*) *Bill 2023* (the Bill), following the report of the Senate Economics Legislation Committee and subsequent release of an Exposure Draft for public consultation.

The Property Council of Australia champions our largest industry, employing over 1.4 million Australians, contributing 18 per cent of our national tax take and shaping the future of our communities and cities. Property Council members invest in, design, build and manage places that matter to Australians: our homes, retirement villages, shopping centres, office buildings, industrial areas, education, research and health precincts, tourism and hospitality venues and more.

The Property Council continues to support the stated tax integrity objectives of the Bill. We welcome the Government's willingness to amend its legislation. Despite some improvements to the Bill, regrettably it remains that the drafting will capture the genuine business activities of the institutional property sector and the way in which they use debt to finance projects.

The Government has delivered important reforms to close the nation's housing supply deficit – including an announcement to reduce the MIT withholding rate on build-to-rent projects from 30 to 15 per cent, the passage of the Housing Australia Future Fund and the setting of a clear and ambitious target of 1.2 million new homes by 2029 matched by financial incentives. Should the Bill remain in its current form, few of the benefits of these reforms will be realised.

As currently drafted, the Thin Capitalisation rules will erode the Australian property sector's competitiveness as a destination for investment, which will constrain development and exacerbate the national housing supply and affordability crisis.

PROSPERITY | JOBS | STRONG COMMUNITIES

Not only will the Thin Capitalisation measures drive investment offshore, to countries like the US and the UK that provide special carve outs for the real estate industry, but they will hurt the millions of Australian workers and retirees both whose superannuation balances are invested in Australian property as returns come under pressure and the risk of the lack of investment flowing through to limiting jobs in the sector, right at a time the country is also battling a cost of living crisis.

To ensure a workable regime, that maintains the integrity of Australia's taxation system, we recommend:

- the introduction of transitional arrangements for the property sector to 1 July 2024; and
- amendments to the Bill in the form of Technical Drafting Amendments (**Appendix A**) and those set out in the Issues and Solutions Register (**Appendix B**).

Transitional arrangements

A short transition period is required to enable the property industry to apply the new amendments to assessments from 1 July 2024 (a 12-month extension).

Given that consultation on Treasury's numerous and complex technical amendments has only been open for 9 business days, our members have not been unable to fully quantify the impacts of the Bill on their operations.

A transitional carve out for the property sector until 1 July 2024 will:

- give Treasury sufficient time to amend the Bill to ensure that it is fit-for-purpose;
- allow industry time to become compliant with the new laws;
- provide clarity to industry (through its distributions to investors) so to not expose it to additional tax liability in FY 23/24; and
- provide certainty to the building and construction sector.

Due to the complex and varied nature of structures in the property industry, some businesses are disproportionately affected by the proposed changes and industry needs further time to understand the impacts to different business models.

A transitional period will provide the industry time to ensure it is compliant with the law from the day of implementation. As it stands, many trust/fund structures would be non-compliant from day one, resulting in significant legal costs for business and taxpayers.

A carve out will also provide certainty to industry, particularly fund managers, who have already made distributions to unitholders in the September quarter. A retrospective change to their tax liabilities will negatively affect investors who have engaged in good faith under the existing law.

The Property Council and industry stands ready and is committed to working with the Government during any transitional period to ensure that any measures are fit for purpose and result in no further unintended consequences.

Simple solutions

We have identified five issues which represent genuine business activities that do not reflect any risk to Australia's multinational tax regime but would be captured (we say unintentionally) by the Bill. These issues are set out below:

lssue	Description	Example of genuine	Solution		
		business activity			
1. Fixed Ratio Test -	Excess tax EBITDA	In an investment of \$100	Reduce the threshold to		
Excess Tax EBITDA	threshold and entity	million where you own	10% to align with the		
	restrictions create	100%, it is worth \$100	requirement to		

	artificial and inequitable distinctions between economically identical arrangements	million, you get full grouping effectively under the excess tax EBITDA rule.	disregard distributions and extend the excess tax EBITDA rule to cover trusts, companies and partnerships. Excess tax EBITDA from entities not subject to the thin capitalisation rules should be permitted – the general class investor requirement in section 820-60(2)(c) should be removed.
2. Third Party Debt Test – Stapled groups	No member of an open- ended stapled property group will be able to apply the Third-Party Debt Test because this will result in full denial of deductions on cross- stapled loans as the stapled entities are now considered associate entities.	One side of the stapled group holds real property assets, while the other side holds funds management rights. Banks will often lend to the side with real property assets, noting there is material security. This third-party debt is available without recourse to the assets of the other side of the stapled group. Operating as a stapled structure necessitates the ongoing existence of a cross staple loan which fluctuates based on available funding and expenditure requirements of each side of the group. It is not conduit financing (e.g., may be funded out of excess cash).	Remove the deemed third party debt test choice for entities that have entered into cross- staple arrangements unless the entities are members of an obligor group.
3. Third Party Debt Test – Development support	The Third-Party Debt Test will not be available where the third-party lender requires credit support while the owner of a completed development asset enters into leases with new tenants.	A bank providing a development funding facility for a build-to-rent project requires credit support until there is enough rental income to cover the interest costs. As leases cannot be entered into for residential property while the property is under construction (or if insufficient pre-leasing is entered into for a commercial property), time	The credit support concession needs to apply two years beyond the date of completion of the development to allow for stabilisation of the asset (highly relevant to build-to-rent assets).

		is needed to enter into	
		leases following	
		completion.	
4. Third Party Debt Test – Swaps	No deductions are available for the on- payment of swap benefits (i.e. where the conduit financer's swap arrangement with a third party is "in the money").	A conduit financer enters into an individual swap arrangement with a bank, under which it pays a fixed rate of 5% and receives the variable rate; the variable rate subsequently increases to 6%. The bank pays the conduit financer net 1% (i.e. the swap is "in the money"). The conduit financer on-pays this benefit to the borrower under the terms of the relevant debt interest (or under a back-to-back swap). This arrangement does not seem to be included in the carve out from the same terms requirement.	Disregard passing on of benefits associated with interest rate swaps for the purposes of the "same terms" requirement.
5. Third Party Debt Test - Capturing interest free loans	On-lending from an ultimate borrower on non-interest-bearing terms will result in a failure of the conduit financing requirements	A conduit financer on- lends on the same terms to a holding trust, and the holding trust on-lends on a non-interest-bearing basis to a subsidiary trust. The on lending by the holding trust fails the same terms requirements, meaning all debt deductions of the group fail the third-party debt conditions. Arrangements between wholly owned Australian entities (that are not able to form a tax consolidated group e.g. trusts) are potentially captured in the DDCR given its current drafting. This is clearly not within the stated policy intent of preventing erosion of the Australian	Exclude from the definition of relevant debt interest financing arrangements that are classified as associate entity equity ¹ . Exceptions should apply to exclude arrangements between wholly owned Australian entities.

¹ The associate entity equity definition will need to apply to general class investors for these purposes, noting that this term is proposed to otherwise be limited to financial entities only.

		tax base. Due to commercial and financing requirements, many Australian groups centrally manage financing with external banks.	
6. Debt Deduction Creation Rules - Exceptions	Exceptions from the DDCR for the acquisition of certain CGT assets (ie. new membership interests in entities, new depreciating assets and debt interests on the same terms) are ineffective.	A conduit financer borrows from a bank and on-lends to a head trust. The head trust uses the funds to subscribe for new equity in a sub-trust. This arrangement will be caught under the second limb of the DDCR s820- 423A(5) because the head trust has borrowed from a related entity to fund a payment to an associate pair. The exception for the acquisition of new membership interests is only relevant when applying the first limb s820-423A(2), not the second limb.	Exceptions should apply to both the first and second limbs of the DDCR and should permit on-lending at a lower (or no) interest rate.

Critical issues & Issues and Solutions Register

Further to the simple and genuine business activities outlined above, there are four other critical issues that require amendment in the Bill.

Whilst more complex than the previous proposed amendments, these represent significant concern for the property industry and require further analysis by Treasury to ensure the Bill is fit-for-purpose.

lssue	Description	Example of genuine business activity	Solution
7. Debt Deduction Creation Rules – Interest Free Loans	General working capital (interest free) loans result in denial of interest deductions under the Debt Deduction Creation Rules	A fund has multiple assets held in separate trusts (Trust A and Trust B), the group is managed as a collective business and cash funding requirements are sourced from activities of the group as a whole, resulting in numerous intra-group interest free working	Exclude associate entity equity ² from being: • "payments or distributions" under the DDCR, or • "relevant debt interests" under the conduit financing TPDT

² The associate entity equity definition will need to apply to general class investors for these purposes, noting that this term is proposed to otherwise be limited to financial entities only.

8. Debt Deduction	The extremely broad	capital loans being created that change on a regular basis as cash is needed. As a result assume Trust A has an interest free loan to Trust B. Where Trust A is a borrower (e.g. it has a loan from a conduit financier) the interest free loan from Trust A to Trust B is a relevant debt interest and can therefore cause a failure of the Third Party Debt Test. The interest free loan from Trust A to Trust B is also a "payment" that can result in the Debt Deduction Creation Rule applying to the loan between the conduit financier and Trust A.	Provide the
Creation Rules – Discretion of Commissioner	operation of the DDCR to eliminate interest deductions is very likely to give rise to outcomes that are not aligned with the policy intent	consequences of the Bill are realised based on the extremely broad drafting, the Commissioner cannot generally apply any flexibility in administration of the law.	Commissioner of the ATO with a broad discretion not to apply the DDCR to a particular arrangement
9. Third Party Debt Test - Credit support	Credit support exclusion is very broad and can apply to common third- party commercial arrangements and to arrangements between members of an obligor group.	A landlord leases to a third-party tenant, which is a subsidiary of a parent company with more economic substance, and the parent company provides a guarantee in respect of rental payments of the subsidiary. As the rights of credit support are an asset of	 Limit exclusion for rights of credit support to such rights provided by associate entities other than members of the obligor group, and Provide the Commissioner with a broad discretion to treat any of the

	the landlord to which	TPD conditions
	the bank has recourse,	are being
	the landlord will fail the	satisfied.
	Third Party Debt Test.	

Issues and Solutions Register

We also enclose a copy of the Property Council's Issues and Solutions Register (**Appendix B**). These matters represent the balance of the issues with the Bill's drafting, industry examples and proposed solutions.

Conclusion

We encourage the Government to consider our proposed amendments. Given the critical importance in ensuring these issues are addressed prior to the Bill's passage through the Senate, we invite further discussion with you about the substance of our suggestions as well as the next stage of the Parliamentary process. We remain committed to working with the Government in good faith to ensure that the Government's legislative intentions are met without hurting investment into the new homes Australia needs.

We invite you to contact Matthew Wales, Policy Manager Capital Markets Division via <u>MWales@propertycouncil.com.au to discuss this submission in more detail.</u>

Yours faithfully

Allery

Antony Knep Executive Director Capital Markets Division Property Council of Australia

Appendix A – Technical Drafting Amendments

THIRD PARTY DEBT TEST AMENDMENTS

820 48 Where entity is taken to make third party debt test choice

...

(3) For the purposes of subsection 820-46(5), this section also applies to the entity mentioned in that subsection (also the first entity) in relation to an income year if:

(a) the first entity has entered into a *cross staple arrangement with one or more other entities;

(b) one or more of those other entities has made a choice under subsection 820-46(4) in relation to that income year (including a choice that is taken to be made under subsection 820-46(5)) (each of which is a second entity); and

(c) the first entity and one or more of the second entities are members of an obligor group.

820-427A Meaning of third party earnings limit and third party debt conditions

•••

(2A) for the purposes of subsection (2)(b) do not treat an amount as a debt deduction to the extent that;

- (a) it is an amount directly associated with hedging or managing the interest rate risk by an entity (the hedging entity) with an entity that is not an associate entity in respect of an ultimate debt interest issued by another entity (the other entity), where the other entity and that entity is Australian entity which are part of the same wholly owned group (and any interposed entities are Australian entities); or
- (b) it is an amount payable to the hedging entity which is directly associated with the amount in (2A(a)) by the other entity.

(3) A *debt interest issued by an entity satisfies the third party debt conditions in relation to an income year if the following conditions are satisfied:

(a) the entity issued the debt interest to an entity that is not an *associate entity (see section 820-427D) of the entity;

(b) the debt interest is not held at any time in the income year by an entity that is an associate entity of the entity;

(c) the holder of the debt interest has recourse only to or substantially only to assets of the following kind for payment of the debt to which the debt interests relates:

(i) Australian assets held by the entity;

(ii) Australian assets that are *membership interests in the entity (unless the entity has a legal or equitable interest, whether directly or indirectly, in an asset that is not an Australian asset);

(iii) Australian assets held by an *Australian entity that is a *member of the *obligor group in relation to the debt interest;

(ca) none of the assets mentioned in paragraph (c) are rights under or in relation to a guarantee, security or other form of credit support provided by a *foreign entity which is an associate entity;

OR

(ca) none of the assets mentioned in paragraph (c) are rights under or in relation to a guarantee, security or other form of credit support provided by an associate entity other than an associate entity that is the entity mentioned in subparagraph (c)(iii) ;

(3)(d) the entity uses all, or substantially all, of the proceeds of issuing the debt interest to fund its commercial activities in connection with Australia that do not include:

(i) any *business carried on by the entity at or through its *overseas permanent establishments; and

(ii) the holding by the entity of any *associate entity debt, *controlled foreign entity debt or *controlled foreign entity equity.

...

...

(4) A right is not taken to be a right of a kind mentioned in paragraph (3)(ca) if:

(a) the right relates wholly to the creation or development of a *CGT asset that is, or is reasonably expected to be:

(i) land or other real property situated in Australia (including a lease of land, if the land is situated in Australia); or

(ii) moveable property of a kind covered by subsection (6) situated on such land; and

(5) For the purposes of paragraph (4)(a), in determining whether a right relates wholly to the creation or development of a *CGT asset of a kind mentioned in that subsection, disregard the extent (if any) to which the right relates incidentally to another matter.

(6) For the purposes of subparagraph (4)(a)(ii), moveable property situated on land is of a kind covered by this subsection if the property is, or is reasonably expected to be:

(a) incidental to and relevant to the ownership and use of the land; and

(b) situated on the land for the majority of its useful life.

(7) For the purposes of paragraph (4)(a), if:

(a) the creation or development of the CGT asset mentioned in paragraph (4)(a) has reached completion during an income year or during the prior income year; and

(b) paragraph (4)(a) was satisfied in respect of a right at any time in the income year prior to the income year mentioned in paragraph (7)(a)

the right shall be taken to relate wholly to the creation or development of a *CGT asset.

820-427C Conduit financing conditions

(1) This subsection applies in relation to an income year (the relevant year) if all of the following conditions are met in relation to the income year:

(a) an entity (the conduit financer) issues a *debt interest (the ultimate debt interest) to another entity (the ultimate lender);

(b) one or more other entities are *associate entities (see section 820-427D) of each other and of the conduit financer; (c) one or more of those associate entities (each of which is a borrower) issues a debt interest to:

(i) the conduit financer; or

(ii) another borrower associate entity (including an entity that is a borrower because of another operation of this subparagraph);

•••

(d) the amount loaned under the debt interest (each of which is a relevant debt interest, but excluding any debt interest which is classified as associate entity equity):

(i) if subparagraph (c)(i) applies—was financed by the conduit financer only with proceeds from the ultimate debt interest; or

(ii) if subparagraph (c)(ii) applies—was financed by the associate entity only with proceeds from another borrower;

(f) disregard the terms (if any) of a debt interest between:

(i) Australian entities where the Australian entities wholly own each other (and any interposed entities are an Australian entity); or

(ii) Australian entities that are wholly owned by the same Australian entity (and any interposed entities are an Australian entity); or

(iii) Australian entities which are able to enter into a cross staple arrangement with each other

•••

(2) (d) disregard the terms (if any) of a relevant debt interest, to the extent that those terms have the effect of:

(i) allowing the recovery of costs of the conduit financer that:

(A) are a *debt deduction for the income year of the conduit financer; and

(B) are a debt deduction that is treated as being attributable to the ultimate debt interest under subsection 820-427A(2) because it is directly associated with hedging or managing the interest rate risk in respect of the ultimate debt interest; or

(ii) reflect passing on of benefits directly associated with hedging or managing the interest rate risk in respect of the ultimate debt interest

and

(e) disregard the terms (if any) of a relevant debt interest, to the extent that those terms have the effect of:

(i) allowing the recovery of costs of a borrower that:

(A) are a debt deduction for the income year of the borrower; and

(B) are a debt deduction that is treated as being attributable to the relevant debt interest under subsection 820-427A(2) because it is directly associated with hedging or managing the interest rate risk in respect of the relevant debt interest.

ii) reflect passing on of benefits directly associated with hedging or managing the interest rate risk in respect of the relevant debt interest

(3) The Commissioner can decide, in writing, that one or more conditions in subsection (1) may be treated as being met.

DEBT DEDUCTION CREATION RULE AMENDMENTS

820-423A Debt deduction limitation rule for debt deduction creation (all relevant entities)

(5A) For the purposes of paragraph (5)(b), this subsection covers a payment or distribution if:

(a) the recipient has issued a debt interest to the payer; and

(b) the recipient is an *Australian entity; and

(c) the payment or distribution is entirely referable to the proceeds from the issue of the debt interest; and

(d) in a case where the payment or distribution is predominantly funded from the proceeds of another debt interest (the *earlier debt interest*)—the terms of the *earlier* debt interest mentioned in paragraph (a), to the extent that those terms relate to costs incurred in relation to the debt interest, are the same as the terms of the earlier debt interest mentioned in paragraph (a), to the extent those terms relate to such costs incurred in relation to the debt interest.

(e) To avoid doubt, where a debt interest referred to in paragraph (c) has no terms that relate to costs, paragraph (d) will be satisfied in relation to the debt interest.

(f) For the purposes of paragraph (d), the modifications in subsection 820-427C(2) apply as if the references in that subsection to the ultimate debt interest were a reference to the earlier debt interest and a reference to the relevant debt interest were a reference to the debt interest mentioned in paragraph (a).

•••

(8) Where one or more of the conditions in subsection (2) or subsection (5) has been satisfied, the Commissioner can decide, in writing, that an entity can treat the condition as not being satisfied.

Additional exclusions need to be included in 820-423A as follows:

Remove section (3A) (a) and (b) and the example.

(5) (b)(iii) increase the ability of any entity (including the payer) to make; one or more payments or distributions (within the meaning of section 26BC of the Income Tax Assessment ACT 1936), other than payment or distribution covered by subsection (5A), or (5B) or (5C) of this section, that it makes to one or more other entities (each of which is a recipient);

(5C) For the purposes of the paragraph (5)(b), this subsection covers payment or distribution:

(a) to the extent of the payer's cash earnings for the income year; or

for the acquisition of a *CGT asset (other than a CGT asset covered by section 820-423AA) under subsection 820-423(2).

Suggested markups for this exclusion to subsections 820-423A(2) below:

(iii) an associate pair of an associate disposer.

(f) the recipient and disposer and the payer are not:

(i) each an Australian entity where the acquirer and disposer are wholly owned by each other (and any interposed entities are an Australian Entity); or

(ii) each Australian entity wholly owned by-the same Australian entity (and any interposed entities are an Australian entity); or

(iii) each an Australian entity which are able to enter into a cross staple arrangement with each other

and 820-423A(5) below:

(iii) an associate pair of an associate recipient.

(g) The the recipient and the payer are not:

(i) each an Australian entity where the recipient is wholly owned by the payer (and any interposed entities are an Australian entity); or

(ii) each an Australian entity and which are wholly owned by the same Australian entity (and any interposed entities are an Australian entity); or

(iii) each an Australian entity which are able to enter into a cross staple arrangement with each other not

Suggested amendments to section 820-50 below:

(2) Subdivision 820-EAA does not apply to a debt deduction that relates to an financial arrangement agreement entered into before 22 June 2023.

Remove subsection (3)

	Кеу				
Critical Substantive issue					
	Critical Drafting issue				
	High				
	Medium				
	Low				

#	Category	Status under June Bill	Status under October ED	Priority	Ref	Proposed solution
1	TPDT - Choice	Where the Commissioner has decided to allow revocation a TPDT choice under 820-46(4) any deemed choice under 820-46(5) automatically ceases to apply (820-47(5)). The entity to which the deemed choice previously applied would then be out of time to make the choice (absent the Commissioner's discretion).	No change.	Low		Where the entity has itself made a choice under 820-46(4), 820-46(5) should not apply to it such that the choice can be preserved (subject to a separate application to revoke).
2	TPDT – Deemed Choice	Deemed choice applies to an entity that has entered into a *cross staple arrangement with an entity that has made a choice under 820-46(4) or is taken to have made a choice under 820-46(5). Where an entity on the trust side borrows from a bank (as would usually be the case) and therefore makes a choice to apply the TPDT, the deemed choice on the company side would result in	No change.	Critical – Substantive Issue	820- 48(3)	Remove 820-48(3) or at a minimum include a requirement that the party to the cross staple arrangement must be a member of the borrower's obligor group.

3	TPDT – Deemed Choice	denial of interest deductions on any cross stapled loan that does not meet the third party debt conditions. In this regard, many cross stapled loans will not qualify as conduit financing as they may not be sourced from third party debt but rather from cash reserves, capital raisings, proceeds on disposal of assets etc. The integrity concerns in relation to different choices only arises for upstream entities, and should not arise for stapled entities. A 20%+ associate entity that is in the obligor group is deemed to make the third party debt test choice where the borrower in the obligor group makes this choice.	820-49(3) now provides: "For the purposes of paragraph (1)(b), disregard assets that are *membership interests in the borrower." It would not be unusual for a lender to take security over membership interests in entities other than the direct borrower, and so the rule should operate to disregard membership interests in any member of the obligor group. In addition, the exclusion should capture incidental security, such as over controlled accounts into which distributions are paid.	Medium	820- 49(3)	Entities that are in the obligor group only because they provide loans to such members should not be subject to the deemed choice as the security is not in the nature of additional credit support (but rather is required to assist the bank with enforcement of its security over the underlying assets of the obligor group). Change to: (3) For the purposes of paragraph (1)(b) disregard assets that are *membership interests or *debt interests, or assets that are incidental to membership interests or debt interests, in an entity that is a member of the obligor group (disregarding this subsection).
4	FRT – Excess capacity	To avoid penalising groups of trusts that are not eligible to form a tax consolidated group, the fixed ratio earnings limit should include an ownership based proportional share of any excess fixed ratio earning limit over the	Where a holding trust has a direct control interest of 50% or more in another trust at any time in the income year, excess fixed ratio earning limit can be transferred. 		debt financing Based on current drafting, JV partners will not be able to include any EBITDA from the JV in their thin cap calculations, resulting in denial of interest deductions.	 purposes of the GRT. Drafting requires that the downstream trust is subject to the thin cap rules (ie a general class investor) and has made the FRT election. If not a general class investor is not able to make the FRT election. All downstream (and upstream and sister) entities should be able to transfer excess tax EBITDA. 			
5	FRT - Losses	Carry forward capital losses are required to be separately added back in calculating tax EBITDA in s820-49 (as such losses do not form part of tax losses for earlier income years, rather form part of the calculation of the net capital gain included in taxable income. Carry forward revenue losses are also not added back. Apart from causing the FRT to deviate from its stated objective of reflecting economic activity for an income year, this change creates complexity and potential circularity in the Tax EBITDA calculation (as the tax loss utilised can be impacted by the denial under the FRT).	The ED provides that "820-52(1A) In working out the taxable income or *tax loss of a *corporate tax entity for an income year for the purposes of subsection (1), assume that: (a) the entity chooses to deduct, under subsection 36-17(2) or (3), all of the entity's tax losses for *loss years occurring before the income year; and (b) subsection 36-17(5) does not apply to that choice" (relating to preventing refreshing losses for franking offsets). This amendment does not deal with the iteration issues when applying the rules, i.e. it is not clear that the assumption regarding utilisation of losses should take into account denial of debt deductions.	High	820- 52(1)(a) 820- 52(1A)	Exclude the application of prior year revenue and capital losses in the calculation of taxable income.
6	FRT – Excess capacity	No interest deductions are available under the fixed ratio test for a	Refer to item 7 above where these comments have been consolidated.	Critical – Substantive Issue	820- 52(6)	Refer to item 7 above.

7	GRT	The GR group net third party interest expense definition and financial statement net third party interest expense seem circular.	No change.	Low		Suggest a single defined concept being GR group net third party interest expense.
8	GRT	Net interest expense in 820-54(4)(a) is not defined	No change.	Low	820- 54(4)(a)	
9	GRT	The requirement to determine if any GR group member has negative entity EBITDA and to exclude this from GR group EBITDA is onerous and in any event is difficult to understand from a policy perspective (why should the fact that a particular activity is undertaken in a separate entity make a difference?).	No change.	Medium	820- 55(3)	Remove 820-55(3)
10	Debt deduction creation - Acquisition s	A "legal or equitable obligation" is not a CGT asset. It is not clear how it is possible to debt fund the assumption of an obligation.	No change.	Medium	820- 423A(2)	Remove "or a legal or equitable obligation".
10.1	Debt deduction creation		 S 820-423E contains a modified meaning of associate pair which treats a unit trust as if it were a company. Presumably this is to deal with the issue that any beneficiary of a trust is an associate, however in order to be effective a number of technical issues need to be addressed: S318 applies to "trustees" and not trusts The rules in relation to sufficient influence 	Critical – Drafting Issue	820- 423E	Include additional deeming rules to ensure that the associate pair rules for trusts operates appropriately. This could include deeming a unit trust to be a public unit trust entity for the purposes of s318, such that ss318(5) operates in respect of sufficient influence and majority voting power requirements.

		and majority voting power are not directly applicable to			
11 Debt deduction creation - Acquisition s	 For 820-423A to apply there is no requirement that the debt deduction relates to an arrangement with an associate (i.e. third party debt deductions can be denied). There is also no recognition that there may have been existing third party debt which is being refinanced as part of the transfer of an asset (i.e. there is no additional debt funding overall). There was no consultation in respect of this new integrity rule and it has potentially extreme breadth of application (including principal purpose anti-avoidance rules). 	trusts. 820-423A has been restricted to loans from an associate. There is also an exclusion for the acquisition of certain CGT assets: Newly issued membership interests in an Australian entity or foreign company New" depreciating assets (other than intangibles) On-lending arrangements While the restriction to loans from associates deals with a number of obvious issues, the potential for unintended consequences remains extremely high.	Critical – Substantive Issue	Subdivi sion 820- EAA	Remove the debt deduction creation rules from the Bill. Subject to the above, adopt additional carve outs from former Div 16G (former 159GZZF): • Trading stock • Other "new" assets • Commissioner's discretion where no increase in overall indebtedness Limit the operation of the rules consistent with the former Div 16G such that it only applied to transactions with a foreign controller (such that additional net debt was introduced into Australia) and does not apply to trusts (refer former 159GZZE). In any event, given the breadth of potential application, include a general Commissioner's discretion to not deny debt deductions under the rules inbuilt into the provisions. Given the amount of on-lending arrangements between wholly owned Australian entities this would require an onerous number of arrangements to seek Commissioner discretion if an exemption is not provided. If debt deduction creation is not removed from the Bill, the application of debt deduction creation rules should be deferred in their entirety and not to apply to debt interests unless they are entered into from income years commencing on or after 1 July 2024 (one the basis that the rules receive royal assent pre-31 December 2023, if later, then deferred by 6 months from that later date.

12	Debt deduction creation - Payments	Where a trust seeks to 'push down' debt to a subsidiary trust to address the complete denial of deductions under the FRT as a result of the requirement to exclude distributions from trusts in tax EBITDA, deductions of the subsidiary trust in relation to the new debt (which would be used to fund a return of capital by the subsidiary trust) would be wholly denied.	This specific issue has been addressed by 820- 423(5A) which excludes payments from a "payer" that are wholly in relation to making a loan to the "recipient". If the loan to the recipient is "predominantly funded from the proceeds of another debt interest (the earlier debt interest)" then the terms relating to costs must be the same (i.e. back to back).	Critical – Substantive Issue	820- 423A(5 A)	scenarios where the rules will apply (including where the ATO will not allocate compliance resources) and (if a discretion is included) where the Commissioner will exercise his discretion. Remove the debt deduction creation rules from the Bill. Subject to the above, remove the back-to-back requirement on the basis that: • the thin capitalisation rules already address general concerns regarding deductibility of interest (i.e. there is no thin capitalisation related basis for introducing a separate `integrity' rule within a concession to allow on- lending without triggering the debt deduction creation rule for payments and distributions). • the thin capitalisation rules already include a similar (but not identical) requirement for "conduit" loans. In any event, there are a number of modifications (i.e. s820- 427C(2)) in respect of the "same terms" requirements in the
						of modifications (i.e. s820-
12.1	Debt deduction creation - Payments		The positive requirement in 820- 423A(5)(b) that "the payer uses some or all of the proceeds to: (i) fund; or (ii) facilitate the funding of; or (iii)	Critical – Substantive Issue	820- 423A (5)	Remove the debt deduction creation rules from the Bill. 13	TPDT- Condition s	820-427A requires that the entity "uses all, or substantially all, of the proceeds of issuing the debt interest to fund its commercial activities in connection with Australia that do not include: (i) any *business carried on by the entity at or through its *overseas permanent	associate entity of that other entity; and (b) if that other entity is itself an associate entity of a conduit financer mentioned in section 820-427C (whether because of another operation of this subsection or otherwise)—treat the first entity as an associate entity of the conduit financer. This means that cross stapled loans will not meet the third party debt conditions. S820-427B(6) disregards associate entity debt that is a "relevant debt interest". Associate debt that does not give rise to debt deductions for interest (i.e. non- interest bearing loans) should also be disregarded or excluded.	Critical – Drafting Issue	820- 427A(3) (d)	Amend as follows: 820-427A(3)(d) the entity uses all, or substantially all, of the proceeds of issuing the debt interest to fund its commercial activities in connection with Australia that do not include: (i) any *business carried on by the entity at or through its *overseas permanent establishments; and (ii) the holding by the entity of any *associate entity debt giving rise
		entity of any *associate entity debt, *controlled foreign entity debt or *controlled foreign entity equity." The exclusion for "associate entity debt" will severally limit or even effectively remove the ability for the ultimate borrower to on-lend borrowed funds to an Australian group entity, and also seems to make the conduit financing rule inaccessible. It is also not clear whether the activities of the entity cannot include a foreign PE or				*controlled foreign entity debt or *controlled foreign entity equity. "

		investment in foreign				
		assets, or whether the				
		proceeds of the debt				
		interest cannot be used

		credit support to the				
		borrower, which makes				
		the extension of				
		recourse to assets of				
		the obligor group meaningless.				
17	TPDT –	As the ultimate debt	Nachanga	Medium		
17		interest issued by the	No change.	Wedfullt		
	Conduit	conduit financier needs				
	financier	to meet the external				
		third party debt				
		conditions, the conduit				
		financier cannot be an				
		offshore entity with a				
		loan to an Australian				
		subsidiary as the				
		requirement in 820-				
1		427C(1)(g) and 820-				
1		427A(3)(e) would not				
		be satisfied, even if all				
		the other requirements				
		are met (same terms,				
		recourse etc.). It is				
		unclear why cross				
		border back to back				
		loans should be				
		excluded.				

18	TPDT – Conduit financier	Borrowers are defined in ss 820-427C(1)(b) as one or more associate entities of each other, there is no requirement that the entity is actually issuing a debt interest to the conduit financier. In this case the ETPDT cannot apply unless the conduit financier on-lends to an entity and <u>all</u> of its associate entities.	The definitions of "borrower" and "relevant debt interest" are now intended to restrict the application of the conduit financing conditions to loans that are directly or indirectly financed by the ultimate debt interest. If an associate entity (AE1) lends (Loan 1) to a second associate entity (AE2) and AE2 on-lends (Loan 2) to a third associate entity (AE3), each of AE 1 -3 would be "borrowers". As Loan 2 is financed only with proceeds from Loan 1, then Loan 2 would be a "relevant debt interest" and must therefore be on the same terms as the ultimate debt interest.	High – Drafting Issue	820- 427C(1) (c)	820-427C(1)(c)(ii) should refer to another "borrower" based on one or more applications of 820- 427C(1)(c). See also item 32 below.
19	TPDT- Conduit financier	Under 820-427C(1)(e) "the terms of each relevant debt interest, to the extent that those terms relate to a cost incurred in relation to the relevant debt interest, are the same as the terms of the ultimate debt interest, to the extent that those terms relate to a cost incurred in relation to the ultimate debt interest." It seems that <u>each</u> cost under the on-lending must be the same as a cost incurred in relation to the ultimate debt interest. There will generally be a range of fees, including interest, line fees, commitment fees, administration / management fees etc. which would be on- charged as an `all-in' cost.	Amended to refer to "costs"	Critical – Substantive Issue	820- 427C(1) (e)	This would seem to still be an issue as many on-lending arrangements will not be able to meet this requirement due to the group treasury function that finance companies undertake (e.g. different external borrowings with different terms to the relevant debt interests) and the fungible nature of money. This requirement disregards the manner by which in house treasury functions operate with one or two entities entering into the arrangements with external borrowers and then acting as an internal bank with other entities in the group. Further explanation of how such arrangements are conducted is provided below: • conduit financer borrows from various third party banks and lenders. To efficiently manage the group's financing

			requirements, external
			loans will be entered
			into at different times
			for different loan
			facility limits, varying
			terms (including some
			loans with the ability
			to repay and redraw
			funds within the
			agreed facility limit),
			interest rates, and
			costs.
		•	external borrowings
			will be sourced and
			retired at various times
			by conduit financer
			which will in total
			match the needs of the
			wholly owned group
		•	conduit financer loans
			funds sourced as above
			will lend to an entity in
			the wholly owned
			group (an 'internal
			conduit financer')
			which then further on-
			lends to other wholly
			owned entities at a
			facility limit (in total)
			no greater than the
			external facilities. One
			loan document is
			entered into between
			the conduit financer
			and internal conduit
			financer. External
			loans are not backed to
			backed but rather split
			/ aggregated and funds
			on-lent to entities
			depending on their
			financial requirements.
			The loan terms also
			allow listed internal
			conduit financer (and
			its wholly owned
			entities) the ability to
			prepay and redraw
			funds as required. The
			interest rate on the
			relevant debt interests
			will reflect conduit
			financer's cost of funds
			on a monthly basis (i.e.
			conduit financer makes
			no margin).

						As this is a common feature of
						such functions and it is a
						threshold issue to accessing the
						conduit financing conditions and
						therefore the TPDT. This
						requirement also ignores the
						fungible nature of money. It is
						impossible to trace the third party
						external source of each internal
						loan given external third party
						loans are hedged, are continually
						repaid, redrawn, cancelled or
						replaced to ensure external
						interest cost are minimised,
						making the external source of
						funds in respect of internal loans
						indistinguishable over time
						It is not so much about the costs
						as the number of varied ultimate
						debt interests which would not
						necessarily exactly align to the
						relevant debt interests given the
						treasury function undertaken.
